

OAKLEY STANDARD ISSUE

BALLISTIC CATALOG

ORIGIN

For over 25 years, Oakley Standard Issue has been supplying our nation's heroes with the very best in protective eyewear. An obsession with research and development continues to produce combat-ready equipment for those whose lives depend on their gear. We are honored to support them and their service.

OUR MISSION

Oakley Standard Issue is committed to serving the specific needs of the U.S. Military, Government, Law Enforcement, Fire and EMS professionals. We dedicate our work to offering unprecedented optical clarity while maintaining ultimate levels of protection.

OAKLEY HIGH DEFINITION OPTICS (HDO®)

A combination of technologies and patented innovations that give you clearer, sharper vision, HDO® virtually eliminates the distortion common in high-wrapped sunglasses.

- REFRACTIVE POWER. Conventional lenses can magnify images. HDO® precision gives less distorted vision across the entire field of view.
- ASTIGMATISM. Ordinary lenses can't focus all light waves in the part of your eye that does the seeing. With HDO®, you won't have the blur of inferior optics.
- PRISMATIC POWER. With regular lenses, objects aren't really where you see them. HDO® offers a truer visual image, and it helps ensure each eye has the same image so your brain won't have to work overtime.

OAKLEY HDPOLARIZED™

Oakley HDPolarized® lenses block 99% of harsh glare and minimize eye strain. Our infusion molding process eliminates the glues, layering and distortion found in conventional polarized technology. Other lenses are made up of multiple layers, attached with glue. Glue bonded layers diminish clarity and cause distortion.

OAKLEY: Fused at the molecular level

VS

COMPETITORS: Glued Layers = Distortion

PHOTOCHROMIC

Our photochromic lenses help you adapt to changing light conditions so you can always perform at your best. Your lenses won't be too dark when the sun pulls a disappearing act or too light when it knives through the clouds.

100% UV PROTECTION

- Oakley Plutonite® filters out 100% of all UVA, UVB, UVC and harmful blue light up to 400nm.
- The lens material itself blocks UV, so you don't have to rely on a thin surface coating that can wear away or become scratched.
- Our optical technologies allow for lens curvature that improves protection at the top and sides of your eyes.
- All Oakley sun lenses and Oakley Authentic Prescription Lenses provide 100% UV Protection

UNOBTAINIUM®

First introduced on our sport performance products, Unobtanium® earsocks and nosepads provide increased comfort and performance. Increases grip with sweat.

THREE-POINT FIT

Oakley's Three-Point Fit ensures that each frame makes contact only at the bridge of the nose and behind the temples. This retains optics in perfect alignment, maintains a secure fit and eliminates the discomfort of ordinary frames that hook the ears with unbalanced pressure points.

ADVANCER™ TECHNOLOGY

Advancer nose bridge instantly opens airflow to combat fogging and overheating. A simple actuator toggle allows you to advance the frame, with a single hand, directly forward instead of down your nose.

APEL

PRIZM

ANSI Z87.1

SOEP

MADE IN USA

IMPACT TECHNOLOGY

Oakley SI takes development and testing to an unprecedented level when it comes to your protection. And though it's true that Oakley lenses meet the highest industrial standards for optical clarity and impact resistance, we think of it differently. We develop products to exceed these standards and consider this our responsibility.

MIL-SPEC FOR THE ELITE

BALLISTIC IMPACT

In order for SI Ballistic eyewear to meet the MIL PRF 32432A ballistic impact requirement, Oakley eyewear is hit with a 0.15 caliber, 5.85 grain, T37 shaped projectile at approximately 700-725 feet per second. The eyewear must remain intact throughout the test, without experiencing any dislodged components or fracture to the lens.

ANSI Z87.1 (2015)

HIGH-MASS IMPACT

Part of an industrial standard called ANSI Z87.1 (2015), the High-Mass Impact test requires that the lens be hit by a 500-gram metal spike (over a pound of weight) dropped from a height of 51.2 inches (over four feet). To pass the test, no frame parts or lens fragments that could damage the eye may be ejected during impact.

HIGH-VELOCITY IMPACT

Oakley premium eyewear surpasses the ANSI Z87.1 (2015) test for high-velocity impact protection. For this test, a pneumatic cannon accelerates a quarter-inch steel shot to 102 miles per hour. The lens is targeted straight on from three different heights and at seven different angles. To pass the high-velocity test, no contact between the lens and eye is permitted during impact. In addition, no frame parts or lens fragments that could damage the eye may be ejected during impact.

PRIZM™ FINE-TUNES THE MIX BETWEEN INDIVIDUAL WAVELENGTHS OF COLOR TO OPTIMIZE CONTRAST

DULL COLORS IN THE ENVIRONMENT MAKE IT HARD TO DISTINGUISH CONTRAST

RESULT: ENHANCED DETAILS FOR AN OPTIMIZED EXPERIENCE

PRIZM™ LENS TECHNOLOGY

Prizm™ lenses are specifically engineered to provide greater contrast in your visual experience so you can perform better. The benefits of this visionary technology are game changers. Prizm™ lenses filter the correct wavelengths of light to create an optimized experience. Through an understanding of the complex way the eye interprets color, we are able to engineer lenses that enhance detail by fine-tuning the specific wavelengths of light that allow the eye to perceive color more vividly.

PRIZM™ SHOOTING

See the target with speed and precision for improved visual acuity across a broad environment

PRIZM™ DEEP WATER

Engineered to cut through glare and filter the shades of blue that overwhelm your vision in open water

PRIZM™ SHALLOW WATER

Engineered to cut through glare and boost green and copper hues

PRIZM™ MARITIME POLARIZED

Reduces glare and clarifies objects on the open water for superior navigation

PRIZM™ UNIVERSAL POLARIZED

Engineered to enhance colors and details while maintaining your personal aesthetic

PRIZM™ SNOW

Engineered to increase depth perception and heighten the detail lost in snow

SI BALLISTIC
EYEWEAR

A close-up photograph of a man with light brown hair and a short beard, wearing a dark grey police uniform. He is wearing black Oakley SI Ballistic HNBL sunglasses. The sunglasses have a low-profile design and are reflecting the outdoor environment. The man is looking slightly to the left of the camera. The background is blurred, showing other people and what appears to be an outdoor setting.

SI BALLISTIC HNBL™ & HNBL™ S

SI Ballistic HNBL™ is an eyewear platform for everyone. The low-profile design and easy lens exchange allows you to seamlessly transition from on-duty to off-duty. HNBL is optimized for performance meeting high impact standards for Mil Spec 32432A and ANSI Z87.1 as well as featuring Prizm™ Lens Technology. The frame features a lightweight, high-wrap design with thin stem technology and molded icons. The frame design is also suited for industrial prescription lenses. All sun lenses feature Oakley High Definition Optics (HDO®) and meet high mass and high velocity impact requirements. The assortment offers Prizm™ shooting (TR22 & TR45), Prizm™ Grey and Clear options.

SI BALLISTIC HNBL™

SI Ballistic HNBL is an eyewear platform for everyone. The low-profile design and easy lens exchange allows you to seamlessly transition from on-duty to off-duty.

- Lightweight O Matter™ frame equipped with Unobtainium™ increases grip and Thin Stem Technology for over-ear protection compatibility
- Three-Point Fit precisely holds the lens in place for optical alignment
- HDO™ Optics with Plutonite™ lens technology provides optical clarity while blocking 100% of UVA and UVB
- Prizm™ lenses enhance color, contrast and detail for an optimized experience
- Advanced anti-fog coating with interchangeable lens options
- Meets or exceeds ANSI Z87.1 [high-mass and high-velocity], and MIL-PRF-32432A
- USA Made
- Select configurations approved for APEL/ SOEP
- Select configurations available for EN 166 certification

SI BALLISTIC M FRAME® ALPHA ECO-SYSTEM

Alpha is an eco-system composed of a frame, gasket and goggle utilizing a single lens working across all platforms. The frame optimizes the most crucial elements of performance with flush-mount surfaces that help prevent fog buildup. The Halo Gasket is a lightweight rubber component designed for rapid deployment in situations of sudden high wind or dust. The Halo Goggle is specifically engineered to optimize the two things that matter most: a comfortable fit and equipment compatibility. It comes with multiple strap options including a split strap, full strap and rail strap adapter. Halo is compatible with all helmet and O² mask systems.
