Our Founding President

Prof. Mehmet HABERAL, MD

Born on October 29, 1944 in Rize. Prof. Dr. Mehmet Haberal performed Turkey's first kidney transplant surgery, Turkey's first successful dead-donor liver transplant and the first pediatric live

dependent segmental liver transplant and the world's first adult segmental liver transplant. Haberal has performed 1,832 kidney and 344 liver transplant surgeries and organized more than 22 national and international scientific conferences. In addition to these tremendous achievements, Haberal is the only rector in Turkey who has published more than 1,400 scientific articles.

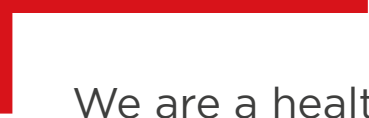

As a health group, we are trying to follow in the footsteps of our founder and continue the important work he started.

KONYA BAŞKENT HOSPITAL

Başkent University Konya Hospital was established in 2003 on an area of 22,000 square meters. It is the largest, well-organized and high tech equipped medical center of Konya region. The hospital offers quality medical care for tourists and inhabitants of Konya.

With its 205 bed capacity, 117 inpatient wards, 88 intensive care units and 778 administrative-health personnel, it occupies an important place among the most comprehensive hospitals in Central Anatolia.

We are a healthcare institution that aspires to be among the pioneers in the health sector through the scientific and high quality service approach that we pursue in all our fields of expertise, and aiming to follow the developments of best practices in international medicine as well as we contribute to it by conducting innovative studies.

Our hospital has modern laboratories which provide the clinicians with accurate and rapid diagnostic assistance, and which serve for research activities.

Konya Başkent University Hospital is the biggest and the best equipped medical center in the region. We, as Konya Başkent University Hospital, know the importance of providing service that is consistent with the quality conceptions of the era, so we carry out our quality policies within this framework.

Our experience in healthcare sector will give you confidence in high quality and affordable price.

**You can be sure that you're
in the right hands**

MISSION & VISIONS

We believe that all people have the right to access a high standard of healthcare, we will work together using the latest technology, evidence based practice and joint cooperation with international medical systems, to provide distinguished centers of healthcare, both within and outside the country.

**In this respect;
“Our mission is to
fulfil the requirements
of our patients and
their relatives at the
utmost level”**

Since its foundation, Başkent has placed a strong emphasis on medical quality and has become a constantly developing modern healthcare group, providing reliable, patient-oriented and high quality health care services using cutting-edge medical technology, whilst upholding patient and employee safety, respecting patients' rights and training qualified health care professionals who keep in step with scientific and technological innovation while remaining sensitive to social and environmental issues.

The network holds the following enduring values that guide us in carrying out our mission and define how things are done within our organization.

EXCELLENCE

Through quality, patient care and development of our resources.

ETHICS

Honesty, integrity, privacy and confidentiality.

PRINCIPLES

We respect and trust individuals.

TEAMWORK

We work collaboratively to achieve objectives.

ACCOUNTABILITY

Loyalty and commitment.

SAFETY

We are committed to maintain patient and environmental safety.

RESPONSIBILITY

Efficient operation and fiscal accountability.

PATIENT SATISFACTION

Our patients are our first priority!

Since we plan every patient's treatment individually, we devote our efforts to make sure that they receive the highest quality treatment at the earliest possible opportunity.

Our patients are never alone! Each and every one of our patients and their family member can relax, knowing that a personal medical associate accompanies them throughout the each step of their stay. The personal medical associate organizes even the most specific details, ensuring that the patient feels comfortable and as much at home as possible.

We fulfill the needs of patients and their relatives at the highest level

All our highly trained personnel, art medical devices, private rooms where comfort and functionality are prominent, our system which operates at worldwide quality standards and International Patient Department which is established to fulfil all the needs and expectations of our international patients, serve to attain the highest level of patient satisfaction.

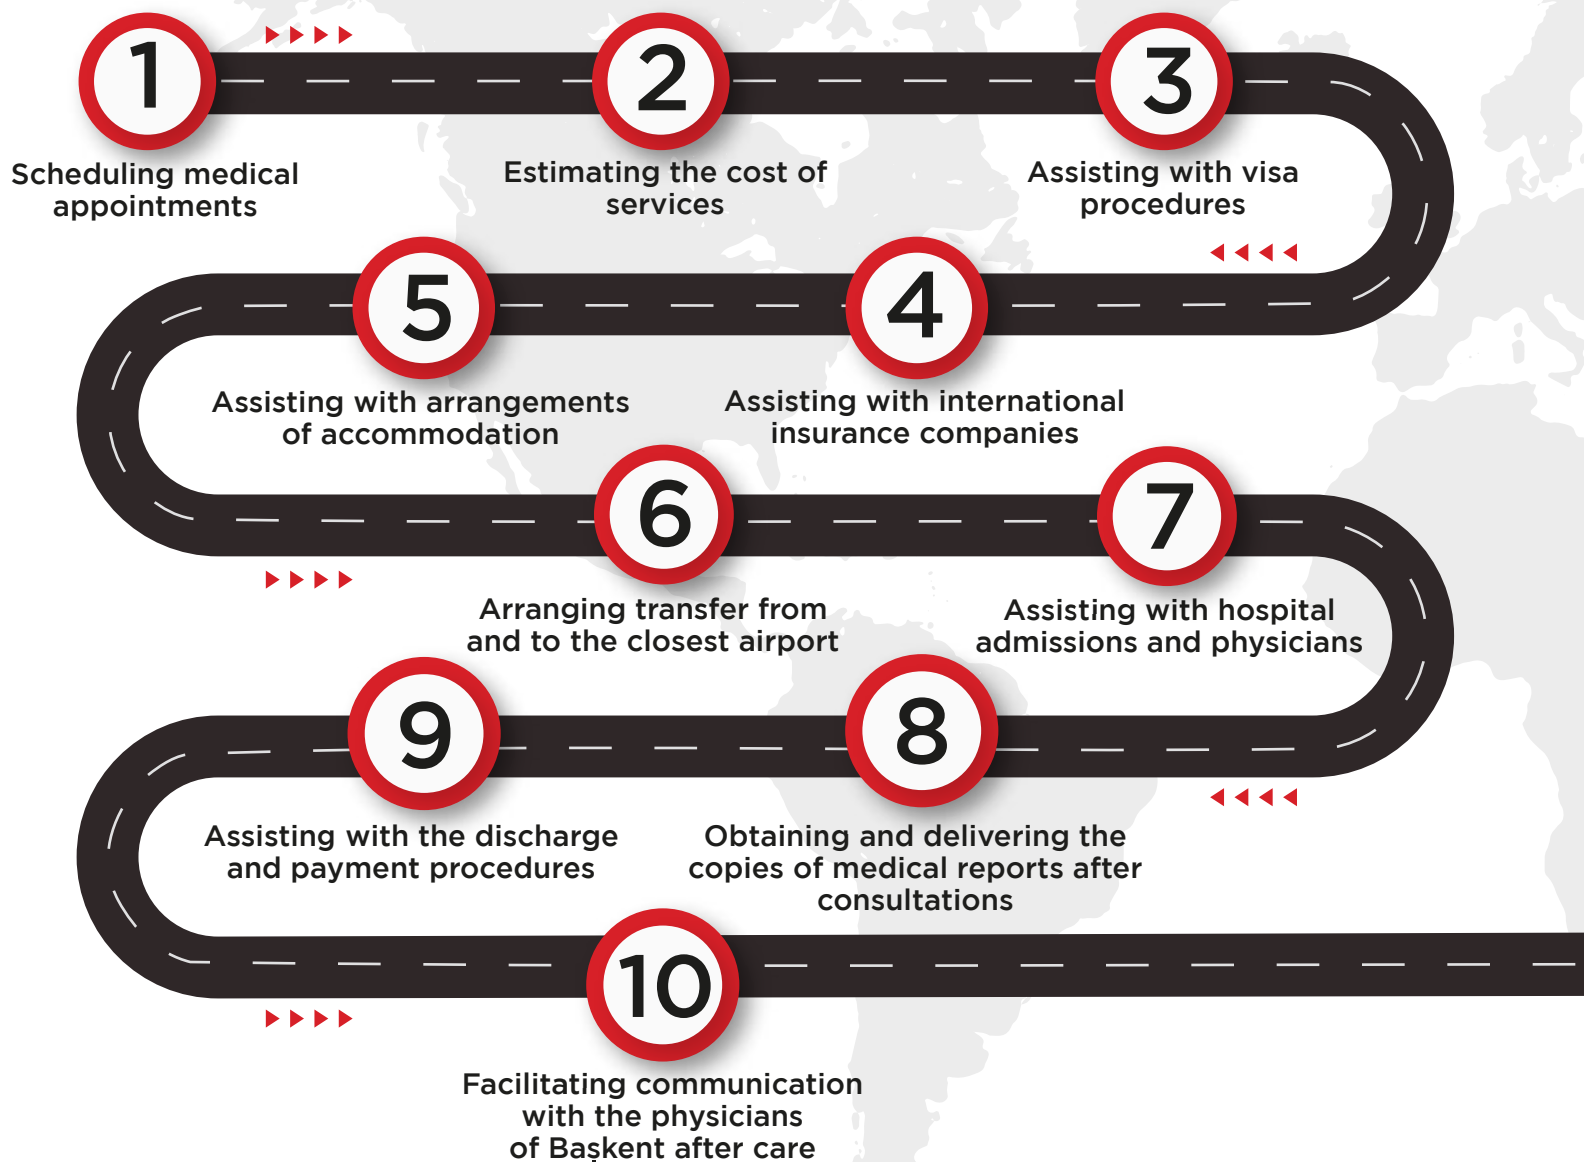

We are helping you to feel like at home by offering world-class medical treatment

Our team of specially trained international patient specialists provide the highest level of service in a compassionate, discreet and respectful environment. Your international patient specialist will serve as your personal guide to Başkent's world-class medicine. During your stay, your international patient specialist will seamlessly blend your medical needs, your individual preferences and your cultural, linguistic and religious expectations into a tailored experience that makes Başkent feel as close to home as possible.

Başkent University Konya Hospital is accredited with ISO 9001:2000 by Turkish Standards Institute (TSE) Quality Service in Healthcare, ISO is an international quality management standard focused on patient satisfaction. For international patients from the European Union, ISO 9001:2000 certification is a prerequisite.

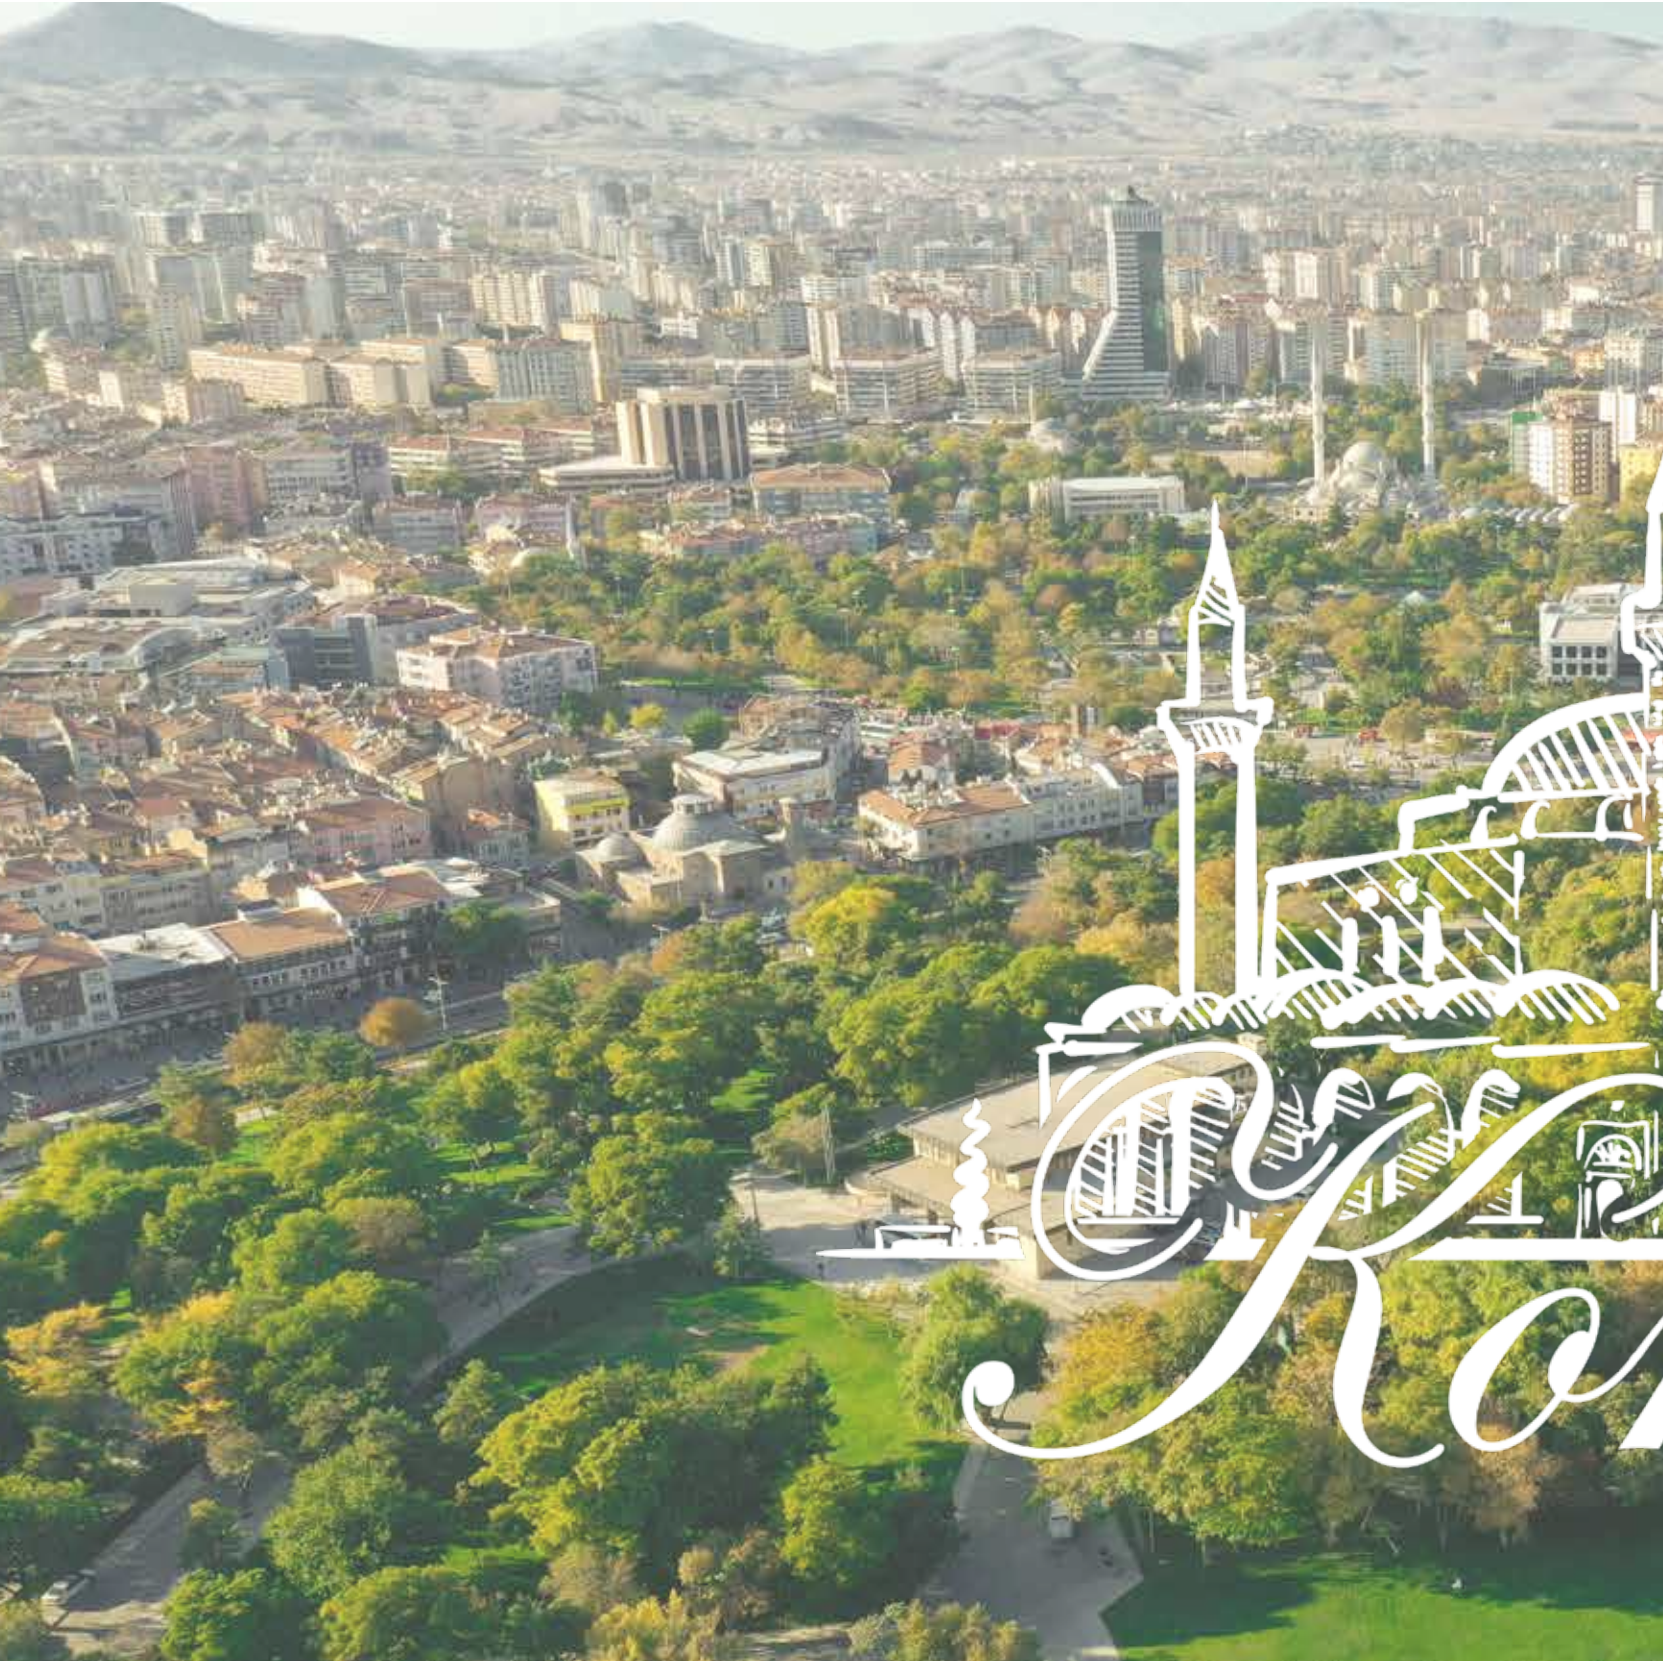

We can help you with the following services before, during and after your stay:

Our patients and families have the right to:

*The general right to receive the services,
The right to receive services with equity,
The right to get information,
The right to choose and change the facility,
The right to request information,
The right of confidentiality,
The right to provide consent and permission,
The right to accept or decline the planned therapy,
The right to be in a safe environment,
The right to fulfil the religious duties,
The right to get respect,
The right of comfort,
The right to be visited,
The right to have an accompanying person,
The right to appeal, submit complaints and prosecute,
The right to continuous services.*

YOU ARE NOT ALONE
ON THE ROAD

CITY OF HUMILITY

There is a saying that almost everyone in Turkey, and perhaps even people from different countries of the world, knows:

Travel the world, see Konya!

Konya, located in the Central Anatolia Region, is the largest city in the country with a large surface area and the seventh most populous city in terms of population.

The city, which was the capital of the Seljuk Turks between the 12th and 13th centuries, was home to Turkey's greatest cultural values. In addition, Mevlana Celaleddin-i Rumi and important names of Islam lived in Konya and continued their Sufi sciences here.

Konya, one of the most developed cities of Turkey, attracts many visitors from both domestic and foreign countries with its unique natural and historical riches as well as its magnificent cuisine. Konya is also easy to reach with its proximity to cities such as the capital Ankara, the summer tourism city of Antalya, and being on a flat plateau in the middle of the country.

TRANSPLANT CENTERS

Baskent University **Transplant Centers** offer leading-edge consultative services, treatment and surgical interventions to patients of all ages with a broad spectrum of diseases requiring heart, kidney, liver, bone marrow and cornea transplants with high success rate. Baskent University has one of the largest and most experienced transplant practices in Turkey, with campuses in Ankara, Konya, Adana and Istanbul.

CARDIOVASCULAR AND CORONARY HEARTH

Başkent University Cardiology Department provides high level clinic, academic and scientific services day by day since the day it is founded. Up to now, our department has provided retrieving health of thousands of patient, training of many young cardiologists and contributed to the development of medicine with the researches located in the prominent scientific publications. Başkent University Cardiology Department is one of the four institutions that receive the Institutional Specialty Training Program Qualification Certificate of the Turkish Society of Cardiology Qualification Board.

IVF CENTER

We Have Been Committed Building Families Since 1998...

Başkent University IVF Units offer state-of-the-art care in both female and male infertility. Being in an academic environment, latest developments and research is implemented into the modern, supportive, high quality and individualized care of infertile couples if the evidence shows any benefit.

Among our staff we have some of the most experienced infertility specialists in the county, reproductive endocrinologists, clinical nurses and technicians. Our reproductive endocrinology and infertility specialists with academic titles are famous for their prompt and accurate diagnosis, sincere and proper management of most complicated infertility cases. Our facilities are well equipped with a wide range of the latest diagnostic & therapeutic technology:

ORGAN TRANSPLANTATION

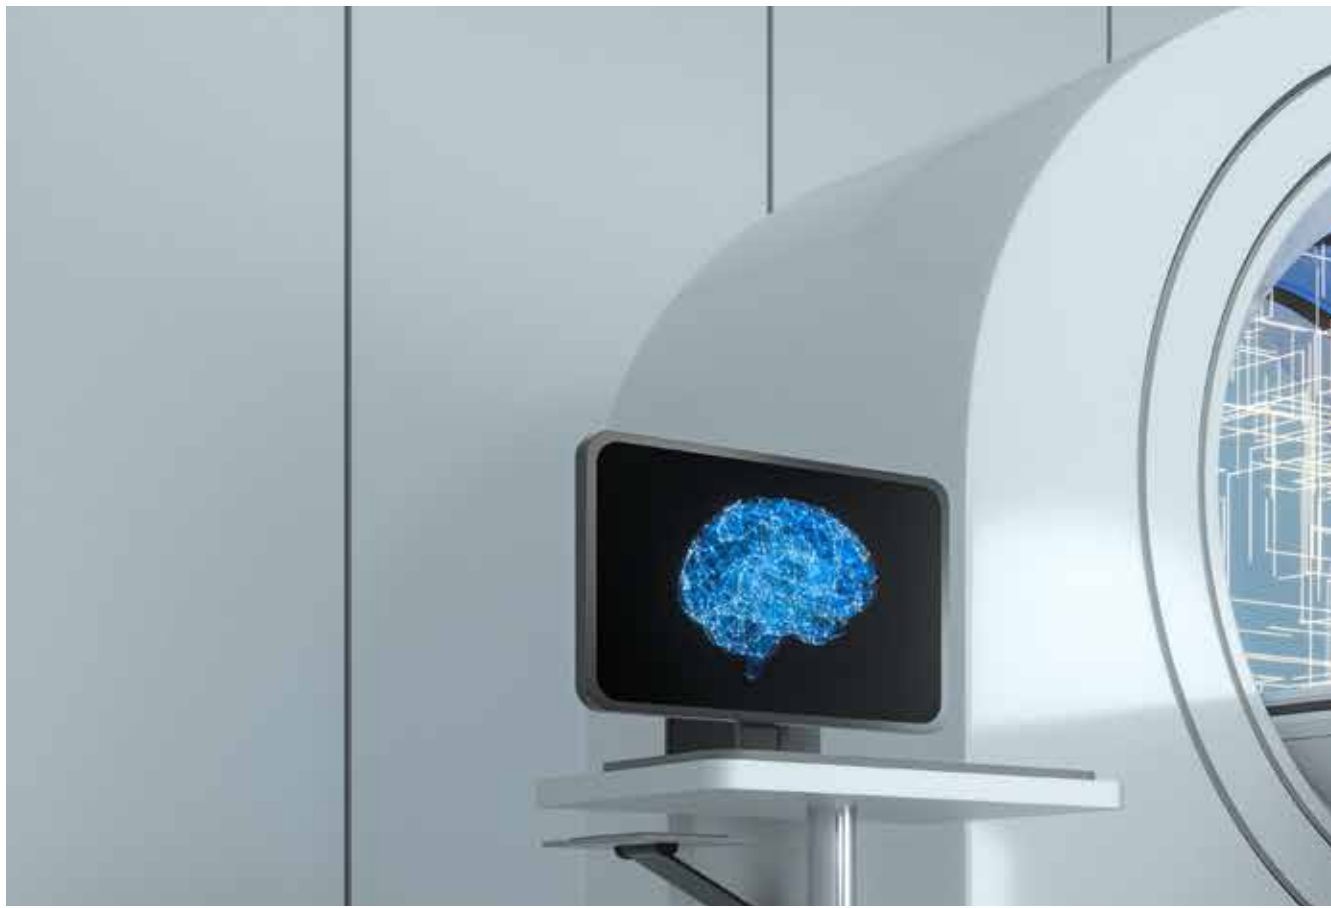

Baskent University Transplant Centers offer leading-edge consultative services, treatment and surgical interventions to patients of all ages with a broad spectrum of diseases requiring heart, kidney, liver, bone marrow and cornea transplants with high success rate. Baskent University has one of the largest and most experienced transplant practices in Turkey, with campuses in Ankara, Konya, Adana and İstanbul.

ORAL AND DENTAL HEALTH CARE CENTER

Diagnosis, routine tooth extraction and simple surgical applications are performed in our polyclinic. Broader surgical interventions such as; embedded tooth extractions, preparation surgery for dentures, implant, advanced implant surgeries, bone and gingival grafts (patch) are applied in our operating rooms. More complicated procedures under general anesthesia are performed in our hospitals such as tooth-jaw fractures, jaw joint surgeries surgical treatment of under or overdeveloped jaws are performed.

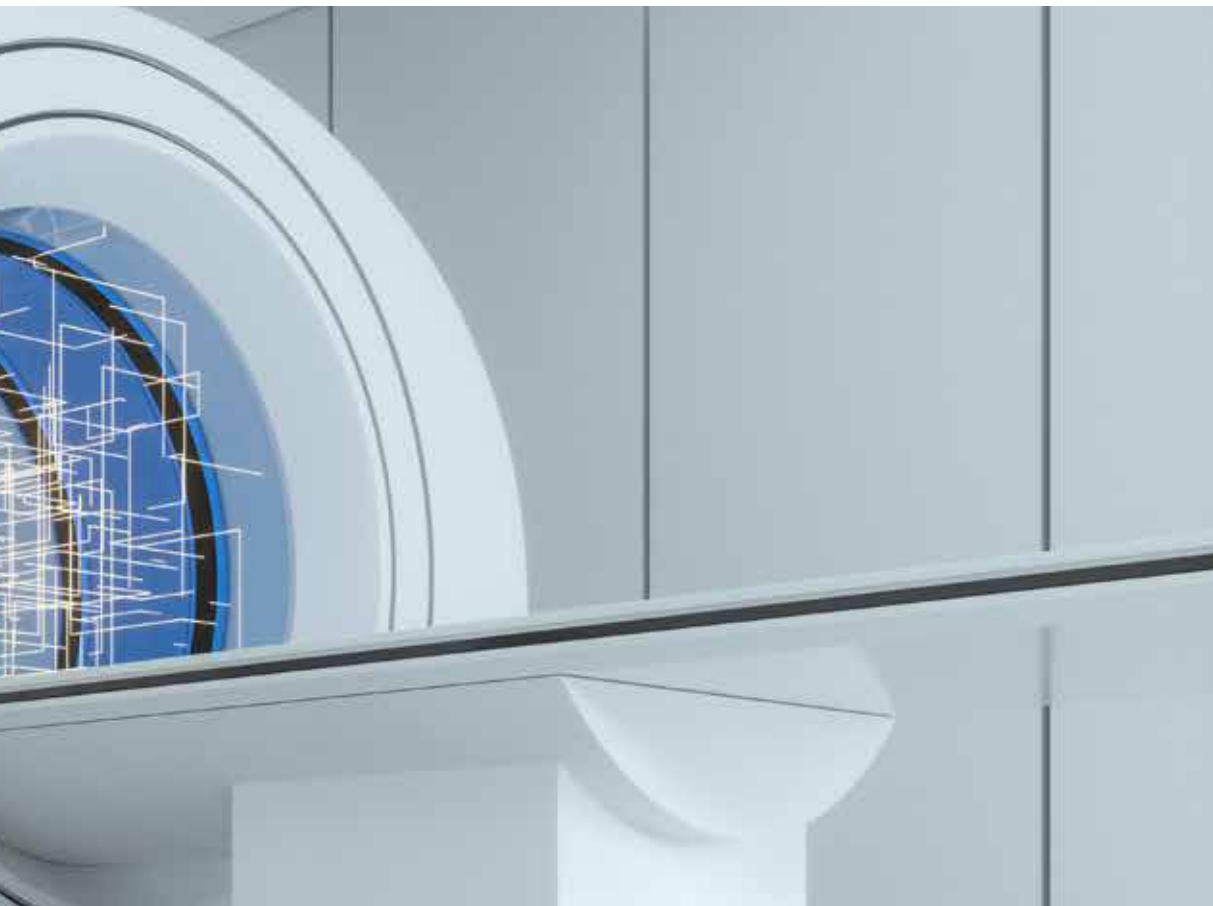

RESTORATIVE TOOTH TREATMENT AND ENDODONTICS

In the Department of Endodontic; treatment of the inflammatory pulp and periradicular diseases occurred by the adult caries, trauma and periodontal destruction are successfully carried out with the modern technique and equipments available in our department. Whitening process of the teeth that have changed color due to various causes is another subject that our Department is concerned. In Restorative Dental Treatment Clinic, various treatments are performed for the regaining of lost dental tissues of patients both functional and aesthetic respect;

MEDICAL DEVICES

Our technological equipment and knowledgeable staff will accompany you on your path of healing. Comprised of high-experienced professionals, this unit has an incredibly advanced diagnosis support by the use of images. This team also has high-level equipment that allows them to face a wide range of studies with a guaranteed level of quality and safety.

CONVENTIONAL RADIOLOGY

This unit encloses studies which need the use of X-rays. Afterwards, these images are visualized on high definition screens (digital radiology). Conventional radiology studies are the top technology for diagnose multiple diseases.

ULTRASOUND

Ultrasound is a harmless test which uses ultrasounds for studying internal organs.

Our professional team has wide experience in applying any kind of ultrasound.

MAMMOGRAPHY

Through the most advanced radiologic technology we provide this study for preventing and diagnose breast cancer. Our unit has an avant-garde mammography device which minimizes any possible inconveniences the patient may have:

- Diagnose mammography
- Stereotaxic biopsy
- Screening mammography
- Pre-surgical marking
- Additional screenings

DENSITOMETRY

It studies images by applying low-intensity X-rays, which allows us to analyze and measure bone mass when studying osteoporosis.

Such studies help us in preventing

• calcium loss and avoid undesirable broken bones (fractures). It also allows for studying muscular mass and body fat:

- Bone densitometry
- Muscular densitometry
- Body fat densitometry

GAMMA KNIFE

Gamma-knife radiosurgery is a type of radiation therapy used to treat tumors and other abnormalities in the brain. In gamma-knife radiosurgery, specialized equipment focuses as many as close to 20@ tiny beams of radiation on a tumor or other target.

PET CT

Imaging system measure markers which are being consumed by tumour and for many type of tumour it determines the size of the primary tumour more accurate than other imaging methods and also PET-CT indicates additional tumours foci which do not appear by other system.

COMPUTERIZED TOMOGRAPHY

ABOUT BAŞKENT HEALTHCARE GROUP

The practice of health, which had begun by The Transplantation and Burn Treatment Center Foundation of Turkey in 1982, has progressed into a comprehensive healthcare group...

1 UNIVERSITY
6 FOUNDATIONS
13 DIALYSIS CENTERS
10 UNIVERSITY HOSPITALS
2 PRIVATE HIGH SCHOOLS
5 OUTPATIENT CLINICS
2 HOTELS

Our Healthcare Group has more than 30 years experience in offering first-class medical services to patients from all over the world. Our medical treatment plans are uniquely tailored on a patient-to-patient basis, by combining the best-suited specialist physicians with the leading state-of-the-art facilities for the specific procedure indicated.

1.500 bed capacity and more than 8.500 employees, state-of-the-art medical equipment, significant contributions to research, and dynamic academic staff have made Başkent a highly dynamic and successful healthcare group.

Today, Başkent ranks among the largest and most medically advanced hospital groups in Turkey and also in Middle East. With its steadily increasing network, Başkent treats near 3 million patients annually, of which 100.000 are inpatient treatments.

In this respect, Başkent University is dedicated to carrying the Group's medical sector expertise to the training and education of future generations of health care professionals through its Faculty of Medicine, Faculty of Health Sciences, and Faculty of Dentistry. Education, training, research and health activities are carried out at the University's Bağlıca Campus and at its Practice and Research Centers and Hospitals in Ankara and five other provinces (Istanbul, Adana, İzmir, Konya and Alanya).

Furthermore, Başkent hospitals are distributed all over Turkey near top tourism places. The allocation of our hospitals is help on your pleasure aspects; while you are undergoing treatment in Başkent, you may enjoy our country as well.

The changing conditions within today's healthcare sector necessitate close cooperation between the Hospitals and Healthcare Centers. In this respect, the Healthcare Network at Başkent was established to ensure comprehensive, modern, patient-oriented and convenient healthcare.
