

STEEL SOLUTIONS D'ACIER

ENGINEERED STORAGE SYSTEM SOLUTIONS, BUILT TO LAST

THE PROBLEMS WE SOLVE

⚠️ Loss Of Capacity Following Configuration Changes

Warehouse modifications often leave racking systems under-performing and non-compliant.

⚠️ Unoptimized Storage Efficiency

Inefficient layouts waste valuable floor space and reduce operational capacity.

⚠️ Lack of Certified Engineering Compliance

Non-compliant systems risk costly fines, insurance issues, and operational shutdowns.

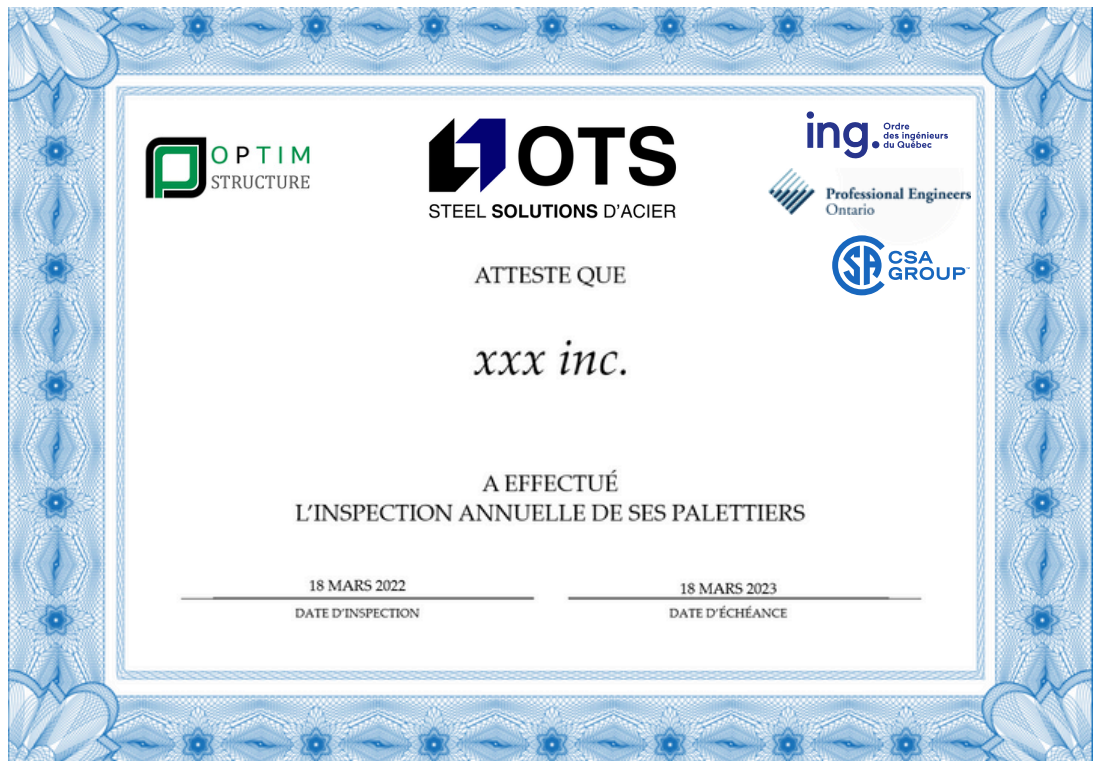

⚠️ High Long-Term Costs from Poor Planning

Inefficient designs lead to major operational deficiencies.

⚠️ New Warehouse

Complete Turnkey Solutions for New Facilities.

OUR SOLUTIONS

- Engineering Services

Certified inspections, capacity reports, foundation analysis, warehouse design, and full project management.

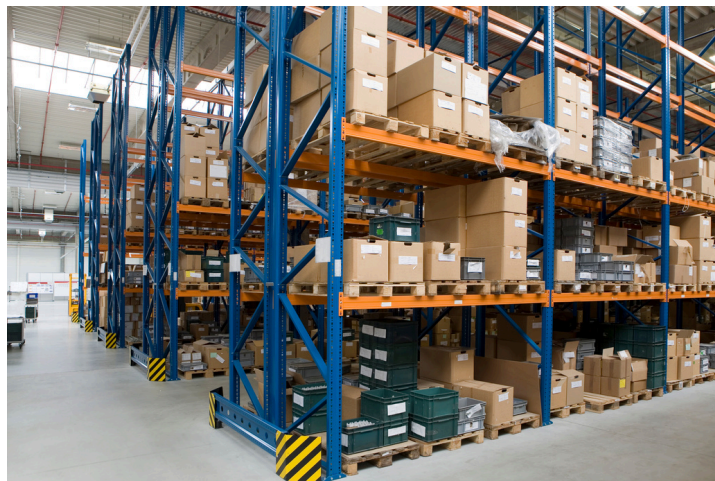

- Rack-Saver Technology™

Restore racking capacity with Canada's highest-ROI retrofit solution — engineered to be cost-effective, compliant, and eco-friendly.

- Repair Services

Certified structural repair services delivering fast, economical restoration of damaged systems, minimizing downtime.

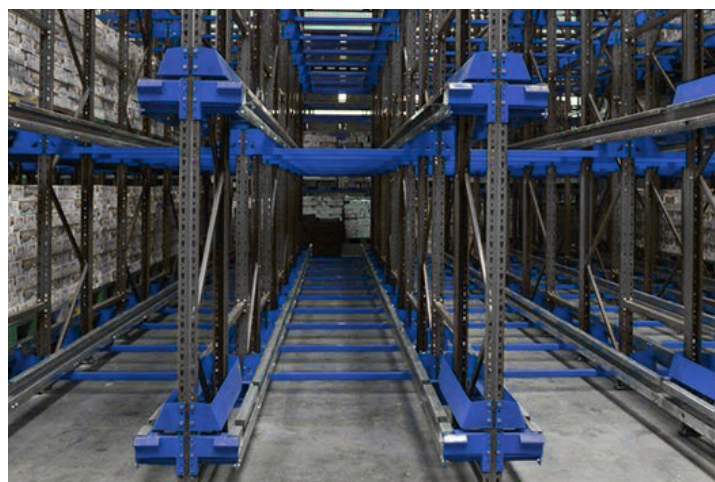

OUR PRODUCTS

Conventional Racking

Push-Back Racking

Drive-in Racking

OUR PRODUCTS

Pallet-Flow Racking

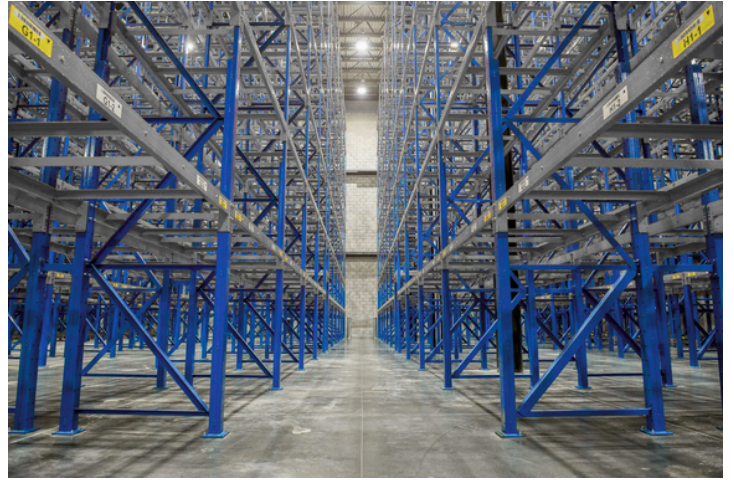

Carton-Flow Racking

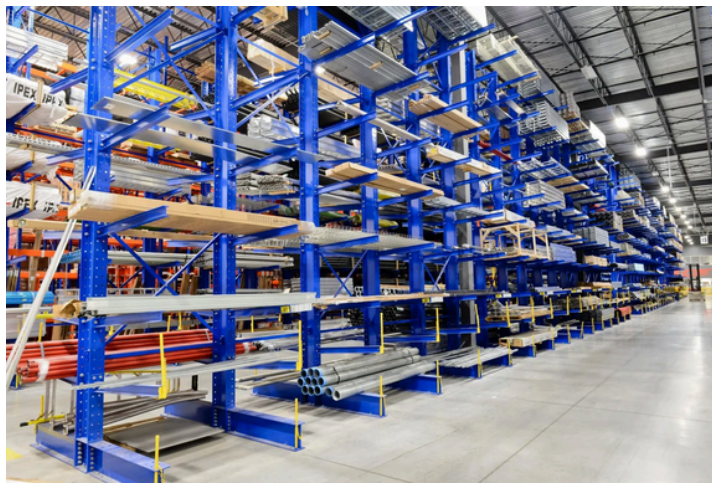

Shuttle Cart Racking

OUR PRODUCTS

Structural Racking

Cantilever

Knockdown (bolted) Racking

TAKE THE NEXT STEP

Warehousing is entering a new era. Growth alone is no longer enough — operational adaptability, regulatory compliance, and strategic infrastructure are now critical to success.

Organizations that modernize their storage and distribution systems today position themselves for long-term dominance in an increasingly competitive logistics landscape.
