every structure we design, we aim to build responsibly — creating lasting value for people and the planet. Guided by our vision, Innovista continues to craft solutions that balance performance, beauty, and sustainability

INTRODUCTION

Innovista Metal Fabriconix (Pvt) Ltd. is a professionally managed organisation dedicated to delivering comprehensive aluminium fabrication solutions to the commercial, industrial, and construction sectors. Established with a vision to set benchmarks in quality, reliability, and collaboration, we combine technical expertise with disciplined project management to meet the highest standards of workmanship and client satisfaction.

Our operations are powered by a team of seasoned craftsmen and engineering professionals with over two decades of industry experience, enabling us to take on complex site environments and demanding project requirements with assured professionalism. We maintain a strong commitment to safety, efficiency, and continuous improvement, positioning ourselves as a preferred partner for architects, engineers, and principal contractors across Sri Lanka.

Through an unwavering focus on quality, technology, and teamwork, Innovista Metal Fabriconix (Pvt) Ltd. strives to provide innovative solutions and seamless execution for every client, ensuring that every project is delivered on time, within budget, and to the expected standards of excellence.

— ABOUT US

“

We operate as a specialist subcontractor in aluminium fabrication, installation, and renovation services, providing end-to-end solutions across material purchasing, fabrication, installation, and skilled labor supply. Our scope includes shopfronts, windows, doors, partitions, glazing, and façades, delivering compliant, timely, and durable outcomes aligned to project specifications, safety protocols, and budget objectives.

”

OUR STORY

Our journey began as NP Contractors, driven by a simple yet powerful vision — to deliver quality craftsmanship with integrity and precision. Over five years, our dedication to excellence, innovation, and customer satisfaction helped us grow into a trusted name in the industry. Evolving into Innovista Metal Fabricconix (Pvt) Ltd, we've expanded our expertise in aluminum, glass, and steel fabrication, providing modern, durable, and aesthetically refined solutions. Every project we undertake reflects our passion for perfection and our commitment to shaping lasting spaces. Today, Innovista stands as a symbol of growth, trust, and forward-thinking design.

OUR VISION

To become a leading force in metal, glass, and structural innovation — redefining modern spaces with creativity, precision, and sustainability. We aim to inspire progress through craftsmanship, technology, and trust, building a future where design and durability unite to shape enduring architectural excellence.

OUR MISSION

At Innovista Metal Fabriconix Pvt Ltd, our mission is to design, fabricate, and deliver high-quality aluminum, glass, and steel solutions that blend innovation, durability, and aesthetic excellence.

We strive to exceed client expectations through precision engineering, advanced technology, and a commitment to continuous improvement.

Our focus is to build long-term relationships based on trust, transparency, and professionalism — empowering industries, businesses, and communities through reliable craftsmanship.

By nurturing talent, embracing sustainable practices, and upholding the highest standards of safety and quality, we aim to create lasting value in every project we undertake.

“
**Vision that Leads.
Quality that Lasts.**

”

Our journey forward is guided by innovation and excellence. Each creation we deliver reflects our ambition to elevate the industry standard — uniting design, strength, and integrity in every detail.

Choose us for registered compliance, precision craftsmanship, engineer-ready execution, and safety-verified delivery, powered by skilled teams, lean modular methods, and fast mobilization; from office partitions to full interior and structural works, expect tailored design-to-install ownership, reconfigurable systems, and responsive aftercare that protect timelines, budgets, and long-term value on every project.

WHY CHOOSE US?

Legal, Reliable & Precision craftsmanship

A registered, fully compliant Sri Lankan aluminium and interior fabrication partner delivering precision workmanship, reliable timelines, and long-term value across commercial, industrial, and institutional projects.

Registered and fully compliant company serving diverse sectors with aluminium, steel, and interior solutions.

Engineer-ready execution

Skilled, supervised craftsmen deliver precision finishes, dependable timelines, and durable results even in complex site conditions.

Engineering-ready execution aligned to drawings, BOQs, and consultant specifications with strong site coordination.

Quality and safety built-in

Quality and safety embedded at every stage with documented inspections, HSE compliance, PPE usage, and verified handovers.

Fast mobilization and flexible on-site or off-site fabrication using lean, modular methods without compromising quality.

Fast and flexible delivery

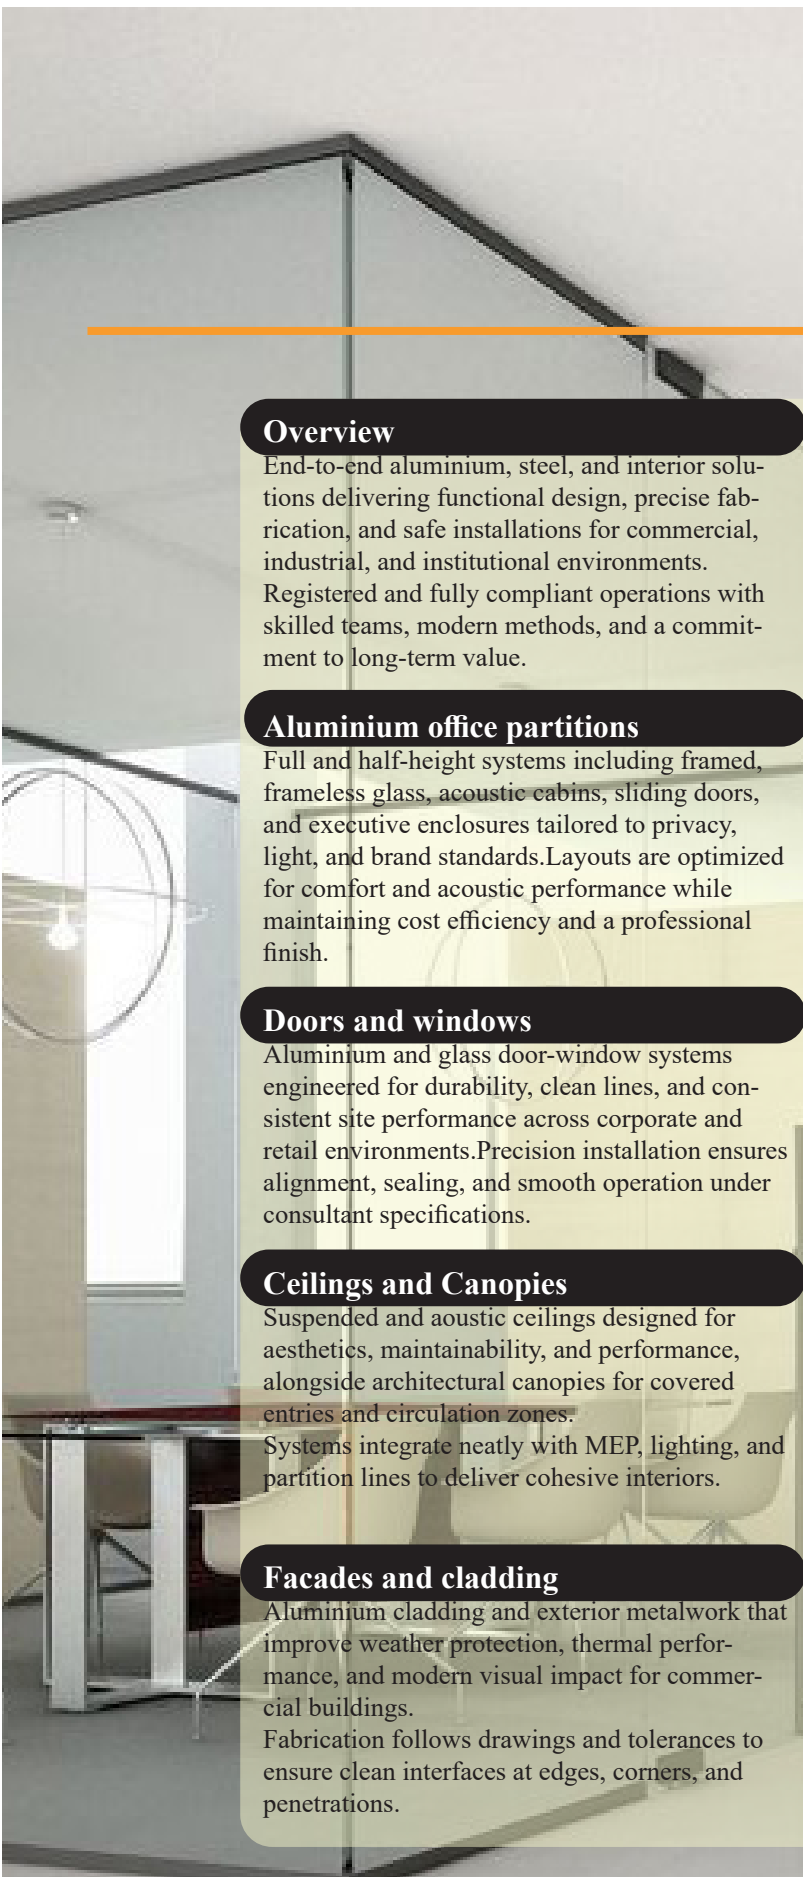

Office partition specialists in full/half height, glass, acoustic, framed cabins, and sliding systems tailored to brand and workflow.

Design-to-install ownership with 3D visualization support and furniture/layout alignment for efficient, professional spaces.

Modular, reusable, supported

Cost-effective delivery through direct sourcing, in-house fabrication, and disciplined project management that controls overheads.

Modular and reusable systems with dismantling, relocation, and re installation services to reduce future fit-out costs. After-sales support for maintenance, repairs, replacements, and phased expansions as your operations evolve.

OUR SERVICES

Overview

End-to-end aluminium, steel, and interior solutions delivering functional design, precise fabrication, and safe installations for commercial, industrial, and institutional environments.

Registered and fully compliant operations with skilled teams, modern methods, and a commitment to long-term value.

Aluminium office partitions

Full and half-height systems including framed, frameless glass, acoustic cabins, sliding doors, and executive enclosures tailored to privacy, light, and brand standards. Layouts are optimized for comfort and acoustic performance while maintaining cost efficiency and a professional finish.

Doors and windows

Aluminium and glass door-window systems engineered for durability, clean lines, and consistent site performance across corporate and retail environments. Precision installation ensures alignment, sealing, and smooth operation under consultant specifications.

Ceilings and Canopies

Suspended and acoustic ceilings designed for aesthetics, maintainability, and performance, alongside architectural canopies for covered entries and circulation zones.

Systems integrate neatly with MEP, lighting, and partition lines to deliver cohesive interiors.

Facades and cladding

Aluminium cladding and exterior metalwork that improve weather protection, thermal performance, and modern visual impact for commercial buildings.

Fabrication follows drawings and tolerances to ensure clean interfaces at edges, corners, and penetrations.

Structural steel and custom metalwork

Frames, supports, brackets, and bespoke architectural elements fabricated to drawings for reliable strength and long-term durability.

Shop-floor quality control and supervised site fitting keep tolerances tight and assemblies stable.

Industrial renovations and layouts

Workflow-oriented redesigns that improve movement, lighting, and space utilization using high-quality materials and precise technical standards.

Execution plans minimize downtime and disruption while enhancing safety and comfort for operations.

Shop drawings and coordination

Execution aligned to consultant drawings, BOQs, and specifications with disciplined site coordination and documentation.

Technical reviews, RFIs, and approvals are managed to de-risk program and quality outcomes.

Fabrication and installation

Controlled fabrication—cutting, fitting, sealing, and finishing—led by supervised teams to meet timeline and visual benchmarks. Stage-wise inspections verify alignment, level, fixings, and sealants before handover.

Quality and safety management

A formal QA and Safety Policy governs pre-work reviews, material verification, workmanship control, PPE, and daily toolbox talks. Handover follows verified inspections so delivered systems are safe, compliant, and performance-ready.

Maintenance and aftercare

Repairs, replacements, and performance checks sustain finish quality and extend lifecycle value over time. Reconfiguration, dismantling, and relocation services reduce future fit-out and move costs for evolving teams and spaces.

PEOPLE WHO BUILD IT

**MANAGING
DIRECTOR**

N.S.SENARATHNA

“Every space deserves precision, integrity, and partnership. At Innovista Metal Fabriconix, our promise is simple: engineer-ready execution, disciplined safety, and finishes that stand the test of time. We combine skilled craftsmanship with compliant processes, modern methods, and accountable leadership to deliver on drawings, budgets, and deadlines.

From office partitions to structural and custom metalwork, solutions are designed to enhance function, aesthetics, and long-term value. Thank you for trusting a team that builds with care, coordinates with clarity, and supports you beyond handover. Together, we shape spaces that enable productivity, safety, and growth for organizations across commercial, industrial, and insti-
