

FREE AI STARTER KIT

FOR EDUCATORS

Save Time, Reduce Stress, and Work Smarter with AI

Mai's Learning Fun House

Welcome to Your Free AI Starter Kit for Educators

Hello Educators,

Thank you so much for downloading the Free AI Starter Kit! I'm so glad you're here.

My name is Mai, and I'm an educator and parent with over 20 years of experience in early childhood education. I know firsthand how many roles you juggle every single day — lesson planner, communicator, problem solver, caregiver — and how overwhelming it can feel to keep up with everything.

That's exactly why I created this kit. I wanted to give educators like you a simple, practical way to start using AI as a supportive tool — one that helps you save time and reduce stress, without replacing your creativity or expertise.

Inside this guide, you'll find AI prompts, ideas, and strategies tailored specifically for educators. These tools are designed to help you with:

- Lesson planning
- Classroom activities
- Family communication
- Generating new ideas

You don't need any advanced tech skills to get started. I encourage you to take small, experimental steps and remember that AI should always complement your professional knowledge and your relationships with children.

I hope this kit brings you a little more ease, balance, and joy in your work.

Warmly,

Mai

Helping Educators Thrive with AI

What Is AI?

Artificial Intelligence (AI) is a tool that can help educators save time, generate ideas, and simplify everyday tasks.

Think of AI as a teaching assistant that helps you brainstorm, organize information, and create content more efficiently. It can support lesson planning, classroom activities, parent communication, and administrative tasks, allowing you to spend more time focusing on children and learning.

25 AI Prompts for Educators

1. Create a week-long lesson plan for [topic] for [age group]

2. Generate 5 hands-on activities for teaching [concept]

3. Write a parent newsletter about upcoming classroom events

4. Design a rubric for assessing [skill] in [grade level]

5. Create discussion questions for [book/topic]

6. Generate a list of brain breaks for young learners

7. Write an email to parents about [classroom update]

8. Create a behavior management strategy for [situation]

9. Design a morning routine checklist for students

10. Generate creative writing prompts for [age group]

11. Create differentiated activities for mixed-ability groups

12. Write learning objectives for a unit on [topic]

13. Generate ideas for a classroom reward system
14. Create a study guide summary for [subject/chapter]

15. Write transition activity scripts between lessons

16. Generate questions for a formative assessment on [topic]

17. Create a list of SEL conversation starters

18. Design a project-based learning outline for [theme]

19. Write feedback comments for student progress reports

20. Generate ideas for integrating technology in [subject]

21. Create a substitute teacher instruction sheet

22. Write a welcome letter for the start of the school year

23. Generate vocabulary activities for [word list]

24. Create a field trip planning checklist

25. Design an end-of-year reflection activity for students

5 Ways AI Saves Time

1

Lesson Planning

Generate full week plans, learning objectives, and differentiated activities in minutes.

2

Activity Creation

Produce hands-on activities, worksheets, and creative projects instantly.

3

Communication

Draft parent emails, newsletters, and progress updates effortlessly.

4

Documentation

Create rubrics, checklists, and assessment tools quickly.

5

Brainstorming

Get fresh ideas for classroom management, rewards, and engagement strategies.

AI Tips for Success

- * Be specific with your prompts - include subject, age group, and desired outcome.
- * Always review and personalize AI-generated content before using it.
- * Start simple and refine - you can always ask follow-up questions.
- * Save your best prompts in a document for quick reuse.
- * Use AI as a starting point, not a final product.

Ready to Reclaim Your Time?

Learn practical AI strategies that can help you save 5+ hours every week and spend more time teaching and less time on paperwork.

- ✓ Lesson Planning
- ✓ Parent Communication
- ✓ Classroom Activities
- ✓ Time-Saving Workflows
