TWIST SHAPE LINE

When it comes to the sound put off by your string trimmer, it largely comes down to the type of string you use.

In general, the less air resistance, the less noise a string makes.

Twisted trimmer line is generally the quietest. This is due to the fact that the twisted line offers less air resistance. This may make twisted trimmer line a good option if you have a lot of properties in small residential areas where sound may be a concern.

However, round lines like Husqvarna's Titanium Blend are also much quieter than other string shapes.

Diameter		Twist shape choose

4.50	0.177"	ellipse	square	star	four-leaf

*Colors and packaging can be customized upon request.

AIR-RE LINE

This is a trimmer line designed for the electric straw machine, providing longer battery use time. This line raw material formula is unique and has better wear resistance. The unique appearance provides smaller air resistance, smaller vibration, and lower noise.
