

Mallios Motorsports Parent Program Guide

Educational Framework & Development Model

Mission Alignment

Our program bridges financial barriers to motorsports by combining structured education, safety training, and youth development.

Program Structure

12-week curriculum aligned with race season. Weekly off-track education sessions reinforce safety, STEM learning, and character development.

Educational Outcomes

Students complete the program with foundational knowledge in safety, mechanical basics, racing theory, teamwork, applied math, and emotional regulation.

Safety Commitment

All drivers follow strict safety equipment standards and rulebook compliance. No competitive result outweighs safety.

Character Development

Students are taught accountability, emotional control, sportsmanship, perseverance, and respect for officials and competitors.

Parent Expectations

- Reinforce positive behavior at home.
- Arrive on time and prepared.
- Encourage effort over results.
- Support team-first mindset.

Assessment & Progress Tracking

Instructors evaluate comprehension weekly. Parents may request progress updates at any time.

Long-Term Vision

Our goal is to develop responsible drivers, future engineers, and community leaders — not just competitors.
