UI/UX Designer specializing in mobile app design, with a strong foundation in user flows, wireframes, prototyping, and high-fidelity UI using Figma. Experienced in designing clean, user-friendly interfaces for real projects and collaborating closely with developers. A Flutter background supports practical, implementable designs and smooth design-to-development handoff.

PROJECTS

Makfoul App – Flutter & Dart (UI/UX + Development)

A mobile app connecting housewives with newly arrived maids for training and skill-sharing in Saudi Arabia.

- Contributed to UI/UX design by creating user flows and interface layouts to simplify navigation and onboarding.
- Worked on Flutter development by implementing core user interfaces aligned with design specifications.

Jojo Bakery App – UI/UX Design

A mobile app for a local bakery to showcase and deliver products.

- Designed the complete user experience from concept to high-fidelity UI screens.
- Built clear user flows and wireframes to ensure a smooth ordering experience.

Guardian App – Edujeel (UI/UX + Flutter Contribution)

A parent-focused app for tracking children's academic progress and rewards.

- Designed key UI/UX flows for dashboards and child profiles to improve clarity and usability.
- Created reusable UI components in Figma and contributed to implementing core screens in Flutter.

EXPERIENCE

UI/UX Design Bootcamp Trainee | Nummakn — 2024

Designed mobile and web interfaces using Figma; created user flows, wireframes, and interactive prototypes, and presented design decisions.

Flutter Bootcamp Trainee | Tuwaiq Academy — Apr 2025 – Jul 2025

Built Flutter UI for mobile apps; integrated Supabase and OneSignal; collaborated within a team-based development environment.
