

Vertical Gardening System

Materials:

- 2.5 gal or 5 gal buckets (3 per level)*
- 3/8" drill bit & drill
- 3 bamboo sticks
- Soil
- Rocks (optional)

*Each bucket should be food grade buckets to prevent chemical leeching.

*You can change the number of buckets to 1 or 2 on the upper levels.

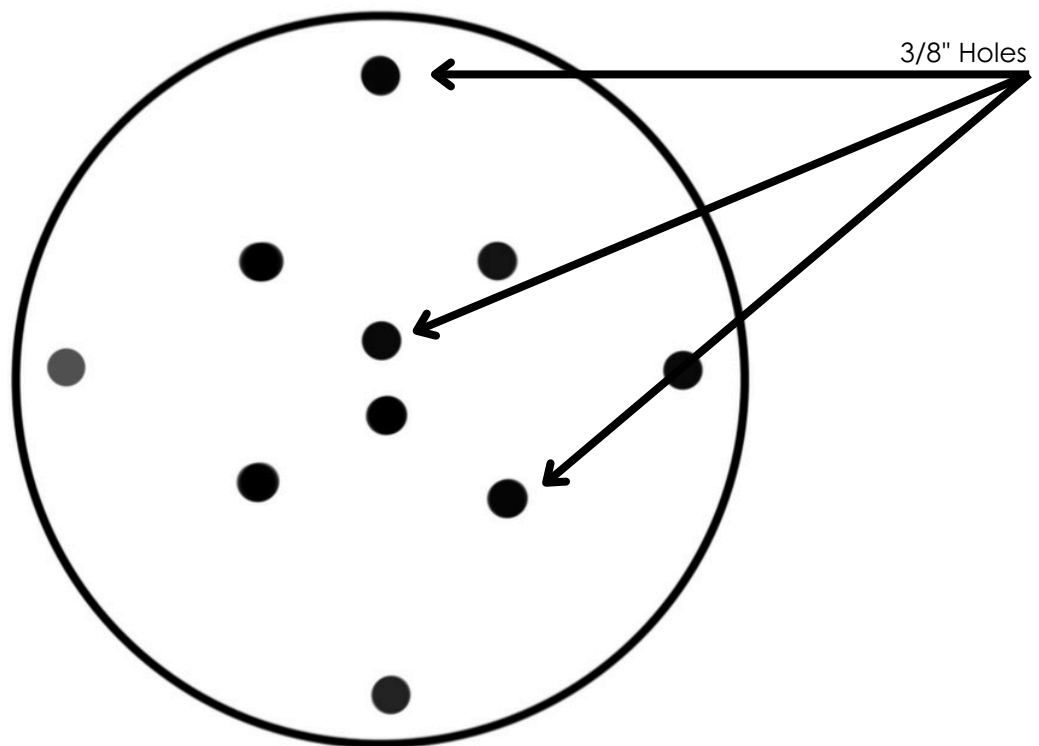

Vertical Gardening System

Step One

Begin by drilling 10 evenly spaced holes in the bottom of each 2.5 or 5 gallon bucket.

Vertical Gardening System

Step Two

Fill each bucket with two layers of rocks at the bottom. Then on top of the rocks fill the buckets $\frac{2}{3}$ full with garden soil.

Step Three

Add one bamboo stick to 3 of your buckets. These 3 buckets will be the base of your VGS.

Step Four

Arrange your base layer of buckets in a triangle form. Then continue to stack the other buckets on top, leading a bamboo stick through each bucket.
