

AI Academy for Kids

Empowering the Next Generation of AI Creators | Grades 3-12

WHO WE ARE

AI Academy for Kids delivers fun, age-appropriate, and future-ready Artificial Intelligence education programs for students in grades 3-12. Our turnkey curriculum, live workshops, and after-school clubs make it easy for schools to integrate AI into their classrooms - no prior tech experience needed.

AI Enrichment Curriculum License

Best for: Schools seeking flexible, in-house delivery for enrichment blocks or STEAM labs.

License includes:

- *4-8 week age-appropriate curriculum
- *Slides, lesson plans, videos, assessments
- *AI Safety & Ethics unit
- *Certificates & badges
- *Parent permission forms & communications

Live Virtual AI Workshops

Best for: Assemblies, enrichment rotations, or special project days

Package Includes

- *45-60 minute virtual session via Zoom/Google Meet
- *Hands-on demonstrations
- *Question and Answer session
- *Replay recording
- *Parent resources

After-School AI Club

Best for: STEAM clubs, tech teams, or PTA-sponsored enrichment

Package Includes

- *6-8 week club series (live or pre-recorded)
- *Student journals, project challenges, final showcase
- *Club leader guide

Bonus: Teacher AI PD

Best for: Teachers, tech specialists, and curriculum teams

Package Includes

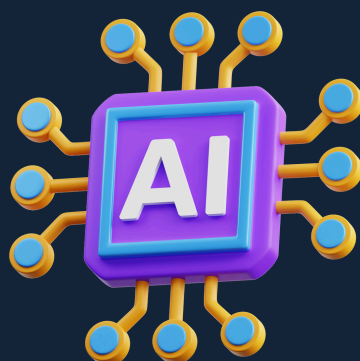

- *90-minute virtual training: "AI in the K-8 Classroom"
- *Hands-on tools
- *Real-world classroom examples
- *Guidance on safety, privacy, and COPPA

NEW!! AI Career Prep for Guidance Counselors & High School Teachers

Best for: Schools supporting students interested in tech, AI, or STEAM careers

Package Includes

- *3-part educator training series (virtual)
- *Curriculum guide: How to prepare students for AI-related jobs
- *AI industry overview: job trends, internships, certifications
- *Digital handouts for students exploring AI careers

*All Programs Include:

- *COPPA -compliant and age-appropriate content
- *Completion certificates + student badges
- *Parent-ready communications
- *Optional showcase templates
- *Full technical support

ETHICAL CONSIDERATIONS

AI raises important ethical considerations, particularly around issues such as bias and privacy. As AI becomes more prevalent in the workplace, it will be important for employers to ensure that AI technologies are developed and used in a way that is ethical and fair. This may require new regulations and policies to be put in place.

COLLABORATION BETWEEN HUMANS & AI

AI is not necessarily a replacement for human workers, but rather a tool that can be used to enhance human performance. In order to fully realize the potential of AI, it will be important for humans and AI technologies to work together collaboratively. This will require a shift in mindset and the development of new skills and knowledge.
