Our Verdict

If you have family or friends living abroad, Viber is well worth knowing about. Calls between Viber users anywhere in the world are completely free over Wi-Fi — including video calls, voice calls, and messages. It is less well known in the UK than WhatsApp but works in exactly the same way.

Final Verdict: Viber earns four stars for its excellent free international calling and ease of use. It loses a star because it is less universally known in the UK and its advantages are most relevant to people with family abroad. If that describes you — Viber is an excellent choice.
