Category: difficulty breathing

Those who suffer from breathing difficulties are familiar with the phenomenon of preparing a pot with water and essential oils to open the airways and sinuses, a very dramatic

and uncomfortable event but greatly relieves headaches and opens the airways

market:

Portable inhaler

Very cold designs, choice of colors that fits the category in the hospital environment but the use is homely, That is why it is important to me to design a device for the patient that is convenient to use but also beautiful because the patient has to carry the device and sometimes it is unpleasant to take out an inhaler like a patient, and if the design obscures the function it will be more convenient and pleasant to use anywhere.

target audience & Observing the way of use

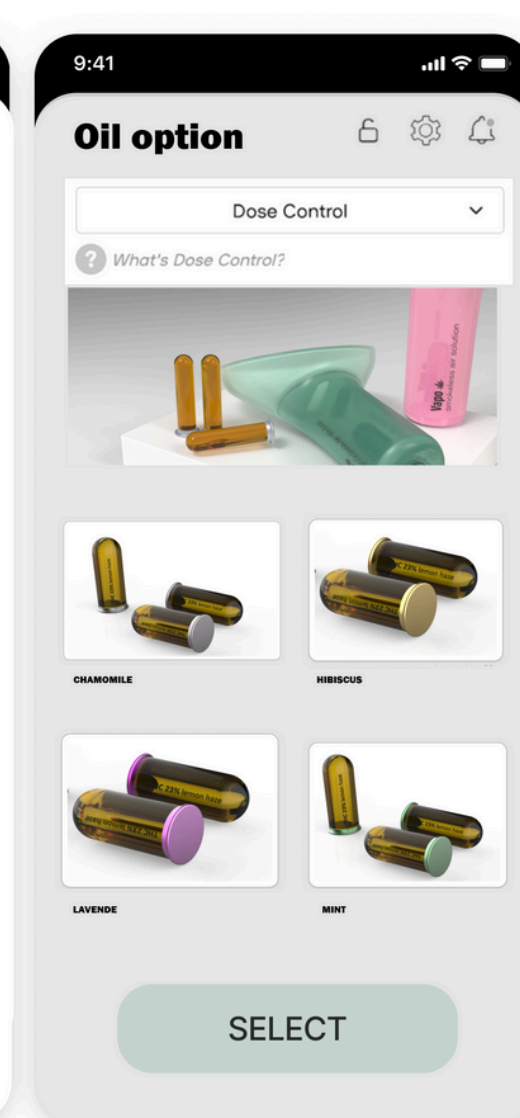

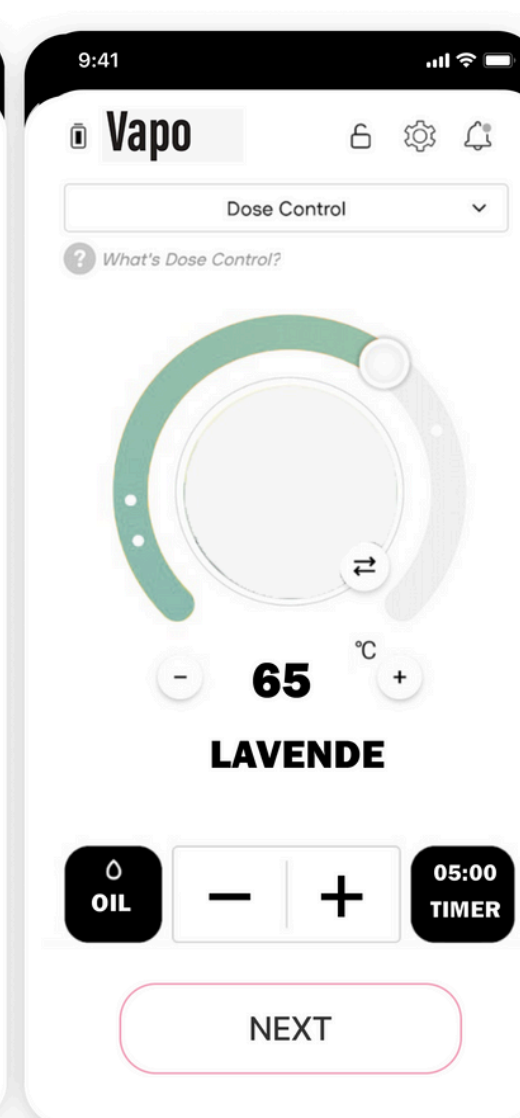

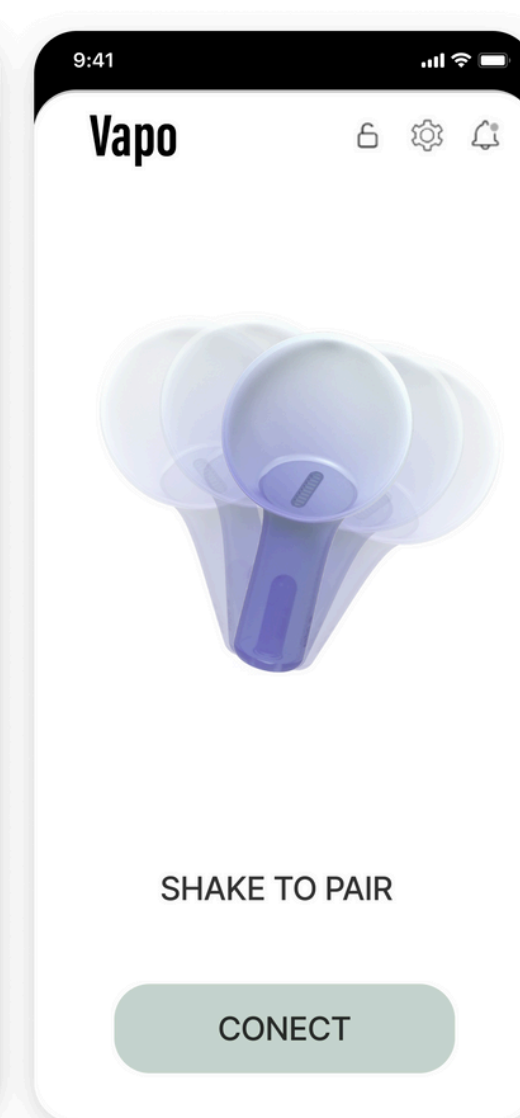

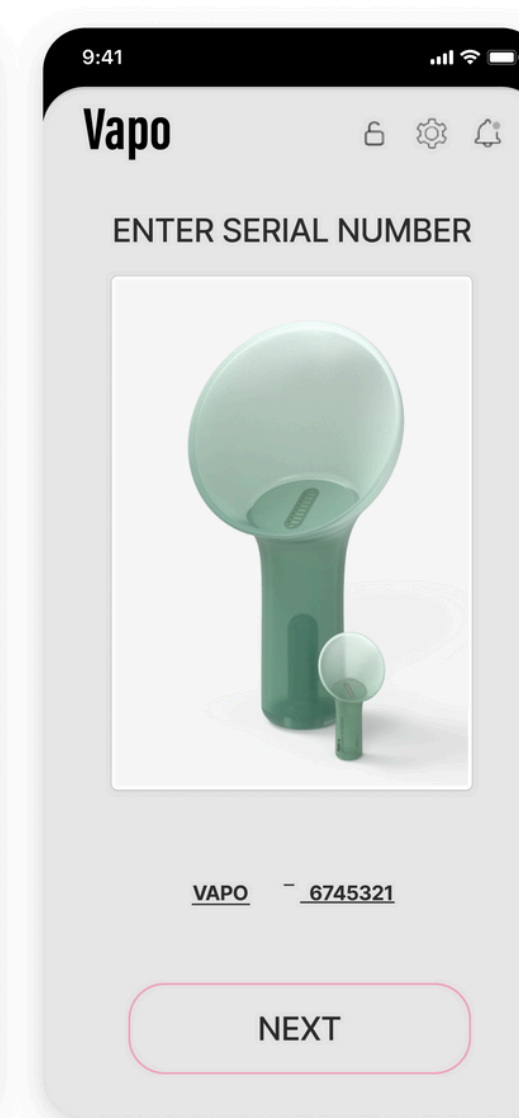

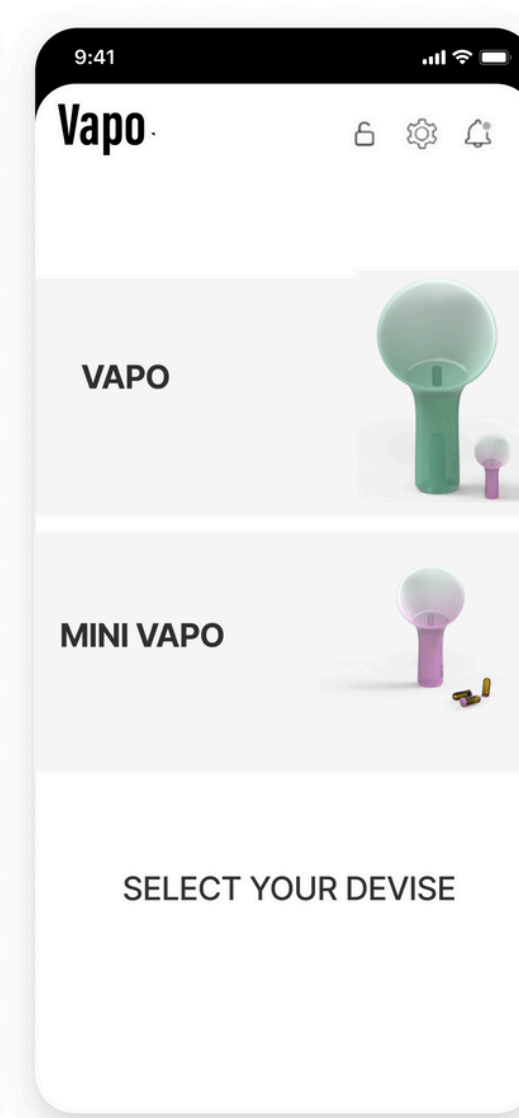

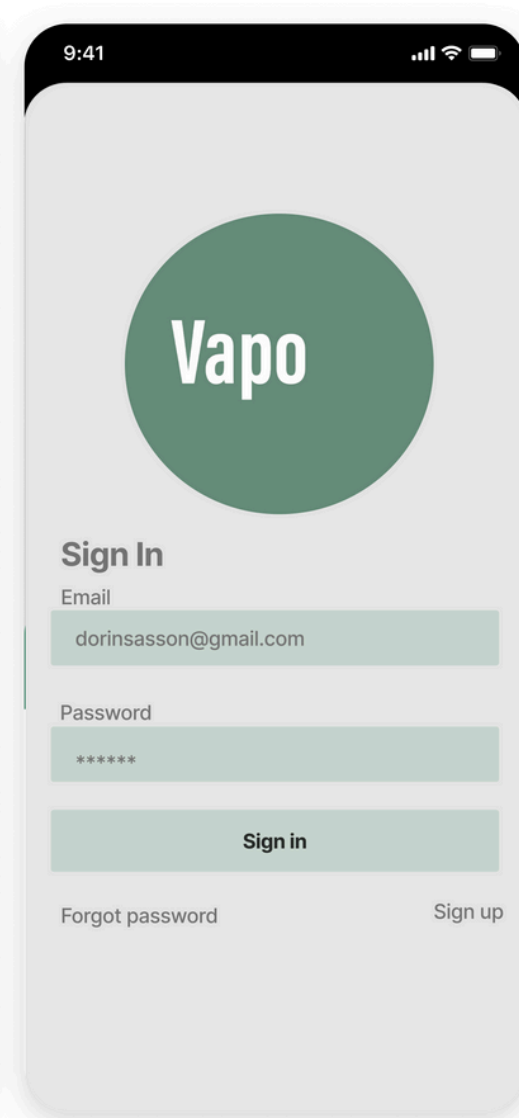

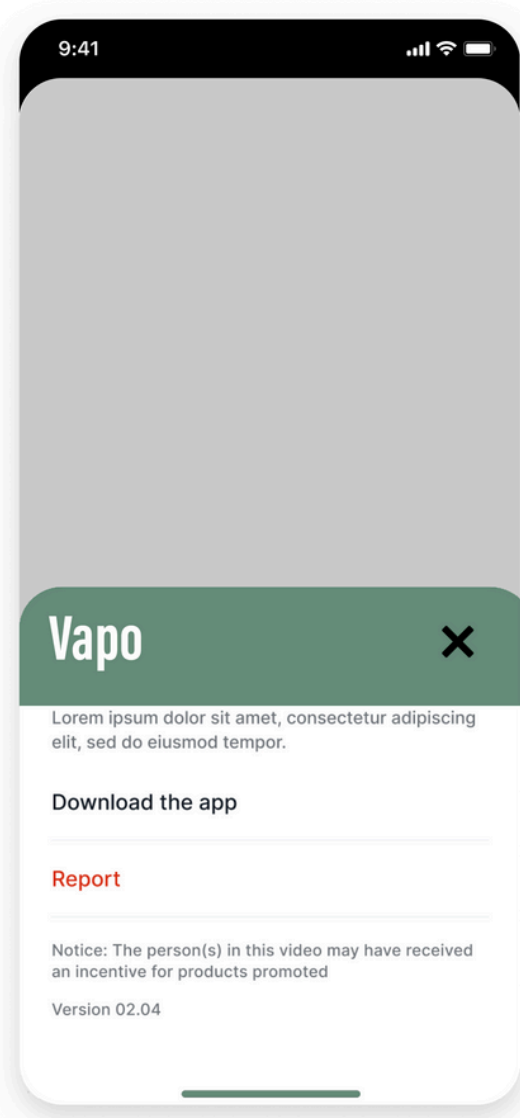

Adult mask

children's mask

way to hold

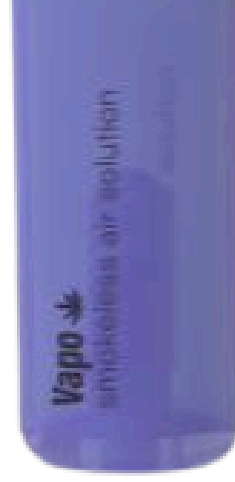

HOW IT GO

Choice of colors

Choosing **pleasant and relaxing pastel colors**, using a **gradient from opaque to reflective**, from bottom to top, **symbolizes the function of the device:** marking the way the steam escapes.

Ergonomic morphological choice,
comfortable shape to hold

Using color to describe how to use

Thanks.
