Coremech

Projects Private Limited

Navi Mumbai

 AN ISO 9001:2015 CERTIFIED COMPANY

ABOUT OUR COMPANY

Who We Are

Coremech Projects Pvt. Ltd. is headquartered in **Navi Mumbai**, specializing in delivering end-to-end services across IT support, industrial and commercial CCTV surveillance, access control systems, network infrastructure, and document digitization.

With a strong focus on innovation and reliability, we design and implement high-performance technology solutions tailored to the unique demands of industrial and business environments. Our commitment goes beyond installation – we partner with our clients to ensure long-term security, operational efficiency, and seamless technological integration at every level of their organization.

WHAT WE STAND FOR

SECURITY FIRST

We design surveillance and access control systems that protect what matters most – your people, assets, and data.

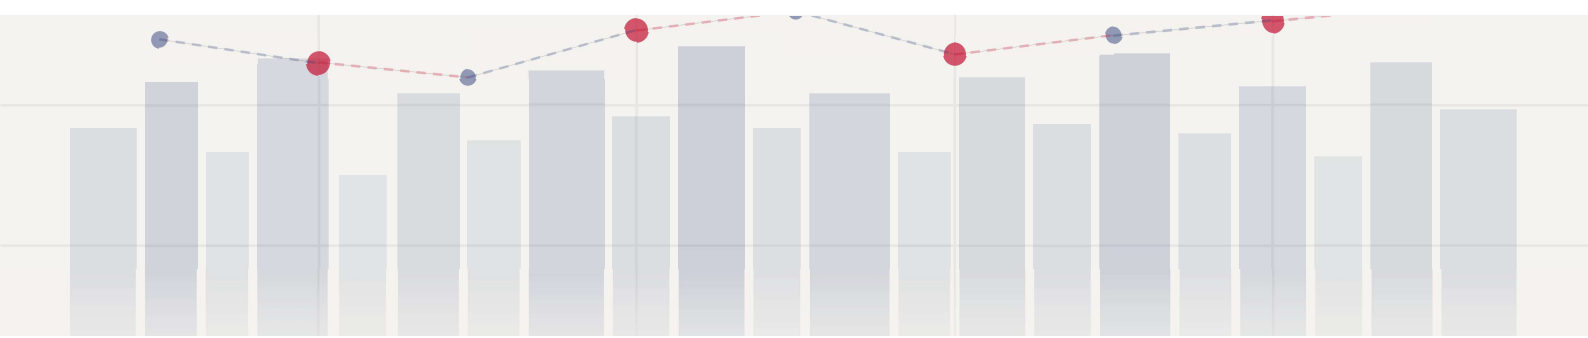

BUILT FOR PERFORMANCE

From network infrastructure to IT support, our solutions are engineered for reliability, speed, and scalability.

A SMARTER WAY TO WORK

We help organizations transition to paperless operations through intelligent document digitization and management systems.

OUR SERVICES

CCTV Surveillance Systems

CCTV SURVEILLANCE SYSTEMS

Intelligent Surveillance. Total Coverage.

Security isn't just about cameras – it's about visibility, intelligence, and control. At Coremech Projects, we design and deploy surveillance systems that don't just record, they protect.

We deliver **tailored video surveillance solutions** for industrial and commercial establishments of every scale – from single-site facilities to sprawling multi-location operations – ensuring no blind spot, no vulnerability, and no compromise.

SUPPLY, INSTALLATION & COMMISSIONING

We supply and install industry-leading video surveillance hardware – 4K/AI-enabled IP cameras, NVRs, and AI-enabled recording systems – sourced from trusted brands and configured for your specific environment. From layout planning to final commissioning, we handle it all.

IP-BASED VIDEO MONITORING WITH ADVANCED ANALYTICS

Our systems go beyond passive recording. With high-resolution IP cameras and intelligent analytics – including AI-powered motion detection, intrusion alerts, and behavioral analysis – your team gains enhanced situational awareness and faster threat response.

CLOUD-ENABLED REMOTE MONITORING & REAL-TIME ACCESS

Monitor your premises from anywhere, anytime. We set up cloud-enabled remote monitoring platforms that give authorized personnel real-time surveillance access across devices – ensuring seamless oversight whether on-site or off.

SCHEDULED MAINTENANCE & SYSTEM UPGRADES

A surveillance system is only as good as its upkeep. Our proactive maintenance programs and timely system upgrades ensure your infrastructure stays reliable, current, and performing at its best – year after year.

OUR SERVICES

IT Support Services

IT SUPPORT SERVICES

Your IT. Our Responsibility.

In today's fast-moving business landscape, your IT infrastructure is the backbone of everything you do. At Coremech Projects, we take full ownership of that backbone – so you never have to worry about it.

We provide **end-to-end IT infrastructure management** designed for the demanding environments of industrial and commercial enterprises. From data centres to edge devices – we ensure every layer of your IT ecosystem runs at peak performance, with minimal disruption and maximum uptime.

SUPPLY, INSTALLATION & COMMISSIONING

From sourcing to setup, we supply genuine, enterprise-grade workstations, servers, switches, and network devices – and handle complete installation and commissioning. One vendor. Zero coordination headaches.

PROACTIVE ENDPOINT & INFRASTRUCTURE SUPPORT

We don't wait for problems to find you. Our expert technicians deliver scheduled maintenance, real-time monitoring, and rapid troubleshooting – eliminating downtime before it impacts your business.

ANNUAL MAINTENANCE CONTRACTS (AMC)

Our customized AMC plans go beyond support – they cover your supplied equipment from day one, giving you a single, accountable partner for both procurement and long-term maintenance. Predictable costs. Priority service. No surprises.

MULTI-LOCATION IT SUPPORT

Managing IT across multiple sites doesn't have to be complicated. We serve businesses with geographically dispersed operations, providing centralized oversight and on-ground support – keeping your entire network secure, monitored, and future-ready.

SECTOR FOCUS

Integrated Solutions for Residential Complexes

ONE NETWORK. FOUR SYSTEMS. TOTAL INTEGRATION.

Large residential complexes demand security, connectivity, and operational intelligence that goes far beyond standard installations. At Coremech Projects, we engineer all four systems – surveillance, video intercom, access control, and Wi-Fi – to operate on a single, unified IP network infrastructure. This means centralized management, reduced cabling complexity, lower operational costs, and a seamlessly connected living environment – all delivered and maintained by one trusted partner.

SECURITY

CAMPUS-WIDE IP VIDEO SURVEILLANCE

Complete perimeter and interior surveillance coverage across the entire complex – lobbies, entry points, parking zones, corridors, and open areas – using 4K/AI-enabled IP cameras with centralized NVR recording and cloud-enabled remote monitoring capability.

COMMUNICATION

IP VIDEO DOOR PHONE & RESIDENT INTERCOM NETWORK

A centralized IP-based video door phone system where residents can see visitors at entry points, speak with them, and grant or deny access – all remotely. The same network also functions as a full intercom system, enabling direct communication between residents across units within the complex.

ACCESS MANAGEMENT

MULTI-TIER ACCESS CONTROL & PERIMETER SECURITY

Layered access management across all entry and exit points – main gates, lift lobbies, amenity zones, and restricted areas – using biometric readers, RFID access cards, and barrier systems, fully integrated with the surveillance and intercom network for unified perimeter control.

CONNECTIVITY

MANAGED WI-FI INFRASTRUCTURE FOR AMENITY ZONES

High-density, enterprise-grade wireless network coverage across all shared spaces – Fitness Centre, Recreation Zones, Business Lounge, and poolside areas – ensuring residents enjoy fast, reliable, and secure connectivity throughout every corner of the complex.
