WORK EXPERIENCE

Web Developer

Moneytree Realty — May 2024 – Present · Noida

Stack : PHP, Laravel, MySQL, JavaScript, FilamentPHP, Tailwind CSS, HTML/CSS, VPS, Figma

Frontend Development (Main Website & Landing Pages) 🔗 **Live : Moneytree Realty**

- Developed and maintained the public-facing website for Moneytree Realty, a leading real estate advisory platform with property listings across India. The site is built with a focus on SEO, performance, and mobile responsiveness, providing a seamless user experience across devices.
- Created custom landing pages for Google ads, tailored for specific regions and campaigns to generate high-conversion organic and paid leads.

Backend Development (Admin Dashboard & API) 🔗 **API: Moneytree API**

- Developed and maintained a secure, RESTful Laravel-based API to support frontend property listings, user interactions, and lead capture.
- Built a comprehensive admin dashboard with FilamentPHP and Filament Shield, allowing internal teams to efficiently manage properties, blog postings, and inquiries.
- Implemented backend features such as resume handling, slug generation, and custom route management for SEO-friendly URLs.
- Standardized API response formatting and maintained clear API documentation for seamless integration with frontend systems.

DevOps, VPS & Hosting Management

- Managed VPS servers and shared hosting, including Apache configurations, SSL setup, domain routing, and DNS records.
- Automated deployment workflows using Git, SSH, and server-side scripts to streamline release cycles.

SEO, Performance Optimization & Analytics

- Collaborated with the SEO and content teams to enhance technical SEO implementation and support the creation of high-ranking content and location-based landing pages tailored for organic discovery.
- Implemented lazy loading, asset compression, and code best practices, significantly improving page speed, Core Web Vitals, and overall site performance.

PROJECTS

Space Tourism Website 🔗 **Link: Live Demo**

By using React.js, Tailwind CSS, Figma (Design Implementation)

- Built a responsive, multi-page space tourism website using React.js and Tailwind CSS, featuring dynamic routing, smooth animations, and interactive 3D planets.
- Translated Figma designs into pixel-perfect, responsive UI using Tailwind CSS
- Implemented dynamic routing and smooth transitions using React Router
- Enhanced user experience with animations and clean, modern layout
- Ensured cross-device compatibility and performance optimization
