

AI Solution Front-End Developer (Internship – Remote, 3–6 Months)

Stipend: ₹10,000-20,000 per month

Location: Remote

Duration: 3–6 Months

About the Role

We are looking for a creative and motivated AI Solution Front-End Developer Intern to help build intuitive, responsive, and user-friendly interfaces for AI-powered applications. You will have the opportunity to work with cutting-edge technologies and contribute to projects that make an impact.

Key Responsibilities

- Develop and enhance user interfaces for AI-based web applications.
- Collaborate with AI engineers and backend developers to integrate AI services into the UI.
- Build responsive, accessible, and high-performance web interfaces.
- Optimize user experience and application performance.

Required Skills

- Strong knowledge of HTML, CSS, and JavaScript.
- Familiarity with modern front-end frameworks such as React.js, Vue.js, or Angular.
- Basic understanding of REST APIs and client-server architecture.
- Understanding of responsive design principles.

Desirable Skills

- Exposure to UI/UX design tools (Figma, Adobe XD, etc.).
- Familiarity with cloud platforms and deployment workflows.
- Interest in AI and how intelligent systems are consumed via user interfaces.

AI Solution Back-End Developer (Internship – Remote, 3–6 Months)

Stipend: ₹10,000-20,000 per month

Location: Remote

Duration: 3–6 Months

About the Role

We are looking for a technically strong AI Solution Back-End Developer Intern to help build scalable, secure back-end services that power AI-driven applications. This role offers the chance to work on the latest advancements in AI and software development, ensuring robust and efficient system performance.

Key Responsibilities

- Develop and maintain backend services and APIs for AI-based products.
- Integrate machine learning and AI models into production-ready services.
- Design and optimize databases and data pipelines.
- Ensure application performance, security, and scalability.

Required Skills

- Strong knowledge of Python, Node.js, or Java.
- Familiarity with backend frameworks such as FastAPI, Flask, or Express.js.
- Understanding of RESTful APIs and microservices architecture.
- Basic knowledge of databases such as MySQL, PostgreSQL, or MongoDB.

Desirable Skills

- Familiarity with cloud platforms (AWS, Azure, or GCP).
- Exposure to LLMs and Generative AI architectures.
- Knowledge of Docker, CI/CD, and DevOps fundamentals.
