Software Engineer – Hybrid (Coimbatore, India)

Job description

Evolve In Tech is a global technology and innovation company committed to transforming ideas into intelligent, scalable solutions.

With strong roots in **Germany and India**, we develop next-generation software products that empower businesses, institutions, and communities to evolve in the digital era. Our mission:

Engineering What's Next — creating technology that connects people and drives transformation.

Why this role

You will play a key role in shaping our frontend architecture, transforming design systems into living components, and ensuring our products deliver an exceptional user experience across platforms.

This role is ideal for someone who combines strong technical expertise with a passion for clean code, performance, and elegant design.

Key Responsibilities

Frontend architecture & development

- Take ownership of architecture and development for modern frontend applications (Vue.js / React).
- Build and maintain a scalable, reusable **design system and component library**.
- Develop modular, testable, and accessible UI components.
- Collaborate with backend engineers to ensure seamless API integration.

Quality & performance

- Optimize rendering, bundle size, and runtime performance.

- Implement automated tests using Cypress, Playwright, and Vitest (or equivalent tools).
- Maintain comprehensive component documentation (e.g., Storybook).
- Ensure performance, maintainability, and accessibility standards are consistently met.

Collaboration & mentorship

- Work closely with designers to create inclusive, responsive, and user-friendly UIs.
- Support branding, theming, and white-label features across multiple clients.
- Mentor junior engineers and foster best practices in code quality and collaboration.

Required Skills and Experience

- Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- 5+ years of professional experience in **modern frontend development** (Vue.js, React, or similar).
- Proficiency in **TypeScript**, CSS architecture, theming, and state management (Vuex / Redux).
- Experience with **test automation** and modern build tools (Vite, Storybook, ESLint, Prettier).
- Strong understanding of REST and GraphQL integrations.
- Solid grasp of design principles, accessibility, and responsive UI development.
- Excellent communication and teamwork skills.
- Passionate about clean, maintainable code and continuous learning.

Why Join Evolve In Tech

- **Impactful Work:** Build technology that contributes to education and digital transformation.
- **Innovation:** Work on high-visibility global projects with cutting-edge technologies.
- **Collaboration:** Join a multicultural team connecting India and Germany.
- **Ownership:** Take end-to-end responsibility for features and architectural decisions.
- **Growth:** Learn continuously and contribute to building a world-class engineering culture.

Benefits and Work Environment

- **Hybrid work model** – primarily Coimbatore-based with flexibility.
- **Collaborative, inclusive culture** that values innovation and accountability.
- **Continuous learning opportunities** – courses, mentorship, and internal training.
- **Paid time off** and a wellness-focused work culture.
- **Exposure to international projects** and clients in Europe.

How to Apply

If you're driven by innovation and eager to design scalable, high-impact applications, we'd love to hear from you.
