YOUR ENERGY PROJECT OPTIMIZER

With the experiences from large power station projects, renewables, energy transition and innovations I support your individual energy solutions

CLIENTS

- 1 **ENERGY PROJECTS:** Owners, investors and banks for complex innovative energy projects in development, construction and operation
- 2 **ENERGY TRANSITION:** Governments, organizations, utilities, companies to develop an intelligent strategy for the future energy markets
- 3 **ENERGY DESIGN:** Owners (companies, hotels) who want to innovate their energy systems with a futuristic concept and design

WORKING TASKS

- 1 **ENERGY PROJECTS:** regular identification of innovative benefit to maximize economic output by introduction of new technology, measures for process optimization, interface and permit supervision, claim prevention, conflict mediation, coaching for senior project staff
- 2 **ENERGY TRANSITION:** Feedback from German Energy Transition ("Energiewende") to use positive experiences combined with new trends for a forward-looking overall concept. Mitigation of effects on utilities and energy consumers.
- 3 **ENERGY DESIGN:** Investigate individual energy concepts with new technologies & innovations. Create an added value on costs and ecological rating. Integrate new elements in the design as e-mobility, batteries, linking of technologies, digitalization, contract optimization.
