

Risk Advisory and Assessments

Clear, practical risk advice for operational decisions

SERVICE OVERVIEW

TBS provides practical risk advisory and assessment services that support safe planning and informed decisions in Libya. Assessments are clear, usable and directly relevant to the client's activity. The priority is to help clients understand what they need to know to move, meet, mobilise or operate safely and effectively. Support can include Libya operating-environment briefings, threat and risk assessments, route risk assessments, site security reviews, project risk assessments, evacuation and contingency planning, travel risk advice and regular risk updates.

HOW WE DELIVER

Advisory support begins by defining the client's objective and the decisions that need to be made. TBS reviews the activity, location, travel requirements, local interfaces, likely exposure and operational dependencies, then develops a clear assessment or briefing. Local context shapes the analysis, which TBS turns into practical controls. Outputs are structured so decision-makers understand the risk, the likely impact on the activity and the measures available to manage it.

WHEN CLIENTS ENGAGE TBS

Clients typically engage TBS for:

- Entering Libya for the first time or returning to the market
- Planning business visits, field activity or project mobilisation
- Reviewing office, site, warehouse or accommodation security

- Assessing route, travel or movement exposure
- Preparing contingency, evacuation or incident response arrangements

WHAT THIS MEANS IN PRACTICE

- Briefings focused on the client's location, movement and activity
- Risk assessments that identify practical controls the client can act on
- Route, site and project reviews linked to real operational requirements
- Clear reporting for management, travellers and project teams
- Updates that help clients adjust plans as conditions change

WHY TBS

TBS combines local knowledge with structured analysis, so clients understand risk in a way that supports action. The value is in explaining what the environment means for the client's specific requirement. Because TBS is based in Libya, advice is supported by current local awareness, practical coordination and an understanding of how risk controls work on the ground, which keeps assessments relevant, usable and aligned with operational reality.

Practical risk advice for Libya, turning local knowledge into **clear decisions and workable controls.**
