ENGINEERED BY: BSG Universal Laboratory UNIVERSAL AGRICULTURE

DIRECTIONS

FIELD CROPS: 4 lbs. / acre every 2 months GREENHOUSE VEGETABLES: 7 lbs./ acre every 2 months FRUIT TREES FLOOD IRRIGATION: 5.5 lbs./ acre every 3 months FRUIT TREES DRIP IRRIGATION: 4 lbs. / acre every 3 months OPEN FIELD VEGETABLES: 4 lbs./ acre every 2 months FOLIAGE APPLICATION: 1 lb./ 1.5 gallons of water SAMPLE USE: 1 ml. per 8 ounces water, 2 ounces per 100 ft2 **GUARANTEED ANALYSIS**

Soluble Potash (K20) 12% Derived from Potassium Oxide

Also contains non-plant food ingredient Humic Acid Derived from Leonardite NET CONTENT: 65%

55 lbs. (25 kg) 2 ounces (59.15 ml)

NO WARRANTY manufacturer nor sellers shall be liable for any direct or indirect damage resulting fr ions. The user assumes all risks in use or handling. Since weather, crop, soil and c ing the effectiveness of the product.

Note: It is very important that you pre-mix HumicK+ prior to application, especially if injecting or applying through a irrigation system. The suggested pre-mixing method is to add HumicK+ to water, while continuously agitating (add a small amount of HumicK+, while mixing). Mechanical agitation is the preferred method of mixing. Guidelines:Your use may vary

depending on the physical characteristics of the your soil and climate.

BSG Universal: SRTPLAN

What sets us apart?

Customer Service & Results

Increase yield and size while conserving water efficiently.

3 weeks one Application of Salt Fighter and Master Humic Potassium

The increased canopy growth in the SRT-treated field, highlighted in the red circles, will contribute to larger berry size at harvest.

SaltFighter works by keeping sodium and chlorine atoms neutral for a longer period, even after the water evaporates. This keeps sodium and chlorine from rejoining, preventing harmful salt buildup in the soil. Instead, SaltFighter proprietary technology keeps sodium and chloride in their neutral elemental states longer, allowing water to carry them farther away from the root zone.

By using Salt Fighter, you're not just treating the symptoms of salt buildup, you're stopping the problem at its source. With less salt in your soil, your crops can grow stronger, take in more water and nutrients, and produce higher yields. Healthier soil means better harvests and long-term success for your farm.
