

Zoom — Review

The best app for group family video calls

Overall Rating: /5 — ★★★★★

softwareforseniors.co.uk

Our Verdict

Zoom is the best app for bringing a large group of family members together on one call — no matter what devices they use or where they are in the world. It is slightly more complicated to set up than WhatsApp or FaceTime, but once you know how it works it is extremely reliable and feature-packed.

■ What We Like

- ✓ Works on every device — iPhone, Android, and computers
- ✓ Group calls with up to 100 participants
- ✓ Joining is easy — just tap a link sent by family
- ✓ Works in a web browser on a computer — no download needed
- ✓ Screen sharing to show photos or websites during calls

■ What We Don't Like

- ✗ 40 minute limit on free group calls with 3 or more people
- ✗ Setting up your own call is more complicated than other apps
- ✗ More buttons and options — can feel overwhelming at first

Who is This App Best For?

- ✓ You want to call a large group of family members at once
- ✓ Your family use a mix of iPhones, Android phones and computers
- ✓ You are happy joining calls that someone else sets up
- ✓ You want to share photos during calls

Our Rating Breakdown

Category	Rating
Ease of use	

Call quality	★★★★
Features	★★★★
Value for money	★★★★
Suitable for seniors	★★★★

Final Verdict: Zoom loses one star only because of the 40 minute limit and slightly more complex setup. For group family calls it remains the best option available — nothing else brings large groups together as reliably.
