

# Asad Enterprises

Import-Export

**Asad Enterprises** Importers and Exporters is a diversified trading and project solutions company dedicated to delivering excellence across multiple sectors. With a strong presence in agricultural commodities, minerals, industrial equipment, and infrastructure projects, we serve as a trusted link between producers, suppliers & clients around the world.

Our company is built on the principles of quality, reliability, and integrity. We source and supply premium products that meet international standards, ensuring consistent value and satisfaction for our clients. Through our global network and industry expertise, we provide comprehensive solutions that address the needs of both local and international markets.

## Our Strengths

With a strong network of suppliers and buyers across Asia, the Middle East, and Africa, Asad Enterprises ensures efficient trade and reliable partnerships worldwide. Backed by our own manufacturing and processing facilities, we maintain strict quality control and consistency in every product we deliver.

Our team's technical expertise in project execution and industrial solutions allows us to handle complex projects with precision and innovation.

Above all, we focus on building long-term business relationships founded on trust, transparency, and mutual growth, making us a dependable partner for clients across diverse industries.

## Our Mission

To provide reliable and sustainable products and services, build strong global partnerships, and expand into value-added industries that drive long-term growth and innovation.

## Our Values

At Asad Enterprises, our core values guide every aspect of our work and define the foundation of our success.

## EXPORTS

Broken Rice (IRRI-6, IRRI-9)

Sesame Seeds

Corns

Minerals

Copper Ore

Limestone

Bauxite

Phosphate

Iron Ore

Granite

Copper Concentrate

## IMPORTS

Mining Tools & Equipment(bits)

Processing Plants

Concentrate Plant Accessories

Textile Unit Accessories

Cotton yarn(40S,50,60S,80S)

Transformers & Electrical Accessories

Elevators, Generators

Core Drilling Rigs

# INDUSTRIAL PLANTS & MANUFACTURING

## Calcium Carbonate Plant

As part of our Industrial Plants & Manufacturing division, our Calcium Carbonate Plant produces premium-quality coated and uncoated calcium carbonate for use in plastics, paints, paper, and construction industries. Utilizing advanced technology and rigorous quality control, we ensure reliable performance, consistency, and sustainability in every batch.

## Limestone Powder Plant

Our Limestone Powder Plant specializes in producing finely processed limestone powder for a wide range of industrial and construction applications. With advanced milling technology and strict quality standards, we ensure consistent particle size, purity, and performance to meet client specifications across local and international markets.

## Water Filtration Plants (Supply & Setup)

We provide complete water filtration plant solutions, including supply, installation, and commissioning. Our systems are designed for efficiency, reliability, and long-term performance, delivering safe and clean water for industrial, commercial, and municipal applications while meeting international environmental and quality standards.

# TRADE MANUFACTURING

## Coated Calcium Carbonate

Our Coated Calcium Carbonate is produced using advanced coating technology to enhance dispersion and hydrophobic properties. The product delivers superior performance in plastics, paints, and paper applications, ensuring excellent compatibility, smooth processing, and consistent quality across diverse industrial uses.

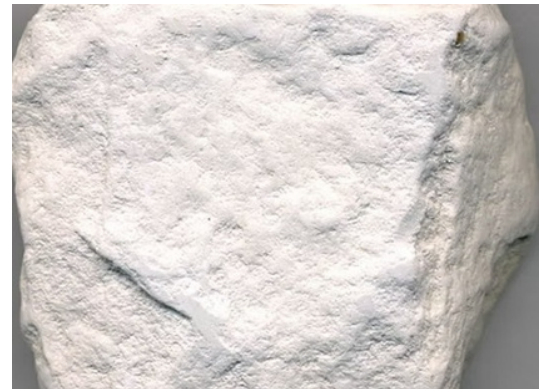

## Celestine

Our Celestine production focuses on delivering high-purity strontium sulfate used in glass, ceramics, and metal refining industries. Processed with advanced equipment and strict quality control, it provides consistent chemical stability and performance, meeting international standards for industrial manufacturing applications.

## Chalk

We produce high-quality chalk powder suitable for use in paints, rubber, plastics, and construction materials. With uniform particle size and superior whiteness, our chalk ensures reliable results, making it ideal for various industrial and educational applications requiring consistency and quality.

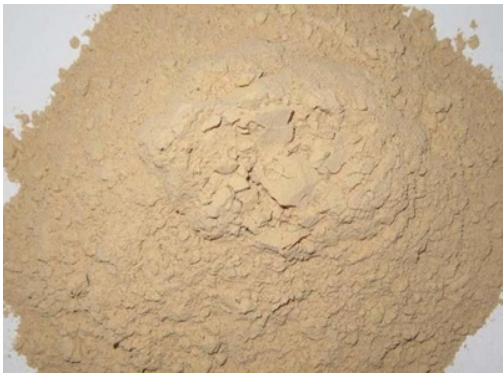

## Hydrated lime

We manufacture hydrated lime (calcium hydroxide) which is used in water treatment, construction, and agriculture to control pH and improve soil. It is also used in the sugar industry for purification, in environmental protection to treat waste, in cattle farms for disinfection, and in copper drilling and mining to control acidity and help in processing.

## Burnt Lime

We manufacture burnt lime (Calcium oxide), which is widely used in different industries. Our product is used in the sugar industry for juice purification, in copper plants as a flux to remove impurities, in the plastic industry for moisture control and quality improvement, and in the fertilizer industry to reduce soil acidity and support better crop production.

## Bentonite Clay

Bentonite conforming to API standard specifications except filtrate loss. It yields 75–90 barrels of mud of 30 cps per ton of bentonite.

Bentonite is recommended for all drill holes where low filtrate properties of bentonite are of less importance.

## Silica Sand

Our Silica Sand is processed to meet the precise needs of glass, foundry, and construction industries. With high silica content and uniform particle size, it ensures clarity, strength, and consistency, making it ideal for high-performance industrial applications worldwide.

## Gypsum

We produce and supply refined gypsum used in cement manufacturing, construction materials, and agriculture. Through precision processing and quality control, our gypsum ensures excellent purity and performance, supporting durable, efficient, and high-quality production across multiple industries.

# TRADE MANUFACTURING

## Laterite

Our Laterite is sourced and processed to serve cement, construction, and industrial applications. With rich mineral content and high durability, it provides strength and reliability for infrastructure development, meeting industry standards for composition, stability, and long-term performance.

## Sea Salt

Our Sea Salt is naturally harvested and refined to deliver high purity and consistent quality for food, chemical, and industrial applications. Rich in essential minerals, it is processed under strict quality standards to ensure optimal texture, taste, and performance for both domestic and international markets.

## Quartz Sand

We supply high-purity Quartz Sand designed for use in glass, ceramics, electronics, and foundry industries. Its consistent grain size, chemical purity, and strength ensure optimal results and reliability in demanding production environments.

## Calcium Carbonate

Calcium carbonate is used in the market as a filler, also used in paper industry, cosmetics and as well in soap and surf. It is thoroughly dispersible in polymeric matrix during compounding and processing. For maximum property development and formulation flexibility, our range of calcium carbonate products is designed to give good dispersion along with excellent incorporation in the polymer matrix.

Lime Powder  
(Industrial Grade)

Our Industrial Grade Lime Powder is produced from premium limestone and processed to serve construction, steel, and chemical industries. With excellent reactivity and purity, it provides consistent performance and efficiency for diverse industrial and environmental applications.

Fireclay

We supply durable Fireclay used in refractories, furnaces, and high-temperature industrial equipment. With superior heat resistance and strength, our fireclay ensures reliability and longevity in demanding thermal environments across industrial operations.

TEXTILE VALUE CHAIN

Office# 205, 2nd floor, Rikodik Plaza River View,  
Phase 7, Islamabad
