

Product Operation Instruction

PLEASE KEEP THIS GUIDE

This guide contains important information about your lock.

1. Safety and Precautions:

1. Read all instructions in their entirety to ensure that you have a complete understanding of the lock's features, installation requirements, and operation procedures.
2. We highly recommend seeking the assistance of a professional installer to ensure proper installation.
3. Before installation, please ensure that the deadbolt are selected correctly according to the door opening direction. Failure to do so may result in improper function or damage to the lock.
4. Familiarize yourself with all warning and caution statements provided in this manual, as they are designed to protect you and others from harm or injury.
5. It is important to remind all family members of the safety precautions associated with using the lock, including keeping access to the back panel restricted and regularly checking the lock's settings to ensure they have not been altered without your knowledge.
6. To prevent unauthorized access, it is recommended to protect your user codes and master code.
7. Dispose of used batteries in accordance with local laws and regulations to avoid environmental hazards.

CAUTION:

1. Keep the lock away from children to prevent any accidents.
2. Do not use any cleaning agents that contain corrosive chemicals to clean the lock. Use a soft cloth and mild detergent instead.
3. Do not attempt to disassemble or modify the lock in any way. Contact the manufacturer for any repairs or maintenance.
4. In case of emergency, use a backup mechanical key to unlock.

NOTE: Different doors have different requirements of length on certain accessories, please check whether they match before starting the installation.

2. Pre-installation Tools & Packing List

You will need:

1. Phillips screwdriver (You can use either a manual or electric screwdriver, but avoid using a power drill.)
2. Measuring Tape
3. Pencil
4. Level

Packing List

S/N	Content	Quantity
1	Front Panel	1
2	Rear Panel	1
3	Cylinder with 2 keys	1
4	User Manual	1
5	Installation Accessories Package	1
6	Drilling Template	1

3. Product Diagram:

4. Product Specification:

User Capacity	3 Administrator + 47 Normal User
Fingerprint Capacity	Up to 49 Users
Power Supply	4pcs AA Alkaline Batteries
Low Voltage Alarm	4.8V
Standby Current	<70uA
Dynamic Power Consumption	<200mA
Operating Environment	-4°F(-20°C) ~ 122°F(50°C)

5. Installation:

1 Installation Overview

2 Door Preparation

Drilling Holes

- To drill the necessary holes, use the drilling template to mark the appropriate location on the door.
- Proceed to drill the holes at the marked positions.

NOTE: Skip this step if your door come with pre-drilled holes

Deadbolt Adjustment

1. Hold the faceplate and the tail of deadbolt together.
2. Rotate the faceplate clockwise.
3. Pull the extension part all the way out.
4. Rotate the cylinder counter clockwise so that the marking aligns with the 2-3/4 inch position indicator.

CAUTION: Do not try the deadbolt length more than 2-3/4"(70mm).

Deadbolt Installation

1. Push in the deadbolt into the door.
2. Make sure the arrow sign points upward.
3. Use two points screws(J) to fasten it.

CAUTION: Deadbolt latch must be retracted during installation.

1. Use two points screws to fasten the strike plate and box on the another side.

3 Fasten the Mounting Post(L)

1. Fasten the mounting post(L) into the holes of mounting plate(C).

NOTE: Make sure the mounting posts go from the rubber mat side of mounting plate.

4 Place the Front Lock Panel(A)

1. Place the front lock panel onto the door, ensuring that the tailpiece and wire go through the door.

CAUTION: The tailpiece going through the deadbolt in the VERTICAL POSITION!

5 Place the Mounting Plate(C)

1. Place the mounting plate onto the door.
2. Ensure the wire goes through the corresponding hole on the mounting plate.
3. Use connection assembly screws(H) to fasten it with the connection studs.

CAUTION: Make sure the front panel and mounting plate is vertically located before tighten the screws.

NOTE:

- If your door thickness is 1.38in(35mm) to 1.77in(45mm) door thickness, you should use 0.98in(25mm) shorter screws.
- If your door thickness is 1.77in(45mm) to 2.17in(55mm) door thickness, you should use 1.38in/35mm longer screws.

6

Wiring

1. Connect the wire carefully.

6

Install the Rear Panel(B)

1. Position the knob to vertical status.
2. Ensure the tailpiece goes into the knob hole.

Password
Random Number

4. The low-battery alarm will be automatically played while the voltage is lower than 4.8V.
5. Please make sure your mechanical keys are hidden out of the house for emergency use. We are not responsible for any damages under that situation.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warnings:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Notes:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- (1) Reorient or relocate the receiving antenna.
- (2) Increase the separation the equipment and receiver.
- (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- (4) Consult the dealer or an experienced radio/TV technician for help.

7. Warranty:

- We provide 30 days worry-free money back and one year limited warranty.
