ABOUT

I'm a digital health pharmacist and product manager with a passion for improving patient safety and outcomes by bridging the divide between technology and healthcare. I have successfully designed, implemented and optimised digital health projects using my strong clinical, technical and analytics knowledge. I am always looking for new ways to use technology to improve healthcare delivery and the clinician experience.

EXPERIENCE

SENIOR PRODUCT OWNER - CLINICAL ANALYTICS

eHealth NSW | 2023 - PRESENT

- Lead the data analytics vision and strategy for the single digital patient record system to provide a single, holistic, statewide view of every patient – and for that information to be readily accessible to anyone involved in the patient's care
- Develop and manage the strategic product roadmap and backlog for a range of clinical analytic products
- Partner with the customer and key stakeholders to design, develop and continuously improve clinical analytic initiatives
- Provide leadership and subject matter expertise on health informatics and applied analytics to improve patient safety and clinician experience
- Coach and mentor colleagues to support them in understanding and achieving their career goals

ELECTRONIC TRANSFER OF CARE (ETOC) PRODUCT MANAGER/OWNER HEALTH INFORMATICS PHARMACIST

SPECIALIST PHARMACIST TEAM LEAD - DESIGN AND CONFIGURATION (ERIC)
eHealth NSW | 2016 - 2023

- Lead the product vision, solution design, product strategy and product team to successfully implement the electronic transfer of care (eTOC) solution across NSW hospitals, an ambitious digital integration product supporting NSW clinicians
- Collaborate and regularly engage with clinicians, executives, developers and other stakeholders using human-centred design and agile development methodologies to develop and successfully implement a minimum viable product

CLINICAL PHARMACIST & ANTIMICROBIAL STEWARDSHIP PHARMACIST
South Western Sydney Local Health District | 2010 - 2016

NOTABLE ACCOMPLISHMENTS

EHEALTH NSW AWARD FOR INNOVATION - THE eTOC PROJECT
