

Capability Statement

BETTER DATA. SMARTER SYSTEMS.
STRONGER RESULTS.

Core Competencies

NEXSOZ LLC specializes in data analytics, monitoring, evaluation, and learning (MEL), as well as advancing digital transformation through automation, AI, and cloud infrastructure. Our expertise covers end-to-end project and program management, including stakeholder engagement, compliance, risk mitigation, strategy development, and operational support. Our core competencies include:

Data Analytics

- Integrated data systems, dashboards, and visualizations
- Predictive, geospatial, and real-time analytics
- Data collection tools and frameworks for actionable insights

Monitoring, Evaluation & Learning (MEL)

- Fit-for-purpose MEL system design and implementation
- Third-party monitoring and independent verification services
- Project and program evaluations

Digital Transformation

- Digital strategies, readiness assessments, and AI-driven infrastructure
- Automation and cloud-based solutions

Project & Program Management

- End-to-end project and program management from planning to execution, stakeholder engagement, compliance, and risk management
- Project proposal development

Strategy & Operational Support

- Strategic planning and organizational assessments
- Rapid project setup, mobilization, interim staffing, procurement, supply chain, asset management, and admin operations
- Translation, interpretation, and localization services

Differentiators

Tailored Solutions: Adaptive, fit-for-purpose approaches for diverse operational environments

Cross-Sector Expertise: Experience across federal agencies, nonprofits, and international organizations

Data-Driven: Emphasis on actionable insights, data ethics, and performance measurement

Collaborative Partnerships: Embedded support that aligns with your mission and goals

Technology-Enabled: AI, machine learning, and digital tools for smarter decisions

Agility and Responsiveness: Flexibility to pivot, scale, and respond to evolving client needs.

Past Performance

NEXSOZ's team brings over 20 years of experience delivering successful projects funded by U.S. Government agencies and global organizations. Our leadership team has managed high-impact initiatives funded by U.S. Government agencies, United Nations entities, and numerous government-funded nonprofit initiatives outside the U.S. We specialize in executing complex, compliance-driven programs that consistently deliver sustainable outcomes while adhering to federal performance standards and regulations.

Company Data

About Us

We help government and mission-driven organizations improve their operations by leveraging data, technology, and strategy to make programs more effective, efficient, and impactful.

Whether you're seeking to modernize operations, elevate program delivery, or use data to inform decision-making, we bring the expertise, discipline, and dedication needed to help you succeed.

As technology transforms how Organizations operate, we seamlessly integrate artificial intelligence (AI) and automation into our solutions, enhancing data analysis, streamlining workflows, and enabling smarter and faster decisions.
