

# QA Automation Engineer – Hybrid (Coimbatore, India)

## Job description

Evolve In Tech is a global technology and innovation company committed to transforming ideas into intelligent, scalable solutions.

With roots in Germany and India, we design and develop next-generation software applications and digital products that empower businesses, institutions, and communities to evolve in the digital era.

Our mission: **Engineering What's Next** — creating technology that drives progress and connects people.

## Why this role

We're looking for a QA Automation Engineer who is passionate about building robust testing systems, driving automation excellence, and shaping the future of our quality assurance processes.

## Key Responsibilities

- Define and implement test automation strategies for web-based products and internal tools.
- Build and maintain end-to-end automated tests using Cypress and Playwright.
- Design test plans integrated with CI/CD pipelines for rapid feedback and continuous improvement.
- Advocate for Behavior-Driven Development (BDD) and automation best practices.
- Collaborate with developers, product managers, and DevOps engineers to ensure quality across the lifecycle.
- Monitor test execution, analyze issues, and continuously refine automation frameworks.
- Mentor junior team members on testing tools, scripting, and QA standards.

## Required Skills and Experience

- 3+ years of experience in QA automation within an Agile or DevOps environment.
- Strong hands-on skills with Cypress and/or Playwright.
- Solid programming skills in JavaScript or TypeScript.
- Strong understanding of CI/CD workflows, BDD, and automation frameworks.
- Experience designing scalable and maintainable test architectures.
- Excellent analytical, debugging, and communication skills.
- Proactive mindset with ownership of quality and delivery.

### Why Join Evolve In Tech

- High Impact: Shape and scale Evolve In Tech's automation journey.
- Innovation: Work on challenging projects for global clients in EdTech and digital transformation.
- Collaboration: Be part of a multicultural, growth-focused team with strong ties to Germany.
- Learning & Growth: Continuous learning opportunities and cross-domain exposure.

### Benefits and Work Environment

- Hybrid work model – primarily Coimbatore-based with flexibility.
- Collaborative team culture that values creativity and accountability.
- Continuous learning through online courses, mentorship, and internal training.
- Paid time off and wellness-focused work environment.

### How to Apply

If you're passionate about automation, innovation, and engineering quality into everything you do — we'd love to meet you.
