

A collection of videos that aren't mine. These are older videos featuring Russian beauties crushing everything in various ways. Since I probably won't be making any more videos of my own for the time being, here are a few from my private collection. A total of 5 different clips, all edited by me because the original cut was sometimes really annoying. Mostly edited in slow motion. No candid crush, and unfortunately, the quality isn't the best either, but the crush action is still worth watching!
