

# Safeguarding

(I do not have access to your MSF/MTR via the lifelong learning platform. To speed up approval of the HALO please send me a copy via email at the time of the HALO request).

## Stage 1 (CT1, CT2, CT3)

E-LFH - safeguarding levels 1 & 2

SGA module 1 - introduction to safeguarding adults Level 1

SGA module 2 - safeguarding adults Level 2

Please attach certificates.

SLE x 1 - involving a patient with consent issues - adult or child.

Mention LTHT protocols in your reflection - eg. mental capacity assessment on PPM, involvement of safeguarding team if appropriate etc.

## Stage 2 (ST4, ST5)

"application of safeguarding principles".

E-LFH - safeguarding children levels 1, 2.

Please attach certificates.

SLE x 1 - involving intraoperative management of a patient lacking capacity - for this it can be from either a list with learning difficulty patients (for example the community dental list (Beevers day unit, SJUH), or a paed's list where there are safeguarding issues, or any patient on any list where there are consent/capacity issues. Again mention awareness of local protocols.

## Stage 3 (ST6, ST7)

"evaluation of safeguarding".

Adult e-learning if not already done in Stage 1.

**Either:** 1 SLE of a best-interest-meeting (BIM) **or** 2 SLEs if no BIM (involving management of vulnerable patients, identifying safeguarding concerns, managing needs in complex situations).

BIMs - please contact me if doing stage 3 and want to attend. I will give you some dates when I know them. They are online and usually last an hour. No need to contribute, just listen in but worth looking up the patient on PPM beforehand.
