

In the name of GOD, Most Gracious, Most Merciful

There is no other god beside GOD

APPENDIX 24

Tampering with the Word of God

from: Quran — The Final Testament · Rashad Khalifa, PhD

Source: masjidtucson.org/quran/appendices/appendix24.html

A superhuman mathematical system pervades the Quran and serves to guard and authenticate every element in it. Nineteen years after the Prophet's death, some scribes injected two false verses at the end of Sura 9, the last sura revealed in Medina. The evidence presented in this Appendix incontrovertibly removes these human injections, restores the Quran to its pristine purity, and illustrates a major function of the Quran's mathematical code, namely, to protect the Quran from the slightest tampering. Thus, the code rejects ONLY the false injections 9:128-129.

"Surely, we have revealed this scripture, and surely, we will preserve it." [15:9]

The Quran is God's Final Testament. Hence the divine pledge to keep it perfectly preserved. To assure us of both the divine authorship, and the perfect preservation of the Quran, the Almighty author has rendered the Quran mathematically composed. As proven by the physical evidence in Appendix 1, such mathematical composition is far beyond human capabilities. The slightest violation of God's Final Testament is destined to stand out in glaring disharmony. A deviation by only 1 — one sura, one verse, one word, even one letter — is immediately exposed.

Nineteen years after the Prophet Muhammad's death, during the reign of Khalifa 'Uthman, a committee of scribes was appointed to make several copies of the Quran to be dispatched to the new Muslim lands. The copies were to be made from the original Quran which was written by Muhammad's hand (Appendix 28).

This committee was supervised by 'Uthman Ibn 'Affaan, 'Ali Ibn Abi Taaleb, Zeid Ibn Thaabet, Ubayy Ibn Ka'ab, 'Abdullah Ibn Al-Zubair, Sa'eed Ibn Al-'Aas, and 'Abdul Rahman Ibn Al-Haareth Ibn Hessaam. The Prophet had written the Quran in its chronological order of revelation (Appendix 23), together with the necessary instructions to place every piece in its proper position.

The last sura revealed in Medina was Sura 9. Only Sura 110, a very short sura, was revealed after Sura 9, in Mina.

The committee of scribes finally came to Sura 9, and put it in its proper place. One of the scribes suggested adding a couple of verses to honor the Prophet. The majority of scribes agreed. 'Ali was outraged. He vehemently maintained that the word of God, written down by the hand of His final prophet, must never be altered.

Ali's protest is documented in many references, but the classic reference AL ITQAAN FEE 'ULUM AL QURAN by Jalaluddin Al-Suyuty, Al-Azhareyyah Press, Cairo, Egypt, 1318 AH, Page 59 [Insert 1] records:

"'Ali was asked: 'Why are you staying home?' He said, 'Something has been added to the Quran, and I have pledged never to put on my street clothes, except for the prayer, until the Quran is restored.'" [Insert 1]

The horrendous dimensions of this crime:

- (1) 'Uthman was assassinated, and 'Ali was installed as the fourth Khalifa.
- (2) A 50-year war erupted between the new Khalifa and his supporters on one side, and the Mohammedan distorters of the Quran on the other side.
- (3) 'Ali was martyred, and eventually his family, the prophet Muhammad's family, except for some women and children, were killed.
- (4) The disaster culminated in the infamous Battle of Karbala, where 'Ali's son, Hussein, and his family were massacred.
- (5) The Muslims were deprived of the pure, unaltered, Quran for 1400 years.

The distorters finally won the war. The first peace time ruler, Marwan Ibn Al Hakam (died 65 AH/684 AD), destroyed the original Quran written by the Prophet's own hand, "fearing it might become the cause of NEW disputes." The question: if the original were identical to the Quran in circulation, why destroy it?

Upon examining the oldest Islamic references, we realize that the false injections, 9:128-129, were always suspect. Every single verse in the Quran was verified by a multiplicity of witnesses "except Verses 128 and 129 of Sura 9; they were found only with Khuzeimah Ibn Thaabet Al-Ansaary." When questioned, someone came up with a Hadith stating that "the testimony of Khuzeimah equals the testimony of two men!!!"

Strangely, the false injections 9:128-129 are labeled in the traditional Quran printings as "Meccan" [Insert 2]. How could these 'Meccan' verses be found with Khuzeimah, a late 'Medinan' Muslim?! How could a Medinan sura contain Meccan verses?!

The discovery of the Quran's mathematical code in 1974 ushered in a new era where the authenticity of every element in the Quran is proven. The injection of the two false Verses 9:128-129 resulted in: (1) demonstrating the major function of the Quran's mathematical system, (2) producing an awesome miracle in its own right, and (3) distinguishing the true believers from the hypocrites.

The translation of the two false verses [Insert 3]:

"A messenger has come to you from among you who wants no hardship to afflict you, and cares about you, and is compassionate towards the believers, merciful. If they turn away, then say, 'Sufficient for me is God, there is no god except He. I put my trust in Him. He is the Lord with the great throne.'" [9:128-129 — False Injections]

THE PHYSICAL EVIDENCE

[1] The first violation of the Quran's code by Verses 9:128-129 appeared when the count of the word "God" (Allah) in the Quran was found to be 2699, which is not a multiple of 19, unless we remove one. The count of the word "God" is shown at the bottom of each page in this translation. The total shown at the end of the Quran is 2698, 19×142 , because the false injections 9:128-129 have been removed.

[2] The sum of all the verse numbers where the word "God" occurs is 118123, or 19×6217 . This total is obtained by adding the numbers of verses wherever the word "God" is found. If the false Verse 9:129 is included, this phenomenon disappears.

[3] As shown at the end of Sura 9 in this translation, the total occurrence of the word "God" to the end of Sura 9 is 1273, 19×67 . If the false injections 9:128-129 were included, the total would have become 1274, not a multiple of 19.

[4] The occurrence of the word "God" from the first Quranic initial ("A.L.M." of 2:1) to the last initial ("N." of 68:1) totals 2641, or 19×139 . Since it is easier to list the suras outside the initialed section of the Quran, Table 1 shows the 57 occurrences of the word "God" in that section. Subtracting 57 from the total occurrence of the word "God" gives us $2698 - 57 = 2641 = 19 \times 139$, from the first initial to the last initial. If the human injections 9:128 and 129 were included, the count of the word "God" in the initialed section would have become 2642, not a multiple of 19.

Table 1: Occurrence of the word "God" outside the initialed section

Sura No.	No. of Occurrences	Sura No.	No. of Occurrences
----------	--------------------	----------	--------------------

1	2	84	1
69	1	85	3
70	1	87	1
71	7	88	1
72	10	91	2
73	7	95	1
74	3	96	1
76	5	98	3
79	1	104	1
81	1	110	2
82	1	112	2
			57 = 19×3

[5] Sura 9 is an un-initialed sura, and if we look at the 85 un-initialed suras, we find that the word "God" occurs in 57 of these suras, 19×3 . The total number of verses in the suras where the word "God" is found is 1045, 19×55 . If 9:128-129 were included, the verses containing the word "God" would increase by 1.

[6] The word "God" from the missing Basmalah (Sura 9) to the extra Basmalah (Sura 27) occurs in 513 verses, 19×27 , within 19 suras (Table 2). If the false Verses 9:128-129 were included, the number of verses containing the word "God" would have become 514, and this phenomenon would have disappeared.

Table 2: The word "God" from the missing Basmalah to the extra Basmalah

No.	Sura	Verses with "God"
1	9	100
2	10	49
3	11	33
4	12	34
5	13	23
6	14	28
7	15	2
8	16	64
9	17	10
10	18	14
11	19	8
12	20	6

13	21	5
14	22	50
15	23	12
16	24	50
17	25	6
18	26	13
19	27	6
19 suras	342 = 19×18	513 = 19×27

[7] The word "Elaah" which means "god" occurs in Verses 9:129. The total occurrence of this word in the Quran is 95, 19×5 . The inclusion of 9:128-129 causes this word to increase by 1, to 96.

[8] The INDEX lists 116 "Rasool" (Messenger) words. Remove 9:128 (false) and 12:50 (refers to Pharaoh's messenger) → remaining = $114 = 19 \times 6$.

[9] Another important word that occurs in the false Verses 9:128-129 is the word "Raheem" (Merciful). This word is used in the Quran exclusively as a name of God, and its total count is 114, 19×6 , after removing the word "Raheem" of 9:128, which refers to the prophet. According to 7:188, 10:49, and 72:21 the Prophet did not possess any power of mercy.

[10] The INDEX lists 22 occurrences of "Arsh" (Throne). After removing 9:129, Joseph's throne (12:100), and the Queen of Sheba's throne (27:23): remaining = 19.

[11] The Quranic command "Qul" (Say) occurs in the Quran 332 times. Also, the word "Qaaloo" (They said) occurs the same number of times, 332. Since the false Verse 9:129 contains the word "Qul" (Say), its inclusion would have destroyed this typical Quranic phenomenon.

[12] The Quran contains 6234 numbered verses and 112 un-numbered verses (Basmalahs). Thus, the total number of verses in the Quran is 6346, 19×334 . The false Verses 9:128-129 violate this important criterion of the Quran's code.

[13] In addition to violating the numbers of words as listed above, 9:128-129 violate the Quran's mathematical structure. When we add the number of verses in each sura, plus the sum of verse numbers ($1+2+3+\dots+n$, where n =number of verses), plus the number of each sura, the cumulative total for the whole Quran comes to 346199, or $19 \times 19 \times 959$. This phenomenon confirms the authenticity of every verse in the Quran, while excluding 9:128-129. Table 3 is an abbreviated illustration of the calculations of Item 13. This phenomenon is impossible if the false Verses 9:128-129 are included.

Table 3: Mathematical coding of the Quran's suras & verses

Sura No.	No. of Verses	Sum of Verse #s	Total
1	7	28	36
2	286	41041	41329
—	—	—	—
9	127	8128	8264
—	—	—	—
114	6	21	141
6555	6234	333410	346199 = 19×19×959

[14] When we carry out the same calculations as in Item 13 above, but for the 85 un-initialed suras only, which include Sura 9, the cumulative total is also a multiple of 19. The cumulative total for all un-initialed suras is 156066, or 19×8214 . This result depends on the fact that Sura 9 consists of 127 verses, not 129. The data are shown in Table 4. The false verses would have destroyed this criterion.

Table 4: Mathematical coding of the 85 un-initialed suras

Sura No.	No. of Verses	Sum of Verse #s	Total
1	7	28	36
4	176	15576	15756
—	—	—	—
9	127	8128	8264
—	—	—	—
114	6	21	141
			156066 = 19×8214

[15] Sum of sura numbers + verses for all un-initialed suras from beginning to end of Sura 9: 703 = 19×37 . Table 5.

Table 5: Un-initialed suras from beginning to Sura 9

Sura	# Verses	Total
1	7	8
4	176	180
5	120	125
6	165	171
8	75	83

9	127	136
		703 = 19×37

[16] By adding the sura number of the un-initialed suras, plus the number of verses, plus the sum of verse numbers from the missing Basmalah (9:1) to the end of the Quran, the grand total comes to 116090, or 19×6110 . These data are in Table 6. If Verses 9:128-129 are included, the number of verses for Sura 9 becomes 129, and the grand total becomes 116349, not a multiple of 19.

[17] When the same calculations of Item 16 are done for all the verses from the missing Basmalah of Sura 9 to the extra Basmalah of Sura 27, the grand total comes to 119966, or 19×6314 . This phenomenon would be destroyed, and the total would no longer be divisible by 19, if the number of verses in Sura 9 were 129. Since this phenomenon is also related to the absence of Basmalah from Sura 9, it is explained and the detailed data are given in table form in Appendix 29.

Table 6: Un-initialed suras from missing Basmalah to end of Quran

Sura No.	No. of Verses	Sum of Verse #s	Total
9	127	8128	8264
16	128	8256	8400
—	—	—	—
113	5	15	133
114	6	21	141
			116090 = 19×6110

[18] From the missing Basmalah (9:1) to the verse mentioning 19 (74:30): $207670 = 19 \times 10930$. Table 7.

Table 7: Suras and verses from missing Basmalah to 74:30

Sura No.	No. of Verses	Sum of Verse #s	Total
9	127	8128	8264
10	109	5995	6114
—	—	—	—
73	20	210	303
74	30	465	569
			207670 = 19×10930

[19] Sura 9 consists of 127 verses. The digits of 127 add up to $1+2+7 = 10$. Let us look at all the verses whose digits add up to 10, from the missing Basmalah of Sura 9, to the extra Basmalah of Sura 27. If Sura 9 consisted of 129 verses, the grand total would be 2472, instead of 2470 (19×130); 2472 is not a multiple of 19, and this phenomenon would have disappeared. The data are in Table 8.

Table 8: Verses whose digits add up to 10 (from 9:1 to 27:29)

Sura No.	No. of Verses	Add up to 10	Total
9	127	12	148
10	109	10	129
11	123	11	145
12	111	10	133
13	43	3	59
14	52	4	70
15	99	9	123
16	128	12	156
17	111	10	138
18	110	10	138
19	98	9	126
20	135	12	167
21	112	10	143
22	78	7	107
23	118	11	152
24	64	6	94
25	77	7	109
26	227	22	275
27	29	2	58
342 = 19×18	1951	177	2470 = 19×130

[20] The falsifiers wanted us to believe that Sura 9 consists of 129 verses. The number 129 ends with the digit "9." Let us look at the first sura and the last sura whose number of verses ends with the digit "9." These are Sura 10 and Sura 104. By adding the sura number, plus the number of verses, plus the sum of verse numbers, from Sura 10 to Sura 104, we get a grand total that equals 23655, or 19×1245 . The details are shown in Table 9. The inclusion of Sura 9 with the wrong number of verses, 129, would have altered both the sum of verse numbers and the cumulative total, and the Quran's code would have been violated.

Table 9: All suras whose number of verses ends with "9"

Sura No.	No. of Verses	Sum of Verse #s	Total
10	109	5995	6114
15	99	4950	5064
29	69	2415	2513
43	89	4005	4137
44	59	1770	1873
48	29	435	512
52	49	1225	1326
57	29	435	521
81	29	435	545
82	19	190	291
87	19	190	296
96	19	190	305
104	9	45	158
748	627	22280	23655 = 19×1245

[21] The false injection consisted of Verses 128 and 129 at the end of Sura 9. If we look at the numbers 128 and 129, we see two 1's, two 2's, one 8, and one 9. Now let us look at all the verses in the Quran, and count all the 1's we see. This means the 1's we see in verses 1, 10, 11, 12, 13... 21, 31, and so on. The total count of the 1's is 2546 (19×134), provided the correct number of verses in Sura 9, 127, is used. If 128 and 129 are included, the grand total becomes 2548, which is not a multiple of 19 (Table 11).

Table 10: Counting all the 1's in the 85 un-initialed suras

Sura	# of Verse	# of 1's
1	7	1
4	176	115
—	—	—
9	127	61
—	—	—
113	5	1
114	6	1
		1406 = 19×74

Table 11: Counting the digits 1, 2, 8, 9 in the whole Quran

Sura	No. of 1's	No. of 2's	No. of 8's	No. of 9's	Total
1	1	1	0	0	2
2	159	146	55	48	408
—	—	—	—	—	—
9	61	31	22	22	136
10	31	21	21	21	94
—	—	—	—	—	—
114	1	1	0	0	2
	2546 = 19×134	1641	908	833	5928 = 19×312

[22] The total count of digit "1" in the un-initialed suras is $1406 = 19 \times 74$. (Table 10)

[23] Total count of all 2's, 8's, 9's in all verse numbers: $3382 = 19 \times 178$. Grand total of 1's+2's+8's+9's: $5928 = 19 \times 312$. Including 9:128-129 gives 5934, not a multiple of 19. (Table 11)

[24] Total count of all digits 1–9 in verse numbers of 85 un-initialed suras: $27075 = 19 \times 19 \times 75$.

[25] Adding up the digits of the Quran's suras and verses produces a multiple of 19, provided the correct number of verses for Sura 9, 127, is taken. To do this, you make a list of the Quran's 114 suras and the number of verses in each sura. Add the digits of every sura number. The sum of digits of 10=1, 11=2, 12=3, 99=18, and so on. The total for all the suras is 975. The same thing is done for the numbers of verses in every sura. For example, Sura 2 consists of 286 verses. The digits of 286 add up to $2+8+6=16$. For Sura 9, the digits of its number of verses add up to $1+2+7=10$. The total for all 114 suras is 906. Thus, the grand total for the sum of digits of all the suras and verses is $975+906 = 1881 = 19 \times 99$. Naturally, this observation would not be possible if Sura 9 consisted of 129 verses. Table 12 is abbreviated to illustrate the calculations.

Table 12: Sum of digits of all suras & verse numbers

Sura No.	No. of Verses	Sum of Suras	Digits of Verses
1	7	1	7
2	286	2	16
3	200	3	2
—	—	—	—
9	127	9	10
—	—	—	—
114	6	6	6

		975	906 → 975+906 = 1881 = 19×99
--	--	-----	---------------------------------

[26] If we multiply (instead of add) the digit-sums: grand total = 7771 = 19×409. Table 13.

Table 13: Multiplication of digit sums of suras and verses

Sura No.	No. of Verses	Sum of Suras	Digits of Verses		Product
1	7	1	× 7	=	7
2	286	2	× 16	=	32
3	200	3	× 2	=	6
—	—	—	—	—	
9	127	9	× 10	=	90
—	—	—	—		
114	6	6	6	=	36
		975	906		7771 = 19×409

[27] Another truly awesome phenomenon: Sura 9 is an odd-numbered sura, and if we carry out the calculations described above for the odd-numbered suras only, we find that the total for the suras is 513 (19×27), the total for the verses is 437 (19×23), and the grand total for both is 513+437 = 950 (19×50). Table 14 illustrates this remarkable phenomenon.

Table 14: Same data as Table 12, odd-numbered suras only

Sura No.	No. of Verses	Sum of Suras	Digits of Verses	Total
1	7	1	7	8
3	200	3	2	5
—	—	—	—	
9	127	9	10	19
—	—	—	—	
113	5	5	5	10
		513 = 19×27	437 = 19×23	950 = 19×50

[28] Let us take all the suras that consist of 127 verses or less. There are 105 such suras. The sum of the sura numbers of these 105 suras, plus the sum of their verse numbers is 10963, or 19×577. Sura 9 is the only sura that has 127 verses. See Table 15. If Sura 9 did consist of 129 verses, it would not be included in this list of suras, the total would be 10827 (10963-136), this phenomenon would have disappeared, and the Quran's code would have been violated.

Table 15: Mathematical coding of all suras with 127 verses or less

Sura Number	No. of Verses	Total
1	7	8
5	120	125
8	75	83
9	127	136
—	—	—
113	5	118
114	6	120
6434	4529	10963 = 19×577

[29] Since Sura 9 is odd-numbered, and its number of verses is also odd, let us look at all the odd-numbered suras whose number of verses is also odd. This gives us 27 suras: 1, 9, 11, 13, 15, 17, 25, 27, 29, 33, 35, 39, 43, 45, 57, 63, 81, 87, 91, 93, 97, 101, 103, 105, 107, 111, and 113. The sum of these sura numbers, plus their sum of verse numbers is 2774, 19×146 . If we take the wrong number of verses for Sura 9, i.e., 129, this miracle disappears.

[30] All suras with prime number of verses: grand total of all digits (sura numbers + verse numbers) = 266 = 19×14 .

[31] The distorters added two false verses to Sura 9, and this caused the sura to have 129 verses. Since 129 consists of 3 digits, and is divisible by 3, let us look at the suras whose number of verses is divisible by 3, and consists of 3 digits. The total of these sura numbers is 71, and the total number of verses is 765. This produces a grand total of $71 + 765 = 836$, or 19×44 . The data are shown in Table 16. If Sura 9 had 129 verses, it would have been included in this table, and would have destroyed this phenomenon.

Table 16: All suras with 3-digit verse count divisible by 3

Sura No.	# of Verses	Total
5	120	125
6	165	171
11	123	134
12	111	123
17	111	128
20	135	155
71	765	836 = 19×44

[32] If Sura 9 consisted of 129 verses, as the falsifiers would like us to believe, then let us look at all the suras which consist of 129 verses or more. There are 8 such suras. Their data are shown Table 17. If Sura 9 consisted of 129 verses, the total number of verses would have been $1577 + 129 = 1706$, not a multiple of 19.

Table 17: All suras with 129 or more verses

Sura No.	No. of Verses
2	286
3	200
4	176
6	165
7	206
20	135
26	227
37	182
	1577 = 19×83

[33] The numbers 127, 128 and 129 have two digits in common, "1" and "2." Let us consider all the suras whose number of verses contains the digits 1 and 2. By adding the sura numbers plus the numbers of verses, we get 1159, 19×61 . See Table 18. If Sura 9 consisted of 129 verses, the total would have become $1159+2 = 1161$, not a multiple of 19.

Table 18: Suras with verse count containing digits "1" and "2"

Sura No.	No. of Verses	Total
5	120	125
9	127	136
11	123	134
16	128	144
21	112	133
37	182	219
65	12	77
66	12	78
92	21	113
322	837	1159 = 19×61

[34] Single-digit suras with verse count containing "1" and "2": only Suras 5 and 9. $120+127 = 247 = 19 \times 13$. Table 19.

Table 19: Single-digit suras with verse count containing "1" and "2"

Sura Number	No. of Verses
5	120
9	127
	$247 = 19 \times 13$

[35] We looked at all the suras whose number of verses contains "1" and "2." Let us now look at all the suras whose number of verses begins with the digit "1." There are 30 suras that possess this quality: Suras 4, 5, 6, 9, 10, 11, 12, 16, 17, 18, 20, 21, 23, 37, 49, 60, 61, 62, 63, 64, 65, 66, 82, 86, 87, 91, 93, 96, 100, and 101. The sum of verse numbers $(1+2+3+\dots+n)$ for these 30 suras is 126122, or 19×6638 . If Sura 9 consisted of 129 verses, the sum of their verse numbers would have been $126122 + 128 + 129 = 126379$, and this total is not a multiple of 19.

[36] $9+1+2+7=19$. All 10 suras where digits of sura number + verse count add up to 19: total = 1216 = 19×64 . Table 20.

Table 20: All suras where digits of sura number and verse count add up to 19

Sura No.	No. of Verses	Total
9	127	136
22	78	100
26	227	253
45	37	82
54	55	109
64	18	82
72	28	100
77	50	127
78	40	118
84	25	109
531	685	$1216 = 19 \times 64$

Mr. Gatut Adisoma of Masjid Tucson made the following two discoveries:

[37] Sura 9 consists of 127 verses, and (9) plus $(1+2+7)$ add up to 19. There are three other suras in the whole Quran whose sura digits add up to 9 and the digits of their number of verses add up to

10. These are suras 9, 45, 54, and 72. They consist of 127, 37, 55, and 28 verses, respectively. The total number of verses in these three suras is 247, 19×13 . If Sura 9 consisted of 129 verses, it would not be included in this table to begin with. See Table 21.

Table 21: Suras where sura digits add up to 9 and verse digits add up to 10

Sura No.	No. of Verses
9	127
45	37
54	55
72	28
247 = 19 × 13	

[38] If Sura 9 consisted of 129 verses as the distorters claimed, then there is only one other sura in the whole Quran whose sura digits add up to 9, and its number of verses' digits add up to 12, namely Sura 27. As shown in Table 22, this combination, with 129 verses for Sura 9, does not conform with the Quran's code.

Table 22: Assuming Sura 9 = 129 verses — fails the code

Sura No.	No. of Verses (ASSUMED 129)
9	129 ?
27	93
Total: 222 — NOT a multiple of 19	

[39] Let us assume for awhile that Sura 9 consists of 129 verses. Since the number 129 ends with the digit "9," let us look at all the suras where the number of verses ends with the digit "9." We find 13 suras in the Quran whose number of verses ends with the digit "9." They are Suras 10, 15, 29, 43, 44, 48, 52, 57, 81, 82, 87, 96, and 104. As illustrated by Table 23, many conform with the Quran's code only if Sura 9 is excluded; it does not consist of 129 verses. Without Sura 9, the total number of verses in these 13 suras is 627, 19×33 . Additionally, the sura number, plus the number of verses, plus the sum of verse numbers, add up to 23655, or 19×1245 . These phenomena would have disappeared if Sura 9 consisted of 129 verses.

Table 23: All suras with verse count ending in "9"

Sura No.	No. of Verses	Sum of Verse #s	Total
10	109	5995	6114

15	99	4950	5064
29	69	2415	2513
43	89	4005	4137
44	59	1770	1873
48	29	435	512
52	49	1225	1326
57	29	435	521
81	29	435	545
82	19	190	291
87	19	190	296
96	19	190	305
104	9	45	158
748	627 = 19×33	22280	23655 = 19×1245

[40] Sura 9 is an odd-numbered sura whose number of verses ends with the digit "9." Let us now look at all the odd-numbered suras whose number of verses ends with "9." As shown in Table 24, the total of sura number and number of verses in these suras is 646, or 19×34 . If Sura 9 had 129 verses, it would have been included in this group, and the total would have been $646 + 129 + 9 = 784$, which is not a multiple of 19.

Table 24: Odd-numbered suras with verse count ending in "9"

Sura No.	No. of Verses	Total
15	99	114
29	69	98
43	89	132
57	29	86
81	29	110
87	19	106
312	334	646 = 19×34

[41] All suras with verse count ending in "7" (7 suras): grand total = 798 = 19×42 . Table 25.

Table 25: Suras with verse count ending in "7"

Sura No.	No. of Verses	Total
1	7	8
9	127	136

25	77	102
26	227	253
45	37	82
86	17	103
107	7	114
299	499	798 = 19×42

[42] The last two verses of Sura 9 are 126 and 127. Since the falsifiers added two verses, let us look at the last two verses of every sura in the Quran, and count the digit "7," all of them, among these last two verses. As shown in Table 26, the total number of the digit "7" among the last two verses of every sura in the Quran is 38, 19×2. If the last verse in Sura 9 was 129 instead of 127, the number of occurrences of the digit "7" would have been 37, not 38, and this criterion would have been destroyed.

Table 26: Count of digit "7" among last two verses of every sura

Sura No.	Last 2 Verses	7's in Last 2 Verses
1	6, 7	1
2	285, 286	0
3	199, 200	0
4	175, 176	2
9	126, 127	1
—	—	—
25	76, 77	3
—	—	—
114	5, 6	0
		38 = 19×2

[43] Assuming that Sura 9 consists of 129 verses, let us look at all the suras that contain a verse No. 129. This means that we look at all the suras that consist of 129 or more verses. Under this assumption, there are 9 suras that contain a verse No. 129. Interestingly, we find that the total of sura numbers of these 9 suras is a multiple of 19 (114), while the total for the nine 129's can be a multiple of 19 if 2 is deducted from their total. In other words, we are told that one of these 9 suras contains 2 extra verses. The details are in Table 27. When we add 114, plus 1161, and remove 2, we get 1273, or 19×67.

Table 27: All suras containing verse number 129

Sura No.	Verse No.
2	129
3	129
4	129
6	129
7	129
9 ?	129
20	129
26	129
37	129
114 + 1161 - 2	114 + 1161 - 2 = 1273 = 19×67

[44] To pinpoint the location of these two false verses, let us look at all the suras that contain a verse No. 128, while continuing to assume that Sura 9 consists of 129 verses. As shown in Table 28, Sura 9 stands out in glaring disharmony; it is singled out as the sura that contains the false verses. The total of suras and verses becomes divisible by 19 only if Sura 9 is removed. Note that the divisible total, after removing Sura 9, is 1273, 19×67 , which is the same total obtained in Item 43 above after removing 2 verses. This remarkable phenomenon proves that Sura 9 could not contain a verse No. 128.

Table 28: All suras containing verse number 128 — Sura 9 stands out

Sura No.	Verse No.
2	128
3	128
4	128
6	128
7	128
9 ?	128
16	128
20	128
26	128
37	128
Total 1410 — NOT ÷19. Remove Sura 9: 1273	Total 1410 — NOT ÷19. Remove Sura 9: 1273 = 19×67

[45] For the 85 un-initialed suras, sum of the last two verse numbers in each sura: $6897 = 19 \times 363$.
Table 29.

Table 29: Last two verses of the un-initialed suras

Sura No.	Last 2 Verses	Total
1	6+7	13
4	175+176	351
5	119+120	239
—	—	—
9	126+127	253
—	—	—
114	5+6	13
		6897 = 19×363

[46] Let us now take the last two verses in every sura in the Quran, initialed and un-initialed, and add the digits of the last two verses in each sura (Table 30). It is readily obvious that the last two verses of every sura in the Quran are divinely fixed, and divinely guarded through this intricate mathematical code. The last two verses of Sura 9 are confirmed to be 126 & 127, not 128 & 129.

Table 30: Sum of digits of last two verses of every sura

Sura No.	Last 2 Verses	Sum of Digits
1	6, 7	6 + 7
2	285, 286	2+8+5+2+8+6
3	199, 200	1+9+9+2+0+0
—	—	—
9	126, 127	1+2+6+1+2+7
—	—	—
113	4, 5	4 + 5
114	5, 6	5 + 6
		1824 = 19×96

[47] Sura 9 consists of 127 verses, and 127 consists of 3 digits. Let us look at all the suras whose number of verses consists of 3 digits; these are suras 2, 3, 4, 5, 6, 7, 9, 10, 11, 12, 16, 17, 18, 20, 21, 23, 26, and 37. By taking the last digit in each number of verses, and adding up these digits, we get $76 = 19 \times 4$. If Sura 9 consisted of 129 verses, the last digit in its number of verses would be 9

instead of 7, and the total of last digits would be 78 instead of 76, and this phenomenon would disappear.

[48] Suras with odd 3-digit verse count: sum of last digits = 38 = 19×2. Table 31.

Table 31: Suras with odd 3-digit verse count

Sura No.	No. of Verses	Last Digit
6	165	5
9	127	7
10	109	9
11	123	3
12	111	1
17	111	1
20	135	5
26	227	7
		38 = 19×2

[49] Odd-numbered suras with odd 3-digit verse count: only Suras 9, 11, 17. Sum = 361 = 19×19. Table 32.

[50] Digits of 127, 123, 111: 1+2+7+1+2+3+1+1+1 = 19.

[51] Digits of sura numbers 9, 11, 17: 9+1+1+1+7 = 19.

[52] The number 129 is divisible by 3. If Sura 9 consisted of 129 verses as the distorters claimed, then it would be (1) an odd-numbered sura that (2) consists of a 3-digit number of verses, (3) the number of verses is odd, and (4) the number of verses is divisible by 3. There are only two suras in the whole Quran that possess these qualities: Sura 11 with 123 verses, and Sura 17 with 111 verses. The sum of digits of both sura numbers and the numbers of verses comes to 1+1+1+2+3+1+7+1+1+1 = 19. This can be observed only if Sura 9 consists of 127 verses.

[53] Suras 9 and 45 are the only two meeting five specific criteria. 9+1+2+7=19 & 4+5+3+7=19; total = 38.

9+1+2+7=19 & 4+5+3+7=19 — Total for both suras = 38

Table 32: Odd-numbered suras with odd 3-digit verse count

Sura No.	No. of Verses
9	127

11	123
17	111
	361 = 19×19

[54] Let us assume that Sura 9 does have 129 verses. In that case we will have only two suras in the whole Quran whose number begins with 9, and their number of verses ends with 9: Sura 9 (129 verses) and Sura 96 (19 verses). As detailed in Table 33, the grand total of sura number, plus the number of verses, plus the sum of verse numbers is 8828, not a multiple of 19. Now let us remove the false verses (128 & 129) from Sura 9. The result of this correction is shown in Table 34. The grand total becomes 8569, 19×451 .

Table 33: With Sura 9 = 129 (wrong) — fails the code

Sura No.	No. of Verses	Sum of Verse #s	Total
9	129?	8385	8523
96	19	190	305
—	—	—	—
105	148	8575	8828 — NOT ÷19
			NOT a multiple of 19

Table 34: With Sura 9 = 127 (correct) — code holds

Sura No.	No. of Verses	Sum of Verse #s	Total
9	127	8128	8264
96	19	190	305
—	—	—	—
105	146	8318	8569 = 19×451
			8569 = 19×451

[55] Let us assume that Sura 9 consists of 129 verses. The total of these digits is $9+1+2+9=21$. Let us look at all the suras where the digits of their number of verses add up to 21. There are 7 such suras: 9, 25, 27, 37, 68, 94, and 97. By adding the sura numbers, plus the number of verses in each sura, plus the sum of verse numbers, the grand total comes to 34744, not a multiple of 19 (Table 35). Now, let us use the correct number of verses for Sura 9, 127, and repeat the same calculations. This causes the grand total to become 34485, or 19×1815 . See Table 36.

Table 35: Digit-sum of verses = 21, with Sura 9 = 129 (wrong)

Sura No.	No. of Verses	Sum of Verse #s	Total
9	129?	8385	8523
25	77	3003	3105
27	93	4371	4491
37	182	16653	16872
68	52	1378	1498
94	8	36	138
97	5	15	117
357			34744 – NOT a multiple of 19

Table 36: Digit-sum of verses = 21, with Sura 9 = 127 (correct)

Sura No.	No. of Verses	Sum of Verse #s	Total
9	127	8128	8264
25	77	3003	3105
27	93	4371	4491
37	182	16653	16872
68	52	1378	1498
94	8	36	138
97	5	15	117
357			34485 = 19×1815

[56] For the last time, let us assume that Sura 9 consists of 129 verses. We have here a sura that (1) is an odd numbered sura, (2) its number is divisible by 3, (3) the number of verses, 129, is also divisible by 3, and (4) the number of verses ends with the digit "9." There is only one sura that possesses these qualities: Sura 15 is divisible by 3, its number of verses is 99, which is divisible by 3 and ends with the digit "9." If Sura 9 consisted of 129, and we added the sura and verse numbers for these two suras, we would end up with the following results: $9 + 129 + 15 + 99 = 252$ — not a multiple of 19. If we throw away the false number 129, we have one sura in the Quran whose number is odd, and its number of verses is divisible by 3 and ends with the digit 9 — Sura 15. Now we have the following result: $15 + 99 = 114 = 19 \times 6$.

$$15 + 99 = 114 = 19 \times 6$$

WORDS AND LETTERS

[57] For some time now, we have been dealing with numbers. Let us now look at specific words and letters that occur in the false injections 9:128-129. The last statement in 9:127 describes the disbelievers as "LAA YAFQAHOON" (they do not comprehend). Thus, the last letter in Sura 9 is "N" (Noon). According to the falsifiers, the last verse is 129, and the last letter is "M" (Meem), since the last false word is "AZEEM." Now let us look at the first letter and the last letter of every sura from the beginning of the Quran to Sura 9, and calculate their gematrical (numerical) values. Table 37 shows that the last true letter in Sura 9 must be "N," not "M."

Table 37: Gematrical values of first and last letters of Suras 1-9

Sura No.	First Letter	Last Letter	Total
1	B = 2	N = 50	52
2	A = 1	N = 50	51
3	A = 1	N = 50	51
4	Y = 10	M = 40	50
5	Y = 10	R = 200	210
6	A = 1	M = 40	41
7	A = 1	N = 50	51
8	Y = 10	M = 40	50
9	B = 2	N = 50	52
	38 = 19×2	570 = 19×30	608 = 19×32

[58] Sister Ihsan Ramadan of Masjid Tucson counted all the suras in the Quran which end with the letter "N" (Noon), the last letter in Sura 9. She found that 43 suras end with the same letter as Sura 9 (N) — suras 1, 2, 3, 7, 9, 10, 11, 12, 15, 16, 21, 23, 26, 27, 28, 29, 30, 32, 36, 37, 38, 39, 40, 43, 44, 46, 49, 51, 58, 61, 62, 63, 66, 67, 68, 70, 77, 81, 83, 84, 95, 107, and 109. Just add the sura numbers + number of suras that end with "N", and you get 1919. Thus, the last letter in Sura 9 is once again confirmed to be "N," not "M."

1919 — The sum of sura numbers + count of suras ending with "N"

THE CRUCIAL EXPRESSION: "LAA ELAAHA ELLA HOO"

[59] Now let us look at the crucial expression "LAA ELAAHA ELLA HOO" (There is no god except He). This phrase occurs in the false injection 9:129. This very special expression occurs 29 times in 19 suras (Table 38). By adding the sura numbers of the 19 suras, plus the verse numbers where the phrase "LAA ELAAHA ELLA HOO" occurs, plus the number of occurrences of this crucial phrase, the grand total comes to 2128, or 19×112 . This awesome result is dependent on the fact that 9:128-129 do not belong in the Quran. Obviously, if 9:129 were included, the crucial expression "LAA ELAAHA ELLA HOO," the First Pillar of Islam, would not conform with the mathematical code.

Table 38: All occurrences of "LAA ELAAHA ELLA HOO" (after removing 9:129)

No.	Sura	Verses with Phrase	Frequency
1	2	163, 255	2
2	3	2, 6, 18 (2×)	4
3	4	87	1
4	6	102, 106	2
5	7	158	1
6	9	31	1
7	11	14	1
8	13	30	1
9	20	8, 98	2
10	23	116	1
11	27	26	1
12	28	70, 88	2
13	35	3	1
14	39	6	1
15	40	3, 62, 65	3
16	44	8	1
17	59	22, 23	2
18	64	13	1
19	73	9	1
19	507	1592	29 → 507+1592+29 = 2128 = 19×112

[60] From first occurrence (2:163) to last (73:9): grand total = 316502 = 19×16658 . Table 39.

Table 39: All suras from first to last occurrence of "LAA ELAAHA ELLA HOO"

Sura No.	No. of Verses	Sum of Verse #s	Total
2	123 (286–163)	27675	27800
3	200	20100	20303
—	—	—	—
9	127	8128	8264
—	—	—	—
72	28	406	506
73	9	45	127
2700	5312	308490	316502 = 19×16658

[61] The phrase "LAA ELAAHA ELLA HOO" occurs 7 times between the missing Basmalah of Sura 9 and the extra Basmalah of Sura 27, in 9:31, 11:14, 13:30, 20:8, 20:98, 23:116, and 27:26. By adding the numbers of the 7 verses, we get 323, or 19×17. The detailed data are shown in Table 40.

Table 40: Occurrences of the phrase between the two Basmalahs

Sura No.	Verse Numbers with Phrase
9	31
11	14
13	30
20	8
20	98
23	116
27	26
	323 = 19×17

If 9:129 were part of the Quran, the total in Table 40 would have been: 323+129=452, not a multiple of 19. God rejects what the hypocrites utter, even if it is the truth (63:1).

THE ULTIMATE QURANIC MIRACLE

[62] Brother Abdullah Arik has discovered what I consider to be the ultimate Quranic miracle. This miraculous phenomenon incontrovertibly authenticates every single verse in the Quran — the number of verses in every sura, and the numbers assigned to every single verse in the Quran — while exposing and rejecting the false injections, 9:128-129. To witness this great phenomenon,

see Appendix 1 (under the heading: Superhuman Numerical Combinations). Putting the number of every verse in the Quran in sequence from the beginning to the end, with the number of verses in each sura ahead of the verse numbers of each sura, the final number consists of 12692 digits (19x668), and the number itself is also a multiple of 19. If the wrong number of verses for Sura 9 was used — 129 instead of 127 — neither the number of digits, nor the number itself would be divisible by 19.

[63] Since the subject of this Appendix is Sura 9 and its number of true verses, it is noteworthy that if we write down the number of the sura, 9, followed by the correct number of verses, 127, followed by the numbers of all the verses from 1 to 127, the resulting long number is a multiple of 19. Needless to say, if the wrong number of verses is used, i.e., 129 instead of 127, this remarkable miracle would have disappeared.

9 127 1 2 3 4 5 ... 122 123 124 125 126 127 → multiple of 19

[64] The number of verses in Sura 9, 127, is an odd number. The falsifiers added two fake verses, and this made the number of verses 129, which is also an odd number. Mr. Arik used the same computer program he devised for Item 62 above to check all odd-numbered verses in the Quran. Thus, the number of verses in every sura was written down, followed only by the last digit of each of the odd-numbered verses in that sura. The result is a long number, with 3371 digits, that is divisible by 19. Obviously, Sura 9 was represented by the number 12713579.....7.

[65] Since Sura 9 is an un-initialed sura, Mr. Arik applied the same computer program to all 85 un-initialed suras. The number of every verse in each of the 85 suras was written down, without the number of verses in the sura. Thus, Sura 1 was represented by the number 1234567, not 71234567. This was done with all un-initialed suras. The final result is a number that consists of 6635 digits, and is a multiple of 19. These awesome phenomena would be destroyed if we used the wrong number of verses for Sura 9, i.e., 129 instead of 127.

GOD'S MESSENGER OF THE COVENANT

[66] Finally, in a profound demonstration of the foreknowledge of the Almighty Author of the Quran, it is mathematically coded that "The person destined to prove that Sura 9 consists of 127 verses is Rashad Khalifa, God's Messenger of the Covenant" (see Appendix 2). The gematrical value of the word "Rashad," as written in the Quran (40:29, 38) is 505 (R=200, Sh=300, A=1, and D=4). The gematrical value of the word "Khalifa," as written in the Quran (38:26) is 725 (Kh=600, L=30, I=10, F=80, and H=5). By writing down the value of "Rashad," followed by the value of

"Khalifa," followed by the number of Sura 9, followed by the correct number of verses in this sura, the product is 5057259127. This number is a multiple of 19; it equals 19×266171533 .

[67] The number of verses from 3:81 (where God's Messenger of the Covenant is prophesied) to 9:127 is $988 = 19 \times 52$. Table 41.

[68] The sum of verse numbers from 3:81 to 9:127 is also a multiple of 19. Table 41.

Table 41: Verses from 3:81 to the end of Sura 9

Sura No.	No. of Verses	Sum of Verse #s
3	119 (from 3:81)	16860
4	176	15576
5	120	7260
6	165	13695
7	206	21321
8	75	2850
9	127	8128
	988 = 19×52	85690 = 19×4510

[69] In Verse 3:78, just 3 verses before proclaiming God's Messenger of the Covenant, the word "God" number 361 (19×19) occurs. This verse (3:78) informs us that some falsifiers will "add falsehood to the Quran, then claim that it is part of the Quran; they attribute lies to God, knowingly."

[70] The word "God" occurs 912 times = 19×48 from Verse 3:78 to 9:127. Table 42.

Table 42: Occurrence of "God" from 3:78 to end of Sura 9

Sura Number	Frequency of "God"
3	132
4	229
5	147
6	87
7	61
8	88
9	168
	912 = 19×48

[71] The number of letters, plus the number of words in 3:78 and in the false verses 9:128-129, give the same total, 143. Verse 3:78 consists of 27 words and 116 letters, & 9:128-129 consist of 115 letters and 28 words.

WHAT CAN WE SAY?

The overwhelming physical evidence provided by the Almighty to protect and authenticate His message leaves no doubt that: (1) no distortion of any kind can enter the Quran, (2) Verses 9:128-129 do not belong in the Quran, and (3) every element in the Quran is mathematically structured far beyond human capabilities — the number of suras, the number of verses, the numbers assigned to the suras and verses, the frequency of occurrence of key expressions, the number of words, the number of letters, and the unique spelling of certain words.

This Appendix documents a profound miracle in its own right. The Almighty Author of the Quran has deliberately permitted the blasphemous addition of two verses to Sura 9 in order to:

(1) Demonstrate an essential function of the Quran's mathematical composition. (2) Prove the impossibility of tampering with the Quran. (3) Fulfill God's promise to distinguish the believers and expose the hypocrites.

Why Did God Permit It For 1400 Years?

Due to the mass corruption of Islam shortly after the prophet Muhammad's death, God fulfilled His pledge in 47:38: if the Arabs failed to uphold the Quran, God would dismiss them from His grace. When the Arabs distorted the Quran and exterminated the Prophet's family, they incurred God's pledge and no longer deserved to possess the true Quran. The evidence is irrefutable that the Arabs have abandoned the Quran en masse.

For example, there is not a single mosque in the so-called Muslim world today that upholds the commandment: "The mosques belong to God; you shall not invoke anyone else besides God" (72:18). The call to prayer and the prayer itself are no longer devoted to God alone; Muhammad's name is invariably invoked along with the name of God.

The First Pillar of Islam is clearly stated in the Quran (3:18 & 47:19): LAA ELAAHA ELLA ALLAH. But the Muslims do not want God if Muhammad is not invoked along with Him — this behavior is documented in the Quran (39:45).

In view of the incontrovertible divine evidence presented here, and in Appendices 1, 2, and 26, one can truly appreciate:

"Surely, we have revealed this message, and surely, we will preserve it." [15:9]

"If all the humans, and all the jinns, banded together, in order to produce a Quran like this, they will surely fail, no matter how much assistance they lend one another." [17:88]

"The disbelievers rejected this message when it came to them, though it is a profound scripture. No falsehood can enter it, through addition or deletion. For it is a revelation from the Most Wise, Most Praiseworthy." [41:41-42]

I acknowledge with thanks the valuable contributions of Mahmoud Ali Abib, Gatut Adisoma, Abdullah Arik, Ihsan Ramadan, Lisa Spray, and Edip Yuksel. Some of the astounding mathematical facts presented in this Appendix were discovered by these hard working researchers at Masjid Tucson.

Al-Hamdulillah Rabbi al-Alamin

God is Great. The Most Gracious. The Most Merciful.
