

FIFTH SPECTRUM

Product Safety & Lead-Free Declaration

This ceramic tableware collection is produced using modern high-temperature firing and stable glaze systems, designed for daily food contact use and long-term durability. All products have been tested for heavy metal migration in accordance with internationally recognised standards.

Food Contact Safety

Independent laboratory testing confirms that all tested items demonstrate lead and cadmium migration levels below laboratory detection limits.

Test Standard

ISO 6486-1:2019 (Ceramic ware — Release of lead and cadmium)

Compliance Statement

This product range complies with international food-contact safety expectations commonly adopted in the EU, UK, ASEAN, and global retail markets.

Fifth Spectrum is committed to responsible manufacturing, product safety, and refined ceramic craftsmanship for modern dining.
