GUIDELINES ON SHOWING

Displays of Flowers, Fruit and/or Vegetables

The display can be composed of

- a single variety or
- more than one variety

Always make certain that all containers are clean. If you cover a table with a cloth, this must match the exhibit, not outshine it. Exhibits should be stable and balanced. Make certain that the exhibit remains within the size stated – any overhanging branches, or foliage etc. will disqualify the exhibit.

NB. All Soft Fruits to be shown with stalks and on a plate.

Dahlias

Exhibits are judged to the 'National Dahlia Society' rules.

Dahlias should not show the centre of the flower – for example

- Pompons, balls etc. should be perfectly round with the petals turning back under the flower to the stem.
- Decorative should be perfectly rounded & the flower head should face forwards - looking at you in the face.

Dahlias are measured by 'rings,' which can be obtained from the Dahlia Society.

These rings are placed over the top of the flowers to check its size – if the ring does not pass over the exhibit, it is too big. In this event the exhibit will not be judged and may be marked 'NAS' (Not According to Schedule).

Chrysanthemums

(Early Flowering) These fall into four categories

- **Incurved varieties** have all the petals turned inwards to the centre of the flower - always check that these petals are all turned upwards and inwards.
- **Intermediate** have either loosely or closely incurving petal formations.
- **Reflexed** are the opposite in that all the petals turn outwards and downwards.
- **Sprays** are a stem with multiple flowers.

Where a class asks for one cultivar (cultivated variety) - these flowers must always be the same. When choosing chrysanthemum cuttings, always check that the variety will be in flower at the time of year you wish to show it. Some varieties do not flower in August.

Gladioli

These spikes of flowers are asked for by size of floret, for example 100/200 size, 300/400 size and 500 size.

1st digit of code	Description	Width of bottom floret (inches)
1	Miniature	Less than 2½"
2	Small	2½ - 3½"
3	Medium	3½ - 4½"
4	Large	4½ - 5½"
5	Giant	Over 5½"

The gladiolus spike should have a minimum of 12 florets, one-third of which should be fully open, one-third partially open and one-third showing colour. The stem should be straight. Gladioli planted in May can give you flowers through July to the end of August. Planting earlier does not give you better flowers in August, they will just bloom earlier. To carry gladioli to a show, particularly if you have to travel any distance, tie the stem to a cane and lay the flower flat in the car, with all the florets facing upwards.

Roses

Most schedules ask for two types –

- Hybrid Tea (HT) are a single flower on a single stem (all secondary buds should be removed).
 - Cluster flowered (Floribunda) are single stem with a multiple of flowers.
- Miniature roses are shown in a small container, not necessarily in a vase. All roses can have the outside petals removed if they are discoloured or damaged, but this must be done carefully, to ensure the flower is still perfectly formed.

Pot Plants

Primarily, all pot plants should be shown in clean pots.

Always check the size of the pot asked for, earthenware pots are measured from the inside of the top of the pot. Make certain that there are no dead leaves, or flowers on your plant and remove any that are badly marked. Always water your plant well the day before the show. Place a saucer under the pot and fill with water after the plant has been staged.

Fuchsias

There are several types of fuchsias.

- **Single flowered** plants have flowers with four outer petals and four inner petals only.
 - **Double flowered** plants have four or more outer petals and more than four inner petals.
 - **Tryphilla** plants have bunches of elongated flowers and have dark foliage.
- Before showing, check for dead/marked flowers.

Cut Flowers

All Cut flowers should be on a straight stem, with no buds, or drooping petals. The stem must be capable of holding the head of the flower and the head must stand clear of the top of the vase.

Do not add additional foliage.

Preserves

All preserves etc. to be shown in clean, standard size glass jars (1lb or the metric equivalent). Jars and lids should have **no proprietary names**.

Jams, Jellies, Marmalades, and Curds should be filled to brim, to allow for shrinkage. All jars must be labelled, showing date of making and the contents.

Jams, Jellies or Curds – For the top of the jar use well-fitting wax disc and cellophane, **OR** a new twist top (in which case the wax disc/cellophane is not used).

Chutney/ Pickle – There should be ½ inch head space between the contents and the lid, and the jar must be topped with a vinegar proof new lid, i.e., a plastic lined twist lid. **The chutney should also be a minimum of 2 months old.**

Handicraft Classes

All items should be of the highest standard and should be presented to the best advantage. All items should be appropriate to the project asked for in the schedule. No item should have been exhibited in a previous Clevedon Show. All items should be clean, and knitting should **not** be washed prior to exhibiting.

Novice

These classes are for people who have not won a 1st prize in that particular class e.g., if you have won first prize with a dahlia exhibit in the Novice section (or the equivalent 'open' class), you must not enter this novice dahlia class again, but you can enter any other class.

The standard in novice classes is not expected to be as high as those in the open classes, so it's worthwhile trying to show in these classes for the first few times as a good way to learn. If you are unsure about your exhibit, ask for assistance, as most of the more experienced exhibitors are pleased to help. Always read the wording of the exhibit and remember not to add anything 'for good measure.'

Floral Craft

An important consideration when exhibiting in a horticultural show is the size restrictions, exceeding these will incur disqualification. The style and design is very much the choice of the exhibitor, but regard should be given to interpreting the title of the class, including suitable flowers and foliage to complement it. Components look best in scale to each other and to the overall size of the design. Special care should be taken when entering a 'foliage only' class, no flowers, or fruit should be included. All pin holders, supporting mechanics etc. need to be disguised, unless they form a distinctive part of the exhibit. Of prime importance is the quality of the flowers and foliage (this can include garden types), which should not be wilting or have insect damage.

Photographic Classes

The Judge is looking for an interesting picture as well as one that conforms to the class. E.g. if the class is for a photograph of a garden – a picture of a single flower will not qualify. Good composition and originality are important. Photographs of pets etc. should show the animal in the centre of the picture. Views etc. should be clear and the focal point should be obvious.

Sustainable alternatives to Floral Foam:

The Clevedon Show is keen to reduce the environmental impact of the Show and as part of this **we encourage all exhibitors NOT TO USE green or brown 'Oasis'** to stage your exhibits, where at all possible and instead use 'Fibre Floral/Agra Wool' or any other 'non-oasis' alternatives in all classes.

Environmentally Friendly alternatives can be found on various websites:

www.Flowermag.com/guide-to-floral-foam-alternatives/

Alternatives you can use: Chicken wire; Flower Frogs; Gravel/Rocks, Pebbles; Willow, Pliable Reeds; Wood Wool; Straw; Floral Clay, Moss (if sustainably sourced)
