Skyliner

Engineering the Extraordinary in Every Event

Introducing Skyliner by ES:ME - Revolutionising Event Spaces

Imagine an event solution that combines architectural elegance, unmatched flexibility, and ultimate durability—this is Skyliner by ES:ME. Designed to redefine mobile event structures, Skyliner's free-floating roof membranes offer a sleek and modern aesthetic, making it perfect for any occasion.

Key Features

Customizable Designs

Available in various diameters, heights (from 3.6 to 10 meters), and configurations to suit your location and vision.

All-Weather Performance

*TÜV-certified for stormproof and weatherproof capabilities, ensuring seamless events regardless of season or climate. Roof membranes offer a sleek and modern aesthetic look, making it perfect for any occasion

*Technical Inspection Association known as TÜV, is a group of independent organisations specializing in testing, certification, and inspection services. Globally recognised, ensuring that products, services, or processes meet the highest safety, quality, and regulatory standards.

Load-Bearing Excellence

Supports up to 1,000 kg point load and 40 kg/m line load, suitable for complex rigging, lighting, and AV setups.

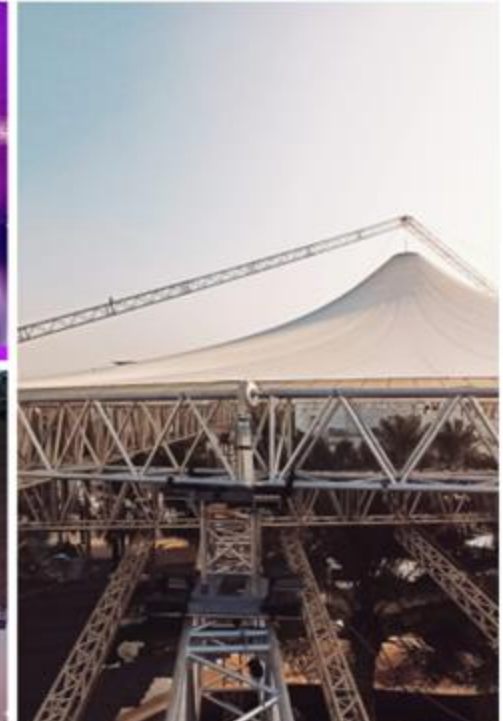

Large Footprint Options

With models offering up to 1,100 m² of covered space, Skyliner provides ample room for audiences, exhibits, weddings or VIP areas.

Why Skyliner

From concerts and corporate gatherings to exhibitions and sports events, Skyliner enhances event versatility, delivers operational peace of mind, and creates memorable experiences under a sophisticated and robust canopy.
