

PNG Token: Revolutionizing Consumer Experience

PNG (Pangea) is the first consumption token designed to transform shopping into economic participation. Every purchase on Pangea platform converts a percentage into PNG tokens, automatically sent to user wallets.

This model empowers consumers by returning part of their spending while creating opportunities for innovative startups to test and commercialize products within the Pangea ecosystem.

Vision: Building Tomorrow's Circular Economy

Future City

Creating an experimental urban space for global startups to test innovations in real conditions.

Circular Economy

Building an intelligent, human-centered urban structure powered by blockchain technology and PNG tokens.

Innovation Hub

Welcoming large enterprises to showcase sustainable and technological innovations alongside startups.

Token Utility: More Than Digital Currency

Exclusive Access

Use tokens for discounts, services, and exclusive access to products and experiences.

Exchange Trading

Trade PNG tokens on partner exchanges with full liquidity and market access.

Ecosystem Participation

Engage as active member, user, or economic partner in the growing PNG ecosystem.

Sophisticated Purchase Mechanism

Each purchase triggers automatic PNG acquisition from partner exchanges, directly impacting token price through real buying pressure.

Bitcoin/Classic Token

Dotted curve shows evolution based purely on speculation through exchange trading.

PNG Token

Solid curve demonstrates evolution combining speculation with regular buying pressure from partner store purchases.

Sustained Growth Through Real Utility

The PNG model generates continuous upward pressure through regular, automatic store consumption, potentially supporting more stable and durable long-term growth compared to purely speculative tokens.

Based on similar tokens with explosive growth in their first years, projections show significant potential for sustained value appreciation. It is hoped that the price of the token could reach 1 dollar in the first year.

Tokenomics Overview

720.6M

Total Supply

PNG tokens on Layer 2 Ethereum
blockchain

L2

Blockchain

Built on Layer 2 Ethereum for
efficiency

Planned Mechanisms: Transaction fees and potential token burn
functionality to manage supply dynamics.

Initial Coin Offering Details

€0.05 per Token

Accessible entry price for early investors

22% of Supply

158.532M PNG allocated to ICO

€7.926M Target

Funding for development and partnerships

€36.03M FDV

Fully diluted valuation at ICO price

Vesting mechanisms will protect ecosystem integrity and encourage medium-term holding strategies.

Strategic Roadmap

1

Store Partnerships

Partner with existing retailers seeking differentiated sales impact and PNG treasury allocation.

2

Venture Capital

Develop partnerships with VCs to invest in startups featured on Pangea platform.

3

Brand Universe

Build brand ecosystem around mascot Jake with personal branding and narrative mini-series.

4

Smart City Development

Continue Pangea smart city concept as testing environment, attracting global tourism to developing nations.

Universal Accessibility

No Technical Prerequisites

Platform designed for mainstream adoption without crypto knowledge requirements.

- Automatic wallet generation
- Seamless token crediting
- User-friendly interface

Conclusion: The Future of Value Creation

Shared, Reusable, Concrete Value

PNG combines commerce, innovation, and real utility in a forward-thinking architecture. At the intersection of Web3, responsible consumption, and international collaboration, the project aims to build a new way of creating value.

Web3 Integration

Seamless blockchain technology adoption

Responsible Consumption

Sustainable economic participation model

Global Collaboration

International innovation ecosystem
