Professor Vinayak Patil

About the Trainer

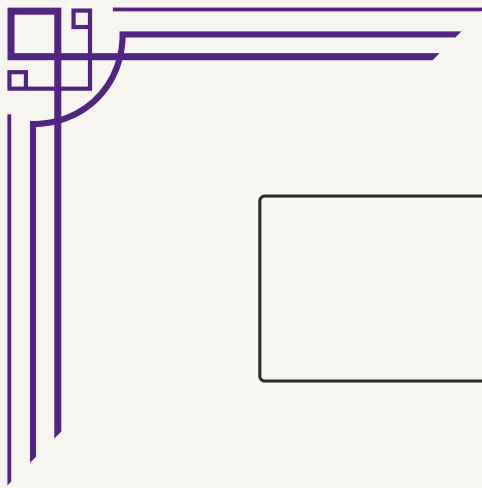

Mr. Vinayak Patil

“Transforming traders into professionals with knowledge, discipline, and mindset.”

Mr. Vinayak Patil is a professor and professional forex trader with over 5 years of market experience. Combining his academic background with practical trading expertise, he has successfully trained thousands of traders in mastering institutional strategies and building a winning approach to the markets.

His specialization includes Smart Money Concepts, Technical Analysis, Order Flow Analysis, and Risk Management. What started as a curiosity about global financial movements has evolved into a disciplined career, where he integrates data-driven analysis with real-world execution.

As an educator, he is known for making complex strategies simple, clear, and actionable, empowering learners to trade with confidence and consistency.

Course Overview

The Advanced Forex Trading – PV56 Program is designed for traders who want to move beyond basics and master the strategies used by institutions and professional traders. This course provides a complete framework, blending Smart Money Concepts (SMC), Institutional Dealing Models, Market Maker Method, Order Flow Analysis, and Risk Management into a step-by-step learning journey.

Through 25 intensive sessions, learners will:

- Understand how market structure, liquidity, and institutional order flow drive price movements.
- Master advanced tools such as Fair Value Gaps, Order Blocks, BOS/CHoCH, and Market Maker Models.
- Learn powerful candle patterns and session rules for precise entries and exits.
- Build discipline with trading psychology, mindset training, and risk management.
- Apply real-time strategies to trade confidently across sessions and news events.

This program not only sharpens technical skills but also instills the patience, discipline, and consistency required to succeed in the forex market. Whether you aim to trade full-time or build a strong side income, the PV56 course will give you the knowledge and practical edge to grow as a professional trader.

Course Content

Day	Topic

PV56 L2	L3 IDM BOS CHOCH WITH ADV LIQ & MOB
PV56 L3	RULES AND SYLLABUS WITH STL & STH
PV56 L4	IDM RULES & MAND M STRUCTURE WITH FIRST SWING SET UP
PV56 L5	DM BOS CHOCH WITH SWIP ENTRY MODULE
PV56 L6	SMC WITH ALL ENTRY MODUL WITH LIQ
PV56 L7	ERL & IRL WITH SIMPLE FEB AND ENG LIQ
PV56 L8	SMC WITH ADV.OB, PARR.OB, EQH LIQ , SWING LIQ ,
PV56 L9	CANDLE 1 PV56 MTCP PV56MTRP THREE CANDLE SWING
PV56 L10	CANDLE 2 IFC REJECTION DOJI INSTITUTION CANDLE
PV56 L11	PV56.BCP TRADE & SESSION RULES 1-5
PV56 L12	PV56.BCP TRADE & SESSION RULES 6-11

Day	Topic
PV56 L13	C-E-R-R
PV56 L14	PSYCHOLOGY
PV56 L15	TIME AND PRISE THEORY WITH 0.0897H4 /D1 PLAN ENTRY IN M30 OR H1
PV56 L16	CHAT GPT + TREND BESEDFEB +200 & 365 EMI
PV56 L17	HOW TO TRADE WITH NEWS
PV56 L18	MARKET MAKER BUY AND SELL MODUL WITH LIQ OF ROB, MOB, BB
PV56 L18	MARKET MAKER BUY AND SELL MODUL WITH LIQ OF ROB, MOB, BB
PV56 L19	DAY-WEEK-MONTH PROFILE WIH JUDASWING
PV56 L20	MARKET MAKER MANIPULATION TEMPLATE
PV56 L21	CANDLE PREDICTION
PV56 L2	STRONG ZONE MARKING WITH LIQ
PV56 L23 & 24	DAY 23 - 24 - 25 RIVISION + QUESTION

Advanced Forex Trading Course (PV56)

Module 1: Foundations & Core Rules

L1: Rules and Syllabus with STL & STH

- Introduction to course structure and trading rules
- Defining STL (Short-Term Low) & STH (Short-Term High)
- Role of market structure in identifying turning points
- Objective: Build a base understanding of market highs/lows and their application in trade setups

L2: STL & STH with Session FVG, VI & BPR

- Using STL & STH in different trading sessions (Asia, London, New York)
- Fair Value Gaps (FVG) and how to trade them
- Volume Imbalance (VI) as a liquidity clue
- Breaker Blocks (BPR) explained with practical session examples

Module 2: Institutional Market Structure

L3: IDM BOS & CHoCH with Advanced Liquidity & MOB

- Institutional Dealing Model (IDM) basics
- Break of Structure (BOS) vs. Change of Character (CHoCH)
- Advanced Liquidity concepts & Market Order Blocks (MOB)
- Objective: Recognize shifts in market control

L4: IDM Rules & Market Structure with First Swing Setup

- Step-by-step IDM rules
- Understanding Market-Maker Structure
- Identifying the first swing setup for higher-probability trades

L5: IDM BOS & CHoCH with SWIP Entry Module

- Deep dive into BOS & CHoCH application
- Smart Wick Injection Point (SWIP) entry technique
- Objective: Improve entry accuracy and reduce stop-loss risk

Module 3: Smart Money Concepts (SMC)

L6: SMC with All Entry Modules and Liquidity

SMC framework in detail

Entry confirmations (liquidity grab, order blocks, imbalance, mitigation)

Liquidity engineering by institutions

L7: ERL & IRL with Simple Fibonacci and Engineered Liquidity

External Range Liquidity (ERL) & Internal Range Liquidity (IRL)

Using Fibonacci retracements in SMC

Identifying engineered liquidity traps

L8: SMC with Advanced OBs & Liquidity Types

Advanced Order Blocks (OB), Parallel OB, and EQH (Equal High) Liquidity

Swing Liquidity and execution strategies

Objective: Master refined liquidity mapping

Module 4: Candle Studies

L9: Candle Patterns – Part 1

PV56 MTCP, MTRP, and Three Candle Swing patterns

How institutional candle formations predict continuation/reversal

L10: Candle Patterns – Part 2

Institutional Fake Candle (IFC), Rejection candles, Doji interpretation

Institutional Candles as market intent signals

Module 5: Trade & Session Rules

L11: PV56 BCP Trade & Session Rules (1–5)

Institutional session mapping (Asia, London, NY)

Rules 1–5 for intraday setups

L12: PV56 BCP Trade & Session Rules (6–11)

Extending session rules to include multi-session trades

Risk management across sessions

Module 3: Smart Money Concepts (SMC)

L6: SMC with All Entry Modules and Liquidity

SMC framework in detail

Entry confirmations (liquidity grab, order blocks, imbalance, mitigation)

Liquidity engineering by institutions

L7: ERL & IRL with Simple Fibonacci and Engineered Liquidity

External Range Liquidity (ERL) & Internal Range Liquidity (IRL)

Using Fibonacci retracements in SMC

Identifying engineered liquidity traps

L8: SMC with Advanced OBs & Liquidity Types

Advanced Order Blocks (OB), Parallel OB, and EQH (Equal High) Liquidity

Swing Liquidity and execution strategies

Objective: Master refined liquidity mapping

Module 4: Candle Studies

L9: Candle Patterns – Part 1

PV56 MTCP, MTRP, and Three Candle Swing patterns

How institutional candle formations predict continuation/reversal

L10: Candle Patterns – Part 2

Institutional Fake Candle (IFC), Rejection candles, Doji interpretation

Institutional Candles as market intent signals

Module 5: Trade & Session Rules

L11: PV56 BCP Trade & Session Rules (1–5)

Institutional session mapping (Asia, London, NY)

Rules 1–5 for intraday setups

L12: PV56 BCP Trade & Session Rules (6–11)

Extending session rules to include multi-session trades

Risk management across sessions

Module 6: Psychology & Theory

L13: C-E-R-R

Concept of Consistency, Execution, Risk & Reward

Building discipline through structured practice

L14: Trading Psychology

Handling emotions: fear, greed, and overtrading

Trader mindset development

L15: Time & Price Theory with 0.0897

Understanding time–price relationships

H4/D1 higher-timeframe planning with execution in M30/H1

Objective: Blend macro bias with intraday precision

Module 7: Advanced Tools & News

L16: AI & Trend-Based Trading

Using ChatGPT for trade journaling, idea validation, and strategy testing

Trend-based Fibonacci (200 & 365 EMA strategies)

Objective: Enhance trading efficiency with AI

L17: Trading with News

Interpreting economic calendars

Impact of high-impact news on liquidity grabs

Risk management during volatile events

**Please note that medium of instruction will
be Hindi for the course**

Module 8: Market Maker Method

L18: Market Maker Buy & Sell Module

Understanding Market Maker Buy Model & Sell Model

Liquidity grabs: ROB, MOB, BB

Objective: Learn to identify institutional traps

L19: Day–Week–Month Profile with Judas Swing

Profiling price behavior across multiple timeframes

Judas swing manipulation explained

L20: Market Maker Manipulation Template

Recognizing manipulation phases: accumulation, manipulation, distribution

How to trade them safely

Module 9: Prediction & Execution

L21: Candle Prediction Techniques

Anticipating candle closes using liquidity and OBs

Application in intraday entries

L22: Strong Zone Marking with Liquidity

Marking supply/demand + liquidity zones

Practical zone-to-zone execution

L23–25: Revision & Q&A

Full recap of PV56 concepts

Case studies and chart markups

Q&A and live doubt clearing

**Course gives you guarantee of support as
and when you require**

Language of communication is Hindi/Marathi
