

Namrata Phirke

👋 I'm an experienced UX & Product Designer specialising in end-to-end user-centered solutions. Passionate about solving complex challenges, I'm excited to pursue a Senior Product Designer role to drive meaningful, scalable projects.

PROFESSIONAL EXPERIENCE

Wilcom International, Sydney, AU — *Product Designer*

Sep 2018 - PRESENT

- Led the end-to-end design and delivery of the team management feature for Wilcom products, enabling organisations to seamlessly purchase, assign, and manage software licences at scale while optimising enterprise workflows and billing.
- Designed WilcomWorkspace business apps, which grew from 0 to 1,000 paid subscribers in just a few months, creating a new revenue stream.
- Led UI/UX design for 7+ product launches and 50+ features & improvements, presenting design prototypes to stakeholders to align UX with business goals and user needs.
- Transitioned a 15+ member team from Adobe XD to Figma and established a design system that streamlined the design process.
- Increased user engagement by 50% on a key project through research, iterative prototyping and usability testing.
- Designed Hatch Academy using Thinkific, providing a structured learning platform for Hatch users, which became widely adopted.

Nemocare, Bangalore, India — *Senior Product Designer*

Nov 2017 - Jan 2018

- Designed user-centred products by translating insights from user observations into refined prototypes and product concepts.

Key Tech Inc, Baltimore, USA — *Industrial Design Intern*

Jun 2016 - Aug 2016

- Conducted design research for product development while collaborating on multiple client & internal projects in an agile environment.

Sara Sae Pvt. Ltd., Dehradun, India — *Product Designer*

Feb 2014 - May 2015

- Designed intuitive user interfaces for monitoring and managing off-grid oil and gas extraction machinery.
- Created comprehensive marketing materials and oversaw product development to ensure alignment with user & business needs.

Godrej & Boyce, Mumbai, India — *Product Design Intern*

Mar 2013 - Sep 2013 and May 2012 - Jun 2012

- Led the design of a new product that was patented in 6 months.
- Conceptualised and designed a working prototype, enhancing usability through iterative testing and technology evaluations.
