ALUMINIUM PRODUCTS

Aluminium profiles are products born from Aluminium alloys that are transformed into shaped objects through the extrusion process. Aluminium's unique combination of physical characteristics mostly depends on this process. Aluminium corner extrusions are used in several fields because this metal is: Strong and stable.

ALUMINIUM COMPOSITE PANEL (ACP) Sheets

Aluminium Composite Panel or ACP is a flat pane made up of two thinly coated aluminium sheets with a core polyethylene stuffed in between the two sheets. Virgolam, one of the largest ACP Sheet Manufacturer based in India offers premium quality ACP panels in a visually striking palette and textures. Ideal for external cladding, interior application and signage, the panels by Virgolam help create visual aesthetics that enhance the appearance of any space. Highly durable, stain-resistant, and weatherproof, these ACP sheets are the epitome of our creativity and hard work.

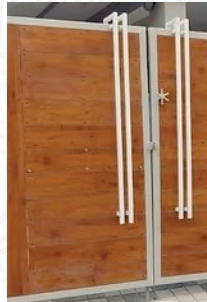

VIRGO[®]

HPL

High Pressure Laminates

Our High Pressure Laminates are a testament to our expertise and commitment to delivering superior products. HPL, or High Pressure Laminate, is a versatile surfacing material renowned for its durability, strength, and aesthetic appeal. These laminates are meticulously crafted in our own production facilities using high pressure and heat, resulting in a robust and long-lasting surface that can withstand the demands of various environments.
