

Connectivity Solutions from Comcast Business

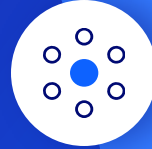

Comcast Business Network Solutions

Comcast Business solutions help businesses adapt, evolve, and thrive in an ever-changing digital landscape.

High-performance bandwidth

Dedicated bandwidth up to 100Gbps and up to 400 Gbps in select areas. Enables cloud applications, fast transactions, and collaboration.

Connectivity

Provides an advanced network infrastructure. Simplifies your data network with flexible connectivity options.

Scalability

Scalable from 2 Mbps up to 400 Gbps in select areas. Grow your data network as needed.

Network redundancy

Diverse connectivity options to a primary network for business continuity.

Reliability

High network availability with a diverse and redundant network architecture. Provides performance needed for today's digital business environment.

Comcast Business Has Solutions for Your Connectivity Needs

Dedicated Internet

dedicated connectivity between LAN and Internet

Ethernet Private Line

point-to-point connectivity between two sites

Ethernet Network Services

multipoint-to-multipoint connectivity

Ethernet Virtual Private Line

point-to-multipoint connections

Direct2Cloud

private connection from designated location to cloud service provider

Wavelength Services

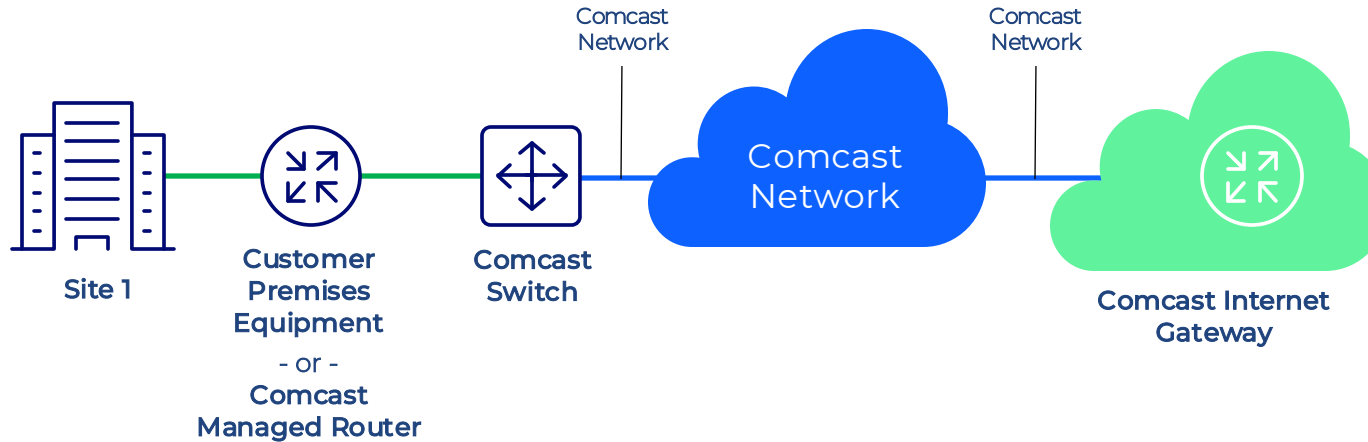

dedicated point-to-point optical

Off-Net Dedicated Internet Access

dedicated Internet access provided by off-net vendor with their assets

Dedicated Internet

Comcast Business Dedicated Internet provides a reliable, private path for your network traffic and business applications, managed and monitored by a single provider.

Legend:

- Customer LAN
- Comcast Network

High-bandwidth dedicated Internet access connectivity between a LAN and the Internet.

Reliable design

High network availability, low latency and packet loss

Fully scalable solutions

Symmetrical dedicated bandwidth configurable from 100Mbps to 400 Gbps

Broad and diverse network

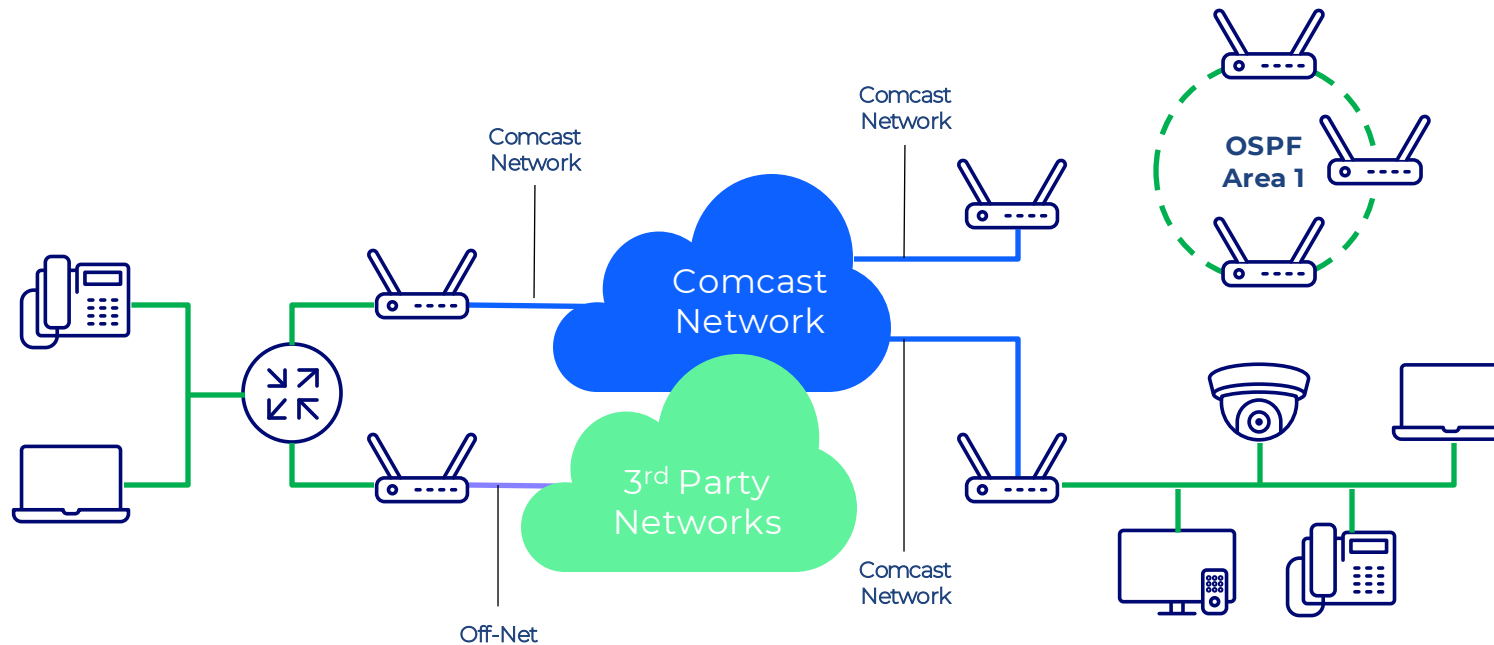

Our advanced network with a national route of miles of fiber

Rapid deployment and installation

**COMCAST
BUSINESS**

Ethernet Solutions

With **Comcast Business Ethernet Solutions** you can simplify your network management with routing and network connectivity and security solutions from a single provider.

Comcast Dedicated Internet (DI)

Managed Router

Stateful firewall

DDoS Mitigation Service

One monthly bill

Reliable internet connectivity

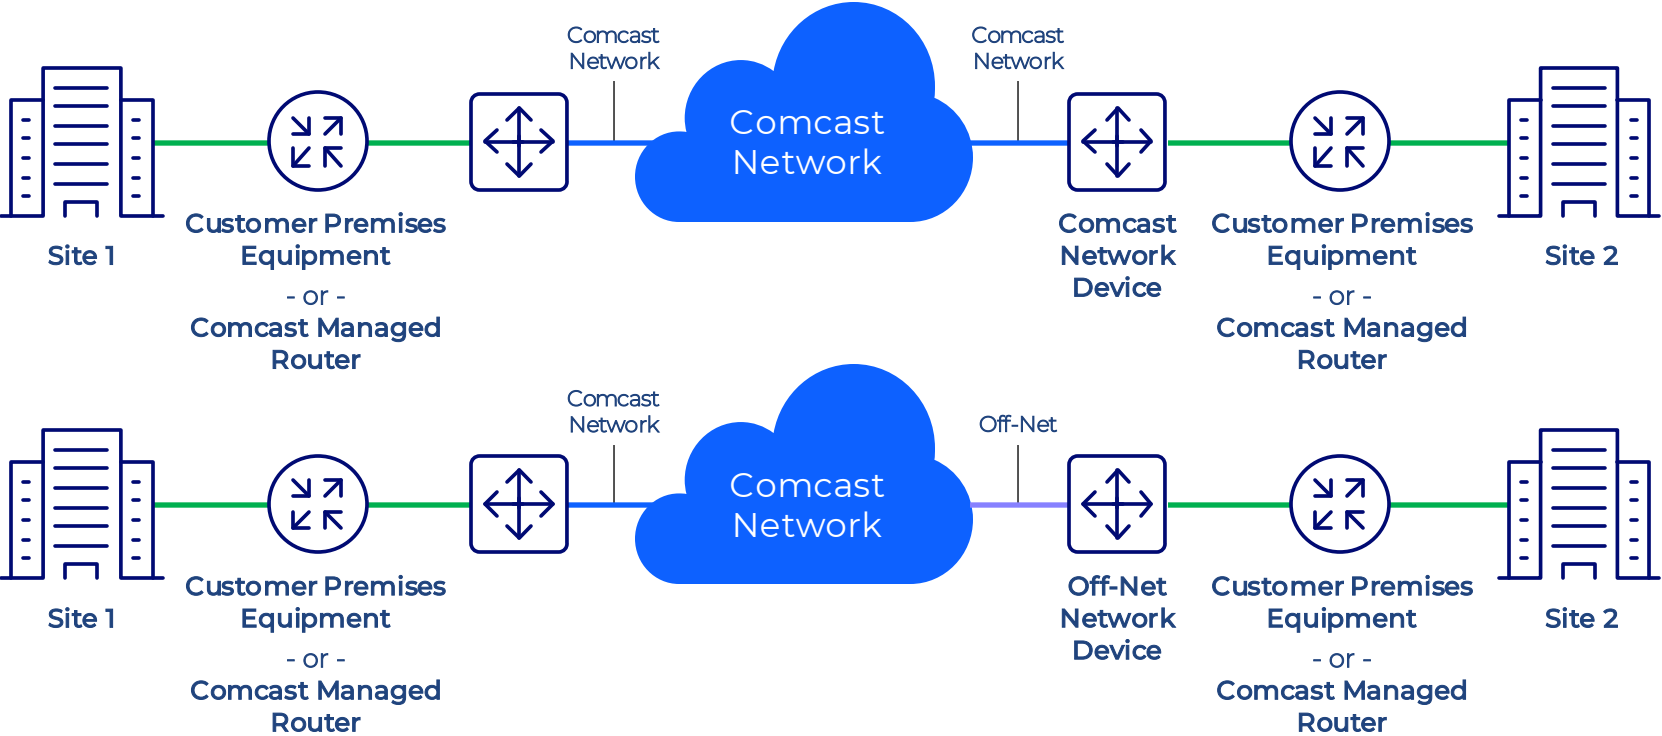

Speeds up to 100 Gbps

Simplified network management

COMCAST
BUSINESS

Ethernet Private Line (EPL)

Comcast Business Ethernet Private Line (EPL) delivers high-performance, with point-to-point connection (between two sites).

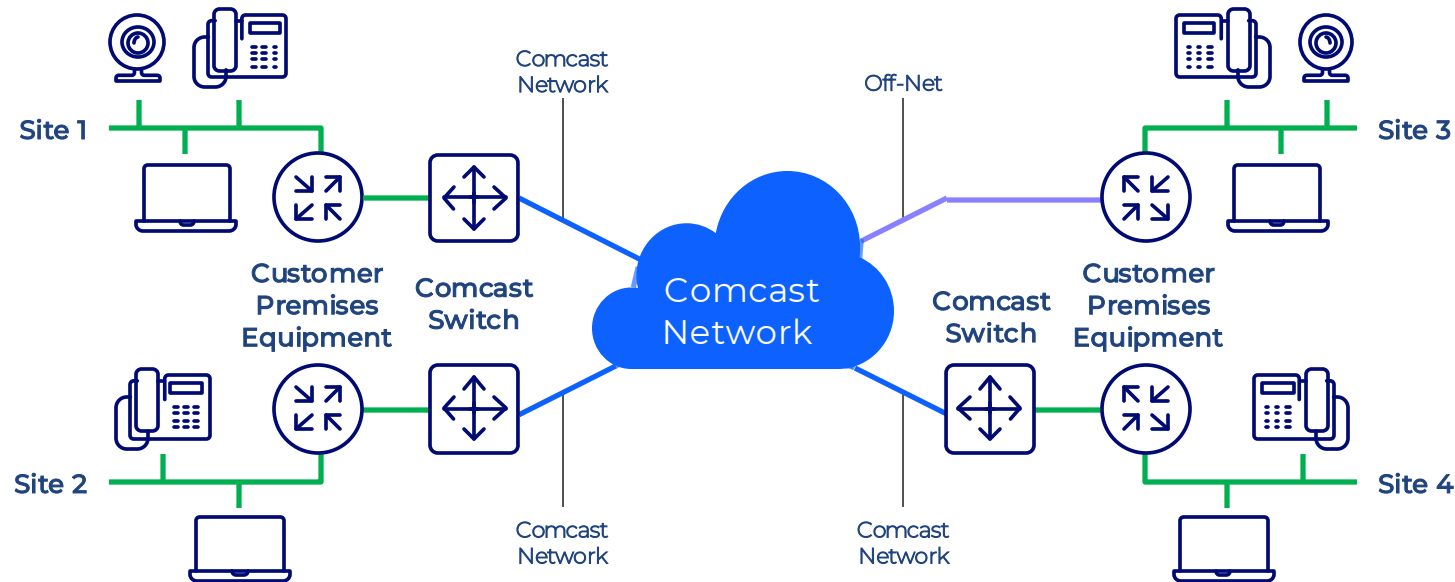

Point-to-point connectivity between two sites for bandwidth-intensive applications.

Connect a branch office to headquarters or to a data center.

Symmetrical speeds available.

Ethernet Network Service (ENS)

Comcast Business Ethernet Network Service (ENS) enables customers to connect all physically distributed locations as an alternative to traditional hub and spoke network topologies from a single service provider.

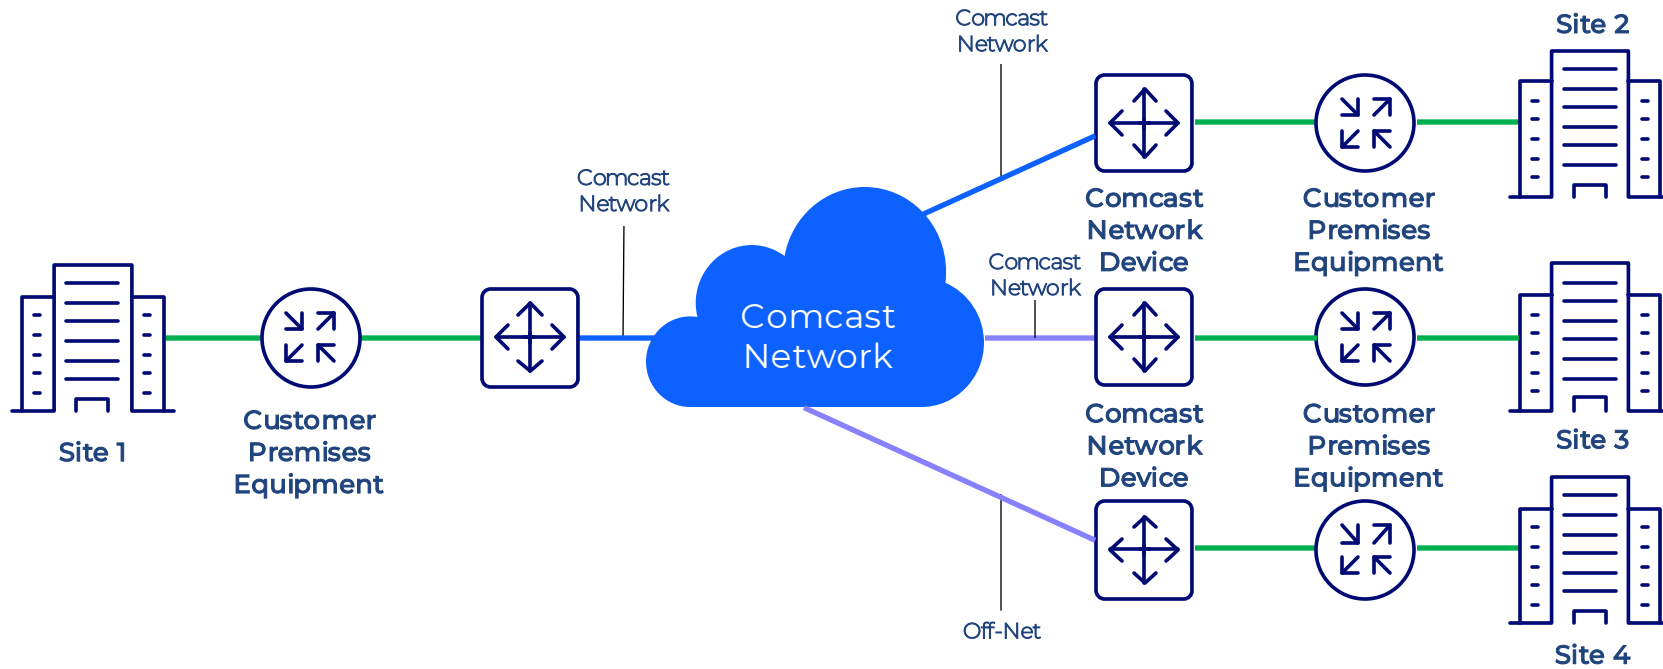

Legend:

- Customer LAN
- Comcast Network
- Off-Net Provider

Multipoint-to-multipoint connectivity for agencies with high-bandwidth requirements and multiple locations.

Ethernet Virtual Private Line (EVPL)

Comcast Business Ethernet Virtual Private Line (EVPL) offers a virtual connection providing customers connectivity from a single location to multiple locations from a single provider.

Legend:

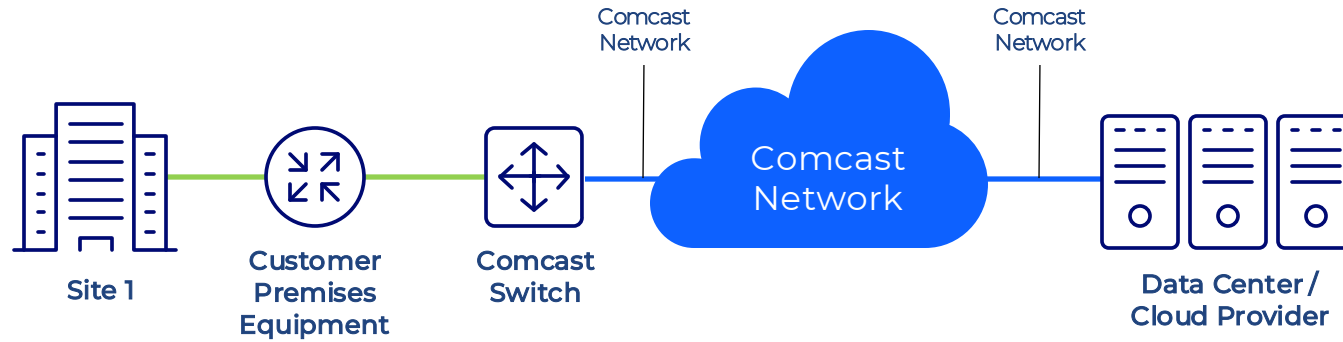

- Customer LAN
- Comcast Network
- Off-Net Provider

Point-to-multipoint connections tailored by application. A flexible data networking solution for your agency or department.

COMCAST
BUSINESS

Direct2Cloud (D2C)

Comcast Business Direct2Cloud (D2C) offers connection to a cloud or application provider from a single provider as either Ethernet Private Line, Ethernet Network Services, or Ethernet Virtual Private Line.

Legend:

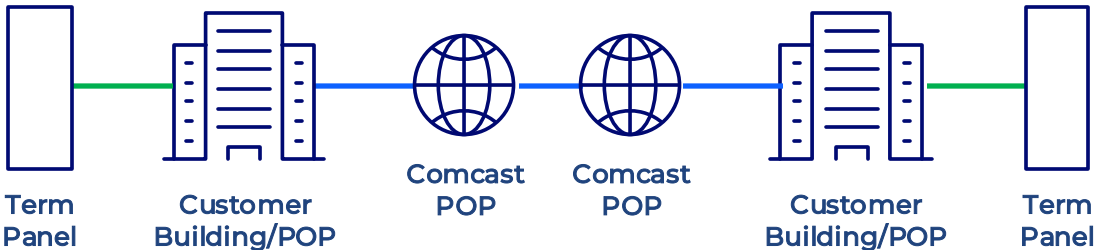

- Customer LAN
- Comcast Network
- Off-Net Provider

A private, Layer 2 Ethernet connection from a designated location to the cloud service provider. Allows for your agency or department to set up VLANs for direct interface and reliable performance.

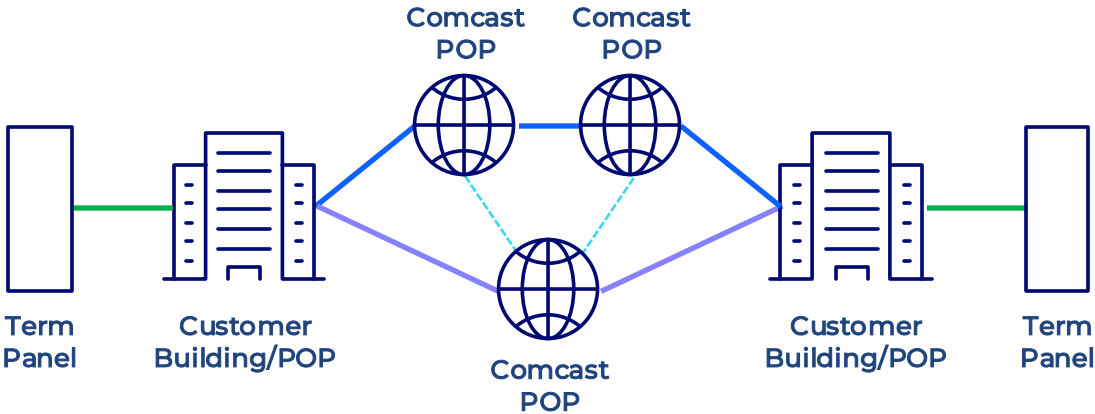

COMCAST
BUSINESS

Wavelength Services

Comcast Business Wavelength Services offers a dedicated point-to-point optical, high-bandwidth, low-latency transport solution.

A single, static point-to-point path between two end points.

Diverse-routed, static point-to-point paths between two endpoints. Comcast Business provides switching at each end and hands off a single client to the customer.

Legend:

- Customer LAN
- Comcast Network (Primary Path)
- Off-Net Provider

Bandwidth options of 10 Gbps or up to 100 Gbps

Reliable access across single or diverse routed connections

High network availability

Dense wave division multiplexing optical transport network
